Part I Modelling Educational Effectiveness at Teaching, School and System Level

1 An Overarching Conceptual Framework	3
Introduction	3
Educational Systems as Hierarchical Structures	3
The Overall Framework	5
Alternative Representation and Expansion of the Basic Framework . . .	7
A Closer Look at Effectiveness and Efficiency Interpretations of the Framework	10
The Effectiveness Perspective: Specification of Input-Process-Context-Output Models at Student, Classroom, School and System Level	10
The Efficiency Perspective: Effectiveness at the Lowest Possible Costs	13
Theoretical Concepts and Interpretations	14
Vertical Control Mix	14
Direct and Indirect Effects.	15
Degree of Higher Level Pre-structuring.	16
Contingency, Complexity and the Limitations of International Comparison.	21
Choice of “Process” and “Input” Variables, Depending on the Kind of Outcomes That Are Measured	22
Conclusion.	24
References	25
2 Modelling Teaching and Learning.	27
Introduction	27
Student Learning.	27
Teaching and Classroom Ecology	29

The Elementary Parts of Teaching: Matching of Content Elements, Psychological Operations and Didactic Considerations	30
Structure and Independence in Teaching	33
Pro-active and Retro-active Regulation in Teaching: The Case of Performance Feedback	38
Providing Learning Opportunities	43
Classroom Ecology and Climate	43
Motivational Aspects: Stimulating Student Engagement	45
Conclusion	47
References	48
3 Defining the Key Factors in Instructional Effectiveness	51
Introduction	51
Review Studies	52
Developments in the Research on Teacher and Teaching Effectiveness	53
Early Emphases on Personality Characteristics of Teachers	53
Models on Structured Teaching Inspired by the Carroll Model	54
A Blending of Structured Teaching and Constructivist Principles	56
Domain Specific Differentiation	58
Summary of More Recent Reviews of the Variables in Instructional Effectiveness	59
A Closer Look at Teacher Effectiveness	60
Personality Traits	61
Formal Qualifications and Experience	62
Subject Matter Knowledge and Knowledge About Teaching and Learning	63
Pedagogical Content Knowledge	63
Key Factors	64
More Elaborate Conceptual Analysis of the Teaching Variables	66
A More Synthetic Use of the Factors	71
References	72
4 Modelling School Effectiveness	77
Introduction	77
Results of Empirical School Effectiveness Research: A First Overview of Factors	78
Models and Theories of the School	79
Fend's Basic Theory of the School	79
The Professional Bureaucracy: Professional Autonomy	79

Prescriptive Interpretations of the “Effective Schools Model”:	
The Rationally Managed School.	81
The School as a Learning Organization:	
The Cybernetic Principle.	86
Development of (in)effective School Culture:	
Self-organization and School Ecology.	90
Schools as High-Reliability Organizations: Inspirations	
from Neo Institutional Economics	95
Concluding Comments on School Theories and Models:	
What Are the Most Important Factors and How Would	
They Interact?.	97
Conclusion About the Effective Functioning of Schools	99
References	101
5 School Effectiveness Research and the Meaning	
of the Most Important Effectiveness-Enhancing Conditions	105
Introduction: The Overall Design of School Effectiveness Studies	105
Different Strands of Educational Effectiveness Research	107
Results of Integrated Multi-level School Effectiveness	
Studies	109
The Meaning of the Key Effectiveness-Enhancing Conditions . . .	109
More Detailed Definitions and Exemplary Items	
of the Main Factors.	118
References	145
6 System-Level Context and Effectiveness Enhancing Policies	147
Introduction	147
The Larger Societal Context.	148
The Education System’s Ecology, Areas of Structural Reform	149
Functional Decentralization	149
Evaluation and Accountability Arrangements.	151
Integrated and Categorical Structures in Secondary Education . . .	153
Malleable Inputs and Processes at System Level	154
Annual Budget.	155
Educational Programs Aimed at Enhancing Educational	
Quality	155
Equity-Oriented Policies	155
Initial Teacher Training.	156
Conclusions About Policy Contexts and Actual Policies	
at System Level	157
References	159

Part II Quantitative Research Results

7	Effects and Effect Sizes in Educational Effectiveness Research	165
	Introduction	165
	The “Effect” of Belonging to a Unit at a Certain Level:	
	Decomposition of Variance	165
	Approximation of Absolute School Effects	168
	Opening the Black Boxes of Unit Effects	169
	Growth Curves	170
	Analyzing Absolute Effects	171
	Application of Path Analysis and Structural Equation	
	Modelling	172
	Program Evaluations and (Quasi) Experiments	
	to Assess Educational Effectiveness	172
	References	172
8	Meta-Analyses of School and Instructional Effectiveness	175
	Introduction	175
	The Variables Used in the Meta-Analyses	176
	Methods	179
	Literature Search	179
	Types of Meta-Analysis	179
	Results 1: The Effects of the School-Level Factors	181
	Independent and Dependent Variables Used	
	in the Meta-Analysis	181
	Moderator Variables Used in the Meta-Analysis	181
	Vote Counting	183
	Multi-level Approach	185
	Discussion of the School-Level Results	191
	Results 2: The Effects of the Teaching Variables	194
	Mean Effect Sizes	195
	The Impact of Study Characteristics on Effect Sizes	198
	Conclusions	202
	Discussion of the Results of the Meta-Analysis	
	on the Teaching Variables	203
	Effect Sizes	203
	“Traditional” Direct Teaching Versus “New Learning”	203
	The Most Effective Teaching Factors	204
	Teaching Variables Showing the Highest Effect Sizes	205
	The Meaning of the Results with Respect to the Models	
	on Teaching and Learning, Discussed in Chap. 2	206
	Implications of the Results for Educational Policy	
	and Practice	207

Suggestions for Research on School and Teaching Effectiveness	207
Annex 1: Steps in the Rechecking of the Database from Scheerens et al. (2005).	208
The Way in Which Non-significant Effects Are Incorporated.	208
Standardized and Non-standardized Effects	208
Converting Effect Size Indicators	208
Correcting Various Kinds of Errors in the Original Tabulations.	209
Combination of Effects	209
Annex 2: Mean Effect Sizes and 95 % Confidence Intervals for the 15 and 6 Factor Categorization of the Teaching Variables	209
Annex 3: Technical Annex: Statistical Modelling Issues.	210
Effect Sizes	212
Weighting	213
References	213
9 System-Level Conditions: Miscellaneous Results	225
Introduction	225
Illustrative Research Findings on System-Level Conditions.	225
School Autonomy	225
Accountability	226
School Choice	227
Private Schools	228
Stratification (Tracked, Versus Comprehensive School Systems in Secondary Education).	229
Results from PISA 2009 and 2012	230
PISA 2009 (Reading Literacy Performance).	230
PISA 2012 (Mathematics).	231
Direct and Indirect Effects of System-Level Variables	232
Dynamic Effects of System-Level Variables	237
Correlations of Changes in System-Level Characteristics with Changes in Reading Performance Per Country (2000–2009)	238
Correlations of System-Level Characteristics Between Years	238
Discussion	239
References	240
10 Other Syntheses of Empirical Findings	243
Introduction	243
Comparison with Other Multifactor Meta-Analyses	243
Results of “Single Factor” Meta-Analyses	246
Results from International Comparative Studies	249
Conclusions	252
References	253

Part III Theoretical Interpretation and Practical Application

11 Theories on Educational Effectiveness and Ineffectiveness	259
Introduction	259
What Does Theorizing About Educational Effectiveness Mean?	260
The Way the Conceptual Model (Chap. 1) Sets the Stage for Effectiveness and In-effectiveness	262
Implementation	263
Unspecified Causal Chains	263
Background Conditions and Ecology	264
Varying Patterns of Control and Autonomy	264
Plurifinality and Feedback	265
Low Elasticity of Policy Amenable Variables	265
The Way Theory Is Being Used in an Eclectic Way in School Effectiveness Research	266
The Dynamic Model of Educational Effectiveness	267
Education Production Functions	268
The Quinn and Rohrbaugh Competing Values Framework	269
Other Conceptions of “Good” Organizational Functioning of Schools	270
The Rationality Paradigm and Its Fit to the Educational Effectiveness Knowledge Base	270
Synoptic Planning and Bureaucratic Structuring	271
Contingency Theory	271
Cybernetics	272
Public Choice Theory	272
What Rational Models Have to Say About Educational Ineffectiveness	273
Alternative Theories for Explaining Effectiveness and Ineffectiveness	277
Schools as Loosely Coupled Systems	278
Self-organization	279
Importance of Initial Conditions	280
Patterns of Stability and Instability	280
Nonlinear Development	281
Preoccupation with Disorder	281
Rules Amidst Chaos	281
Non-Managed Dynamics	281
Discussion	284
References	285
12 Recapitulation and Application to School Improvement	291
Introduction	291
What Works at What Level, and “How Much”	292

Theoretical Interpretation of the Empirical Findings.	297
Characteristics of the Conceptual Model and the	
Research Evidence	298
The Overridingly Strong Influence of the Rational	
Planning Model	299
The Implications for Educational Policy and Practice.	303
Utilization of the Educational Effectiveness Knowledge Base . . .	303
Strategies of Systemic Reform and School Improvement	306
Levers for Improvement	311
The Connection Between Educational Effectiveness,	
School Improvement and Systemic Reform Reconsidered.	314
Improvement Models as Direct Extensions	
of Educational Effectiveness Research	316
School Improvement as Strategic Change	317
Models for Systemic Reform	319
Recommendations for Systemic Reform, Based	
on International Comparative Assessments	321
The Scope of School Improvement in Comparison	
to Educational Effectiveness Research.	324
Conclusions	325
References	328
 13 Case Study: Quality-Oriented Educational Policy	
in the Netherlands	333
Introduction	333
Description of the School System	334
The Structure of the Dutch School System	334
High Stakes Testing and Examination at Primary	
and Secondary Level	335
Division of Responsibilities	336
Some Specific Features and Relevant Trends	337
The Network Structure of Quality-Oriented Educational Policy	
in the Netherlands.	338
How the Social Dialogue Functions	339
Quality Agendas Issued by the Central Government	
and Accorded by the Social Partners.	340
A Closer Look at the Quality Outlook of the Social Partners . . .	340
The Role of School Boards	342
Evaluative Comments	343
The Functioning of Educational Evaluation and Assessment	
in the Netherlands.	344
Context and History of the Evaluation System.	344
The Functioning of Evaluation and Assessment	346

Overview of System, School, Teacher, and Student	
Evaluation	346
Responsibilities for Evaluation and Assessment	349
Implementation, Appreciation and Use of Evaluation	
and Assessment	350
Evaluative Comments	351
Evidence-Based and Bottom-up Reform in the Netherlands	352
Tensions Between Autonomy and Quality	352
Outlook on Effectiveness	353
The Program: “Schools Have the Initiative”	354
Effectiveness of Equity-Oriented Educational Policies	
and Programs in the Netherlands	359
Main Equity-Related Policy Challenges	359
Main Policy Initiatives and Reform Measures	361
Assessment of the Effectiveness of the Policy Measures	363
Proposals for Reform and Specific Measures	367
Conclusions About Equity Enhancing Educational Policies	
in the Netherlands	368
Final Discussion	369
Performance of Dutch Education in International Perspective	370
Tentative Attribution to Improvement Scenarios	371
Annex: Schematic Overview of Evaluation and Assessment	
Provisions in Dutch Education	375
Overview A: Type of Evaluation, Short Description,	
Formal Responsibility and Implementation and Use	375
Overview B: Type of Evaluation, Short Description,	
Main Instruments and Periodicity	377
