## Part I Ecological Economics, Climate Change, and Sustainable Development

<b>1 Ecological Economics and Climate Change</b>	<b>3</b>
1.1 Introduction	3
1.2 Some Background Information on Climate Change Science	5
1.2.1 The Natural Greenhouse Effect	5
1.2.2 Climate Change Over the Course of Time	6
1.2.3 Anthropogenic Global Warming—The Enhanced Greenhouse Effect	14
1.2.4 Climate Change Projections	21
1.2.5 The Potential Implications of Climate Change	26
1.2.6 The Scientific and Institutional Response to Climate Change	35
1.3 What Is Ecological Economics?	42
1.4 Putting the Climate Change Crisis into an Appropriate Context	45
Annex 1A: Is the Earth Still Warming?—Yes It Is!	47
Notes	50
<b>2 Sustainable Development and Climate Change</b>	<b>57</b>
2.1 Defining Sustainable Development	57
2.1.1 The Coevolutionary World-View	58
2.1.2 The Linear Throughput Representation of the Economic Process	59
2.1.3 Ecological Constraints, Human Needs, and Intragenerational Equity	62
2.1.4 A Broad Definition of Sustainable Development	68
2.2 Sustainable Development and the Ecological and Economic Limits to Growth	69
2.2.1 Economic and Uneconomic Growth	69
2.2.2 Efficiency-Increasing Technological Progress	70

2.3	Empirical Evidence of the Ecological and Economic Limits to Growth . . . . .	75
2.3.1	Ecological Limits to Growth: Ecological Footprint Versus Biocapacity . . . . .	75
2.3.2	Economic Limits to Growth: The Genuine Progress Indicator. . . . .	79
	Notes . . . . .	82
<b>3</b>	<b>Policies to Achieve Sustainable Development . . . . .</b>	<b>85</b>
3.1	Achieving Sustainable Development: Policy Goals and Instruments. . . . .	85
3.2	Ecological Tax Reform. . . . .	89
3.3	Achieving Ecological Sustainability . . . . .	90
3.3.1	Cap-Auction-Trade Systems . . . . .	90
3.3.2	Dealing with Non-renewable Resources . . . . .	93
3.3.3	The Sustainable Use of Agricultural Land . . . . .	96
3.3.4	Native Vegetation Clearance Controls . . . . .	97
3.3.5	Population Stabilisation . . . . .	99
3.4	Achieving Distributional Equity. . . . .	103
3.4.1	Minimum Income. . . . .	103
3.4.2	Maximum Income/Limiting the Range of Income Inequality . . . . .	108
3.4.3	Foreign Aid. . . . .	110
3.5	Achieving Allocative Efficiency. . . . .	111
3.5.1	Appropriately Defined Property Rights . . . . .	111
3.5.2	Externalities . . . . .	113
3.5.3	Public Goods . . . . .	117
3.5.4	Sunk Costs and the Contestability of Markets . . . . .	118
3.5.5	Market Deregulation and the Privatisation of Public Assets . . . . .	120
3.5.6	Flexible Labour Markets and Adequate Skills Formation . . . . .	121
3.6	Monetary Reform. . . . .	123
3.7	National Accounting Reforms . . . . .	126
3.7.1	National Accounting Reform # 1—National Income. . . . .	126
3.7.2	National Accounting Reform # 2—Sustainable Economic Welfare . . . . .	127
3.7.3	National Accounting Reform # 3—Ecological Economic Efficiency . . . . .	128
3.7.4	National Accounting Reform # 4—Biophysical Indicators . . . . .	129
3.7.5	National Accounting Reform # 5—Social Capital Indicators . . . . .	131
3.8	International Reforms. . . . .	131
3.8.1	The WTO and Compensating Tariffs . . . . .	136

3.8.2	A New System of Foreign Exchange Management . . . . .	137
3.8.3	Redirecting the Goals and Functions of Bretton Woods Institutions . . . . .	140
	Notes . . . . .	141
<b>4</b>	<b>A Sustainable Versus a Growth-as-Usual Scenario . . . . .</b>	<b>149</b>
4.1	Introduction . . . . .	149
4.2	A Sustainable Emissions Scenario . . . . .	150
4.2.1	Setting the Guiding Parameters for a Sustainable Emissions Scenario . . . . .	150
4.2.2	Ecological Sustainability: Avoiding Catastrophic Climate Change . . . . .	150
4.2.3	Ecological Sustainability: A Sustainable Population and a Sustainable Rate of Resource Use . . . . .	153
4.2.4	Increasing Economic Welfare: Moving to the Optimal Macroeconomic Scale . . . . .	153
4.2.5	Assumptions . . . . .	155
4.2.6	Results . . . . .	158
4.3	An Assessment of the Sustainable Emissions Scenario . . . . .	161
4.3.1	Evolution of the Global Economy . . . . .	161
4.3.2	The Plausibility of the Sustainable Emissions Scenario . . . .	163
4.4	A Growth-as-Usual Scenario . . . . .	167
4.4.1	Assumptions . . . . .	167
4.4.2	Results . . . . .	168
4.4.3	Plausibility of the Growth-as-Usual Scenario . . . . .	171
	Annex 4A: Energy Requirements and Energy Potentials of the Sustainable Emissions Scenario . . . . .	172
	Notes . . . . .	177

## **Part II Alternative Perspectives of the Climate Change Crisis**

<b>5</b>	<b>A Mainstream Economic Perspective of the Climate Change Crisis . .</b>	<b>183</b>
5.1	Introduction . . . . .	183
5.2	The Stern Review: An Example of a Mainstream Economic Approach to the Climate Change Crisis . . . . .	184
5.2.1	Stern's General Conclusions . . . . .	184
5.2.2	Stern's General Methodology . . . . .	185
5.2.3	Stern's Choice of Discount Rate . . . . .	186
5.3	Mainstream Criticisms of the Stern Review . . . . .	187
5.3.1	Stern Underestimates the Cost of Climate Change Mitigation . . . . .	187
5.3.2	Stern Overestimates the Cost of Climate Change Damages . . . . .	188
5.3.3	The Discount Rate Used by Stern Is Too Low . . . . .	189
5.3.4	The Stern Review Does not Constitute a Proper Benefit-Cost Analysis . . . . .	191

5.3.5	Stern's Conclusions Are Incommensurate with His Economic Analysis . . . . .	196
5.4	Stern's Response to the Mainstream Criticisms of the Stern Review . . . . .	196
5.4.1	Stern Underestimates the Cost of Climate Change Mitigation—Stern's Response . . . . .	198
5.4.2	Stern Overestimates the Cost of Climate Change Damages—Stern's Response . . . . .	199
5.4.3	The Discount Rate Used by Stern Is Too Low—Stern's Response . . . . .	201
5.4.4	The Stern Review Does not Constitute a Proper Benefit-Cost Analysis—Stern's Response . . . . .	206
5.4.5	Stern's Conclusions Are Incommensurate with His Economic Analysis—Stern's Response. . . . .	207
5.5	Support and Further Criticisms of the Stern Review . . . . .	208
5.5.1	Mainstream Support for the Stern Review . . . . .	208
5.5.2	Further Criticisms of the Stern Review . . . . .	212
5.5.3	An Ecological Economics Perspective of the Stern Review . . . . .	219
	Notes . . . . .	222
<b>6</b>	<b>An Ecological Economic Perspective of the Climate Change Crisis . . .</b>	<b>225</b>
6.1	Introduction . . . . .	225
6.2	Measuring Climate Change Damage Costs and Mitigation Costs . .	226
6.2.1	The Total Cost of Climate Change Damages . . . . .	226
6.2.2	The Total Cost of Climate Change Mitigation . . . . .	231
6.2.3	How Are Total Damage Costs and Mitigation Costs Estimated? . . . . .	234
6.3	Overlooked Factors Affecting Climate Change Damage Costs and Mitigation Costs. . . . .	242
6.3.1	Climate Change Damage Costs—Overlooked Factors . . . .	242
6.3.2	Mitigation Costs—Overlooked Factors . . . . .	256
6.4	Future Changes in Marginal Damage Costs and Marginal Mitigation Costs and Its Implications for the Social Cost of Carbon. . . . .	266
6.4.1	Likely Changes in a GWP Growth-as-Usual Context . . . .	266
6.4.2	Likely Changes in a Steady-State Economic Context . . . .	273
6.5	The Shortcomings of Benefit-Cost Analysis . . . . .	277
	Notes . . . . .	281

### **Part III A Way Forward and the Road to Sustainable Development**

<b>7</b>	<b>The Case for an Emissions-Trading System to Help Resolve the Climate Change Crisis . . . . .</b>	<b>291</b>
7.1	Introduction . . . . .	291
7.2	Key Features of an Effective Emissions-Trading System . . . . .	292

7.3	Key Features of a Tax-Based System . . . . .	297
7.4	A Theoretical Backdrop to Examine the Pros and Cons of Different Policy Mechanisms. . . . .	298
7.4.1	The Social Welfare Impact of Introducing a Non-tradeable Emissions Quota . . . . .	301
7.4.2	The Social Welfare Impact of Introducing an Emissions Tax . . . . .	305
7.4.3	The Social Welfare Impact of Introducing an Emissions-Trading System . . . . .	307
7.5	Refuting the Main Criticisms of Emissions-Trading Systems . . . . .	309
7.5.1	Criticism # 1—An Emission-Trading System Leads to Undesirable Market Uncertainty . . . . .	309
7.5.2	Criticism # 2—Taxes Are Simpler to Implement Than an Emissions-Trading System. . . . .	319
7.5.3	Criticism # 3—Emissions-Trading Systems Often Include Allowances for Carbon Offsets/Credits that Are Vulnerable to Abuse . . . . .	321
7.5.4	Criticism # 4—Emissions-Trading Systems Are Highly Corruptible and Subject to Negative Influences by Political Lobby Groups . . . . .	321
7.5.5	Criticism # 5—Emissions-Trading Systems Impose an Emissions ‘Floor’ as Well as an Emissions Cap . . . . .	323
7.5.6	Criticism # 6—Emissions-Trading Systems Promote Speculative Trading Behaviour . . . . .	326
7.5.7	Criticism # 7—Emissions-Trading Systems Allow Big Firms to Buy a Large Quantity of Permits to Control Markets . . . . .	327
7.5.8	Criticism # 8—Countries Requiring More Growth Are Less Likely to Agree to an Emissions Cap Than an Emissions Tax . . . . .	327
7.5.9	Criticism # 9—Emissions-Trading Systems so Far Instituted Have Failed to Significantly Reduce Emissions . . . . .	329
7.6	Further Ecological Economic Reasons for Preferring an Emissions-Trading Systems Over an Emissions Tax. . . . .	330
7.6.1	Ecological Sustainability . . . . .	330
7.6.2	Distributional Equity . . . . .	333
7.6.3	Allocative Efficiency . . . . .	334
7.7	The Need for Additional Government Intervention . . . . .	335
	Notes . . . . .	339
<b>8</b>	<b>International Climate Change Institutions and the Greenhouse-Gas Emitting Performance of Nations. . . . .</b>	<b>345</b>
8.1	Introduction . . . . .	345
8.2	Climate Change Institutions and Related Mechanisms . . . . .	346

8.2.1	The United Nations Framework Convention on Climate Change . . . . .	346
8.2.2	The Kyoto Protocol—Obligations During the First Commitment Period of 2008–2012 . . . . .	348
8.2.3	The Kyoto Protocol—Obligations During the Second Commitment Period of 2013–2020 . . . . .	350
8.2.4	Mitigation—The Kyoto Protocol’s Flexibility Mechanisms . . . . .	352
8.2.5	Mitigation—The Kyoto Protocol’s Treatment of Land Use, Land-Use Change, and Forestry (LULUCF) . . . . .	359
8.2.6	Mitigation—The Kyoto Protocol’s Treatment of Aviation and Shipping . . . . .	361
8.2.7	Mitigation—The Kyoto Protocol’s Enforcement Mechanisms . . . . .	362
8.2.8	Climate Change Financing Mechanisms and Institutions . . . . .	364
8.2.9	The Kyoto Architecture—A Summary . . . . .	386
8.3	The Greenhouse Gas-Emitting Performance of Nations . . . . .	386
8.3.1	The Greenhouse Gas-Emitting Performance of Annex I Nations . . . . .	386
8.3.2	The Performance of Non-annex I Nations . . . . .	394
8.3.3	Comparing the Greenhouse Gas-Emitting Performances of the UNFCCC-Defined Groups of Nations . . . . .	394
	Notes . . . . .	398
<b>9</b>	<b>Laying the Foundations to Support a New Global Climate Change Protocol . . . . .</b>	<b>411</b>
9.1	Introduction . . . . .	411
9.2	Views on the Kyoto Institutions and Related Mechanisms . . . . .	413
9.2.1	Mitigation—The Kyoto Protocol’s Flexibility Mechanisms . . . . .	413
9.2.2	Mitigation—The Kyoto Protocol’s Treatment of Land Use, Land-Use Change, and Forestry (LULUCF) . . . . .	432
9.2.3	Mitigation—Incorporating Funding Commitments in a New Global Protocol to Boost Mitigation Efforts . . . . .	441
9.2.4	Mitigation—The Kyoto Protocol’s Enforcement Mechanisms . . . . .	445
9.2.5	Mitigation—Border-Tax Adjustments/Green Tariffs to Limit Carbon Leakage and Promote Genuine Efficiency . . . . .	454
9.2.6	Adaptation—Incorporating Commitments in a New Global Protocol to Boost Adaptation Efforts . . . . .	465
9.2.7	Finance—Streamlining and Consolidating Climate Change Funding Arrangements . . . . .	469
9.3	The Distribution of Emissions Rights . . . . .	475

9.4 A Modified Architecture for a New (Post-2020) Climate Change Protocol . . . . .	481
Notes . . . . .	483
<b>10 A Post-2020 Protocol and Emissions-Trading Framework to Resolve the Climate Change Crisis . . . . .</b>	<b>491</b>
10.1 Introduction . . . . .	491
10.2 Fundamental Elements of a New Climate Change Protocol . . . .	492
10.2.1 Ecological Sustainability Requirements—Global Greenhouse Gas Emissions Targets . . . . .	493
10.2.2 Distributional Equity Requirements . . . . .	504
10.2.3 Allocative Efficiency Requirements . . . . .	530
10.3 Governance of a National Emissions-Trading System . . . . .	544
10.4 The Separation, Linking, and Gradual Merging of National Emissions-Trading Systems . . . . .	547
10.5 How Challenging Would It Be to Achieve the Greenhouse Gas Emissions Targets Recommended for the Post-2020 Protocol? . . . . .	550
10.6 Concluding Remarks . . . . .	553
Notes . . . . .	554
<b>Postscript—The UNFCCC Climate Change Conference in Lima, 2014 . . .</b>	<b>561</b>
