

Contents

Part I Properties and Functionalities of Natural Fibres and Structures

Fibre Science: Understanding How It Works and Speculating on Its Future	3
Mário de Araújo	
Wool in Human Health and Well-Being	19
Raechel Laing and Paul Swan	
Correlations Between the Physiochemical Characteristics of Plant Fibres and Their Mechanical Properties	35
Marie-Joo Le Guen, Roger H. Newman, Alan Fernyhough, Stefan J. Hill and Mark P. Staiger	
Influence of Stem Morphology and Fibres Stiffness on the Loading Stability of Flax	49
Alain Bourmaud, Marianne Gibaud, Anaële Lefeuvre, Claudine Morvan and Christophe Baley	
Young's Modulus of Plant Fibers	61
Patricia Jouannot-Chesney, Jean-Paul Jernot, Joël Bréard and Moussa Gomina	
Characterization of Brazil Nut Fibers	71
P.Y. Inamura, F.H. Kraide, M.J.A. Armelin, M.A. Scapin, E.A.B. Moura and N.L. Mastro	

Part II New, Functional and Nanodimensional Natural Fibres

Brazilian Buriti Palm Fiber (<i>Mauritia flexuosa</i> Mart.)	89
Ivete Maria Cattani and Júlia Baruque-Ramos	

Degradation of Dyes Using Plantain Fibers Modified with Nanoparticles	99
Yuliana Cadavid, Edith M. Cadena, Juan M. Velez and Juan F. Santa	
Removal of Crude Oil Using a New Natural Fibre—<i>Calotropis procera</i>	113
J.H.O. Nascimento, M.P.G. Coelho, A.P. Silva, K.K.O.S. Silva, A.R.L. dos Santos, C.F. Campos, J.P.S. Morais and R.L. Sivam	
Amazonian Tururi Palm Fiber Material (<i>Manicaria saccifera</i> Gaertn.)	127
Amanda Sousa Monteiro and Júlia Baruque-Ramos	
Nanoindentation Measurements of Jute/Poly Lactic Acid Composites	139
Vijay Baheti and Jiri Militky	
Biomedical Applications of Nanocellulose	155
Catarina Guise and Raul Figueiro	
Part III Natural Fibre Reinforced Polymeric Composites	
A Finite Element Analysis to Validate the Rule-of-Mixtures for the Prediction of the Young's Modulus of Composites with Non-circular Anisotropic Fibres	173
Amandeep Singh Virk, John Summerscales and Wayne Hall	
Effects of Water Ageing on the Mechanical Properties of Flax and Glass Fibre Composites: Degradation and Reversibility	183
Guilherme Apolinario, Patrick Ienny, Stéphane Corn, Romain Léger, Anne Bergeret and Jean-Marc Haudin	
Processing of Wet Preserved Natural Fibers with Injection Molding Compounding (IMC)	197
Hans-Jörg Gusovius, Gesine Wallot, Stefan Schierl, Roman Rinberg, Tobias Hartmann, Lothar Kroll and Ivonne Jahn	
Fluorination as an Effective Way to Reduce Natural Fibers Hydrophilicity	211
K. Charlet, F. Saulnier, D. Gautier, M. Pouzet, M. Dubois and A. Béakou	
DSC Analysis of In Situ Polymerized Poly(Butylene Terephthalate) Flax Fiber Reinforced Composites Produced by RTM	231
C.M. Romão, C.M. Pereira and J.L. Esteves	
Parametric Study on the Manufacturing of Biocomposite Materials	243
A. Rubio-López, A. Olmedo, A. Díaz-Álvarez and C. Santiuste	

The Mechanical Properties of Flax Fibre Reinforced Composites	255
Sevhan Muge Yukseloglu and Hurol Yoney	
Eco-friendly Flax Fibre/Epoxy Resin/Composite System for Surfboard Production	267
Aitor Hernandez Michelena, Jasper Graham-Jones, John Summerscales and Wayne Hall	
The Use of Cellulosic Fibers Wastes to Increase the Mechanical Behaviour of Biodegradable Composites for Automotive Interior Parts	279
N.C. Loureiro, J.L. Esteves and J.C. Viana	
Part IV Natural Fibre Reinforced Cementitious Composites	
Hemp Fibres—A Promising Reinforcement for Cementitious Materials	291
Ildiko Merta	
Tensile and Bond Characterization of Natural Fibers Embeeded in Inorganic Matrices	305
Bahman Ghiassi, Arezou Razavizadeh, Daniel V. Oliveira, Vera Marques and Paulo B. Lourenço	
Eco-Efficient Earthen Plasters: The Influence of the Addition of Natural Fibers	315
José Lima and Paulina Faria	
Part V Innovative Applications of Natural Fibres	
Poly Lactic Acid Fibre Based Biodegradable Stents and Their Functionalization Techniques	331
Rita Rebelo, Nívea Vila, Sohel Rana and Raul Figueiro	
Optimization of a Wood Plastic Composite to Produce a New Dynamic Shading System	343
G. Martins, F. Antunes, A. Mateus, S. Baptista and C. Malça	
Biodegradation of Wool Used for the Production of Innovative Geotextiles Designed to Erosion Control.	351
Jan Broda, Katarzyna Kobiela-Mendrek, Monika Rom, Joanna Grzybowska-Pietras, Stanisława Przybyło and Ryszard Laszczak	
Renewable Materials for Stab Resistance	363
Marcus O. Weber, Susanne Aumann, Malin Obermann and Andrea Ehrmann	

Hemp Fibre from Crops Grown on Reclaimed Land for the Production of Sanitary Mats.	371
Jerzy Mańkowski, Andrzej Kubacki, Jacek Kołodziej, Maria Mackiewicz-Talarczyk, Przemysław Baraniecki and Irena Pniewska	
Part VI Market, Opportunities, Recycling and Sustainability Aspects of Natural Fibres	
Natural Fibres and the World Economy.	381
Terry Townsend and José Sette	
Wool as an Heirloom: How Natural Fibres Can Reinvent Value in Terms of Money, Life-Span and Love	391
Ingun Grimstad Klepp, Tone Skårdal Tobiasson and Kirsi Laitala	
Hemp Cultivation Opportunities and Perspectives in Lithuania.	407
V. Jonaitienė, Z. Jankauskienė and I. Stuogė	
Review of Wool Recycling and Reuse.	415
Stephen Russell, Paul Swan, Mariell Trebowicz and Angus Ireland	
Brazilian Scope of Management and Recycling of Textile Wastes	429
Welton Fernando Zonatti, Júlia Baruque-Ramos and Wânia Duleba	
Cotton Dyeing with Extract from Renewable Agro Industrial Bio-resources: A Step Towards Sustainability.	441
Teresa Linhares and M.T. Pessoa de Amorim	
Erratum to: Review of Wool Recycling and Reuse	E1
Stephen Russell, Paul Swan, Mariell Trebowicz and Angus Ireland	
Index	455

Natural Fibres: Advances in Science and Technology

Towards Industrial Applications

From Science to Market

Fangueiro, R.; Rana, S. (Eds.)

2016, XI, 456 p. 254 illus., 179 illus. in color., Hardcover

ISBN: 978-94-017-7513-7
