

Contents

1	Introduction	1
1.1	Real-Life Applications of DAEs	1
1.1.1	Electrical Network Problems	2
1.1.2	Computational Fluid Dynamics Problems	2
1.1.3	Constrained Mechanical Problems	5
1.2	Why MOR for DAEs?	6
2	Differential-Algebraic Equations	9
2.1	What are DAEs?	9
2.2	Models for DAEs	10
2.2.1	State Space Representation	10
2.2.2	Transfer Matrix Representation	12
2.3	Linear Constant Coefficient DAEs	12
2.3.1	Solvability of DAEs	13
2.3.2	Stability of DAEs	14
2.3.3	Weierstraß-Kronecker Canonical Form	14
2.3.4	Transfer Matrix Representation of the Kronecker Form	18
3	Decoupling of Linear Constant DAEs	21
3.1	Decoupling of DAEs Using Matrix and Projector Chains	21
3.1.1	Construction of Canonical Projectors	24
3.2	Decoupling of DAEs Using Matrix, Projector and Basis Chains	25
3.2.1	Matrix Pencil $(\mathbf{E}, \mathbf{A})$ with Atleast One Finite Eigenvalue	25
3.2.2	Matrix Pencil $(\mathbf{E}, \mathbf{A})$ with Only Infinite Eigenvalue	29
3.3	Implicit Decoupling of DAEs Using Matrix, Projector and Basis Chains	45
3.4	Index-1 DAEs	46
3.5	Index-2 DAEs	47
3.5.1	Index-2 DAEs with a Finite Spectrum	47
3.5.2	Index-2 DAEs with Only Infinite Spectrum	48

3.6	Index-3 DAEs	49
3.6.1	Index-3 DAEs with a Finite Spectrum	49
3.6.2	Index-3 DAEs with Only Infinite Spectrum	50
3.7	Comparison of Decoupling Methods	55
3.8	Decoupled System for DAEs with Special Structures	56
3.9	Fast Construction of Matrix, Projectors and Basis Chain.	59
4	Index-aware Model Order Reduction	61
4.1	Index-aware Model Order Reduction (IMOR)	61
4.2	Implicit Index-aware Model Order Reduction (IIMOR).	64
4.2.1	Reduction of the Differential Part	65
4.2.2	Reduction of the Algebraic Part	65
4.3	Properties of the IMOR and IIMOR Methods	67
5	Large Scale Problems.	71
6	Conclusion.	83
	References	85

Index-aware Model Order Reduction Methods

Applications to Differential-Algebraic Equations

Banagaaya, N.; Ali, G.; Schilders, W.H.A.

2016, IX, 86 p. 25 illus., 6 illus. in color., Hardcover

ISBN: 978-94-6239-188-8
