

Contents

1	Lie Groupoids and Lie Algebroids	1
1.1	Groupoids and Lie Groupoids	1
1.2	Lie Algebroids.	7
1.3	The Lie Algebroid of a Lie Groupoid.	10
1.4	Projections on Lie Groupoids and Lie Algebroids	14
1.5	Pullbacks of Lie Groupoids and Lie Algebroids.	18
1.6	Lie Derivatives on Lie Algebroids	21
2	Connections on Lie Groupoids and Lie Algebroids	27
2.1	Path Connections on Lie Groupoids	27
2.2	Infinitesimal Connections on Lie Algebroids	35
2.3	Connections and Projectability.	41
2.4	The Kernel Derivative of an Infinitesimal Connection.	45
2.5	Covariant Algebroid Derivatives	48
2.6	Representations and Semidirect Sums.	49
2.7	Linearizing a Connection	52
3	Groupoids of Fibre Morphisms.	55
3.1	Lie Groupoids and Fibre Bundles.	55
3.2	Lie Algebroids and Fibre Bundles	59
3.3	Projectability of Bundle Structures	65
3.4	Connections on Fibre Morphism Groupoids and Algebroids . . .	71
3.5	The Comparison with Principal Bundles	74
4	Four Case Studies	77
4.1	Vector Bundles and Linear Maps.	77
4.2	Affine Bundles and Affine Maps	79
4.3	Interlude: Densities and Projective Structures.	85
4.4	Projective Bundles and Projective Maps	91
4.5	Vector Bundles, Fibre Metrics and Euclidean Maps	97

5	Symmetries	105
5.1	Bisections and Automorphisms	105
5.2	Symmetries of Connections	110
5.3	Infinitesimal Symmetries of Infinitesimal Connections	112
5.4	Properties of Infinitesimal Symmetries	116
5.5	Case Study: Affine Transformations	119
6	Cartan Geometries	127
6.1	Cartan Geometries as Fibre Morphism Groupoids	127
6.2	The Lie Algebroid of a Cartan Geometry	129
6.3	Lie Algebra Actions	132
6.4	Infinitesimal Cartan Geometries	136
6.5	Nondegeneracy and Soldering	139
6.6	Curvature and Torsion of an Infinitesimal Cartan Geometry	142
6.7	Symmetries of Cartan Geometries	144
6.8	Projectability of Cartan Geometries and Their Symmetries	147
7	A Comparison with Alternative Approaches	153
7.1	Cartan Gauge	153
7.2	The Bundle Definition	156
7.3	The Tractor Connection	159
7.4	The Blaom Connection	161
7.5	The Fundamental Self-Representation	165
7.6	Reconstructing a Cartan Geometry from an Adjoint Tractor Bundle	167
7.7	Locally Symmetric Geometries and Torsion	171
7.8	Comparisons Compared	175
8	Infinitesimal Cartan Geometries on TM	177
8.1	Affine Geometry	178
8.2	Projective Geometry	181
8.3	Riemannian Geometry	183
8.4	Conformal Geometry	185
8.5	The General Theory	189
9	Projective Geometry: The Full Version	197
9.1	Cartan Projective Geometry	197
9.2	The Two Versions Compared: Projective Equivalence	201
9.3	Linear Connections and Radius Vector Fields	206
9.4	Thomas-Whitehead Connections	209
9.5	Infinitesimal Symmetries of TW-Connections and Infinitesimal Cartan Projective Geometries	215
9.6	Infinitesimal Affine Transformations of a TW-Connection	218
9.7	The Projective Tractor Connections	221

10 Conformal Geometry: The Full Version 227

 10.1 The Möbius Group. 227

 10.2 The Generalized F -space. 231

 10.3 The Cartan Connection. 233

 10.4 The Conformal Tractor Connection 236

11 Developments and Geodesics 239

 11.1 Developments 239

 11.2 Vertical Infinitesimal Symmetries. 241

 11.3 Geodesics in Cartan Affine and Projective Geometry 243

 11.4 Generalized Geodesics 248

 11.5 Geodesic Sprays and Their Generalizations 250

12 Cartan Theory of Second-Order Differential Equations 257

 12.1 Affine Geometry over T^*M 257

 12.2 Cartan Affine Geometry over T^*M 259

 12.3 The Cartan–Berwald Geometry of a Spray 261

 12.4 The Generalized Geodesic Spray of a Spray 268

 12.5 Symmetries of a Cartan–Berwald Geometry 269

 12.6 Projective Equivalence of Sprays 272

 12.7 The Pullback Projective Bundle 274

 12.8 Connection and Curvature. 276

 12.9 BTW-Connections 279

Cartan Geometries and their Symmetries

A Lie Algebroid Approach

Crampin, M.; Saunders, D.

2016, XIV, 290 p., Hardcover

ISBN: 978-94-6239-191-8
