

Contents

1	Introduction	1
Part I Nonlinear Principal Component Analysis		
2	Nonlinear Principal Component Analysis	7
2.1	Principal Component Analysis	7
2.1.1	Eigen-Decomposition of $\mathbf{Y}^\top \mathbf{Y}/n$	8
2.1.2	Singular Value Decomposition of $\mathbf{Y}$	8
2.2	Quantification of Qualitative Data	9
2.3	Nonlinear PCA	10
2.3.1	Low-Rank Matrix Approximation	11
2.3.2	Homogeneity Analysis	11
2.3.3	Alternating Least Squares Algorithm for Nonlinear PCA	13
2.4	Example: Sleeping Bags	19
	References	20
3	Multiple Correspondence Analysis	21
3.1	Introduction	21
3.2	Formulation	22
3.3	Rank-Restricted MCA	23
3.4	Algorithm of Rank-Restricted MCA	24
3.5	Numerical Example	25
	References	28
Part II Applications and Related Topics		
4	Variable Selection in Nonlinear Principal Component Analysis	31
4.1	Introduction	31

4.2	Modified PCA for Mixed Measurement Level Data	32
4.2.1	An Overview of Modified PCA	32
4.2.2	Modified PCA for Mixed Measurement Level Data	34
4.3	Variable Selection in Nonlinear Modified PCA	34
4.3.1	Four Selection Procedures	34
4.3.2	Three Possible Types of Selection	37
4.4	Numerical Examples	38
	References	44
5	Sparse Multiple Correspondence Analysis	47
5.1	Introduction	47
5.2	Rotation	48
5.3	Sparse MCA	49
5.3.1	Q-Step	50
5.3.2	Z-Step	50
5.3.3	A-Step	51
5.4	Real Data Example	51
5.5	Discussion	55
	References	55
6	Joint Dimension Reduction and Clustering	57
6.1	Introduction	57
6.2	Simultaneous Analysis with MCA and k-Means	58
6.2.1	Hwang, Dillon and Takane's Method	58
6.2.2	Mitsuoka and Yadohisa's Method	59
6.3	Differences Between Hwang, Dillon and Takane's Method and Mitsuoka and Yadohisa's Method	61
6.4	Real Data Example	62
	References	63
7	Acceleration of Convergence of the Alternating Least Squares Algorithm for Nonlinear Principal Component Analysis	65
7.1	Brief Introduction to the ALS Algorithm for Nonlinear PCA	65
7.2	The Vector ε Algorithm	66
7.3	Acceleration of Convergence of the ALS Algorithm for Nonlinear PCA	67
7.4	Numerical Experiments	69
7.4.1	Convergence of the $V\varepsilon$ -ALS Algorithm Using Real Data	69
7.4.2	Speed of Convergence of the $V\varepsilon$ -ALS Algorithm Using Random Data	73
7.4.3	Application of the $V\varepsilon$ -ALS Algorithm to Variable Selection Problems	76
	References	78
	Index	79

Nonlinear Principal Component Analysis and Its
Applications

Mori, Y.; Kuroda, M.; Makino, N.

2016, X, 80 p. 17 illus., 8 illus. in color., Softcover

ISBN: 978-981-10-0157-4
