Contents

1 Holomorphic Functions 1
1.1 Holomorphic Functions of One Variable 1
1.2 Holomorphic Functions of Several Variables 6
1.2.1 Definitions 6
1.2.2 Montel's Theorem 11
1.2.3 Approximation Theorem 12
1.2.4 Analytic Continuation 13
1.2.5 Implicit Function Theorem 17
1.3 Sheaves 22
1.3.1 Definition of Sheaves 22
1.3.2 Presheaves 24
1.3.3 Examples of Sheaves 28

2 Oka's First Coherence Theorem 33
2.1 Weierstrass' Preparation Theorem 33
2.2 Local Rings 40
2.2.1 Preparations from Algebra 40
2.2.2 Properties of $\mathcal{O}_{n,a}$ 44
2.3 Analytic Subsets 47
2.4 Coherent Sheaves 49
2.5 Oka's First Coherence Theorem 54
Historical Supplements 61

3 Sheaf Cohomology 65
3.1 Exact Sequences 65
3.2 Tensor Product 67
3.2.1 Tensor Product 67
3.2.2 Tensor Product of Sheaves 68
3.3 Exact Sequences of Coherent Sheaves 70

3.4 Sheaf Cohomology . . . 74
3.4.1 Čech cohomology . . . 74
3.4.2 Long Exact Sequences . . . 80
3.4.3 Resolutions of Sheaves and Cohomology . . . 85
3.5 De Rham Cohomology . . . 91
3.5.1 Differential Forms and Exterior Products . . . 92
3.5.2 Real Domains . . . 93
3.5.3 Complex Domains . . . 97
3.6 Dolbeault Cohomology . . . 100
3.7 Cousin Problems . . . 106
3.7.1 Cousin I Problem . . . 106
3.7.2 Cousin II Problem . . . 107
Historical Supplements . . . 109

4 Holomorphically Convex Domains and the Oka–Cartan Fundamental Theorem . . . 111
4.1 Holomorphically Convex Domains . . . 111
4.2 Cartan's Merging Lemma . . . 115
4.3 Oka's Fundamental Lemma . . . 123
4.3.1 Steps of Proof . . . 123
4.3.2 Oka's Syzygies . . . 126
4.3.3 Oka's Fundamental Lemma . . . 129
4.4 Oka–Cartan Fundamental Theorem . . . 135
4.5 Oka–Cartan Fundamental Theorem on Stein Manifolds . . . 147
4.5.1 Complex Manifolds . . . 147
4.5.2 Complex Manifolds . . . 149
4.5.3 Stein Manifolds . . . 150
4.5.4 Influence on Other Fields . . . 152

5 Domains of Holomorphy . . . 155
5.1 Envelope of Holomorphy . . . 155
5.2 Reinhardt Domains . . . 160
5.3 Domains of Holomorphy and Holomorphically Convex Domains . . . 169
5.4 Domains of Holomorphy and Exhaustion Sequences . . . 175
5.5 Cousin Problems and Oka Principle . . . 183
5.5.1 Cousin I Problem . . . 183
5.5.2 Cousin II Problem . . . 185
5.5.3 Oka Principle . . . 189
5.5.4 Hermitian Holomorphic Line Bundles . . . 194
5.5.5 Stein's Example of Non-solvable Cousin II Distribution . . . 198
Historical Supplements . . . 201

6 Analytic Sets and Complex Spaces 203
6.1 Preparations 203
6.1.1 Algebraic Sets 203
6.1.2 Analytic Sets 205
6.1.3 Regular Points and Singular Points 206
6.1.4 Finite Maps 207
6.2 Germs of Analytic Sets 208
6.3 Prerequisite from Algebra 214
6.4 Ideals of Local Rings 217
6.5 Oka's Second Coherence Theorem 231
6.5.1 Geometric Ideal Sheaves 231
6.5.2 Singularity Sets 235
6.5.3 Hartogs' Extension Theorem 237
6.5.4 Coherent Sheaves over Analytic Sets 237
6.6 Irreducible Decompositions of Analytic Sets 239
6.7 Finite Holomorphic Maps 243
6.8 Continuation of Analytic Subsets 252
6.9 Complex Spaces 255
6.10 Normal Complex Spaces and Oka's Third Coherence Theorem 259
6.10.1 Normal Complex Space 259
6.10.2 Universal Denominators 262
6.10.3 Analyticity of Non-normal Points 266
6.10.4 Oka's Normalization and Third Coherence Theorem 268
6.11 Singularities of Normal Complex Spaces 271
6.11.1 Rank of Maximal Ideals 271
6.11.2 Higher Codimension of the Singularity Sets of Normal Complex Spaces 273
6.12 Stein Spaces and Oka–Cartan Fundamental Theorem 276
Historical Supplements 278

7 Pseudoconvex Domains and Oka's Theorem 281
7.1 Plurisubharmonic Functions 281
7.1.1 Subharmonic Functions 281
7.1.2 Plurisubharmonic Functions 293
7.2 Pseudoconvex Domains 301
7.3 L. Schwartz's Finiteness Theorem 306
7.3.1 Topological Vector Spaces 306
7.3.2 Fréchet Spaces 309
7.3.3 Banach's Open Mapping Theorem 311
7.3.4 L. Schwartz's Finiteness Theorem 313
7.4 Oka's Theorem 316

7.5 Oka's Theorem on Riemann Domains 323
7.5.1 Riemann Domains 323
7.5.2 Pseudoconvexity 326
7.5.3 Strongly Pseudoconvex Domains 332
Historical Supplements. 339

8 Cohomology of Coherent Sheaves and Kodaira's Embedding Theorem 343
8.1 Topology of the Space of Sections of a Coherent Sheaf 343
8.1.1 Domains of $\mathbf{C}^n$ 343
8.1.2 Complex Manifolds 348
8.1.3 Complex Spaces 349
8.2 Cartan–Serre Theorem 354
8.3 Positive Line Bundles and Hodge Manifolds 354
8.4 Grauert's Theorem 358
8.4.1 Strongly Pseudoconvex Domains 358
8.4.2 Positive Line Bundles. 359
8.5 Kodaira's Embedding Theorem 361

9 On Coherence 367

Erratum to: Analytic Function Theory of Several Variables E1
Junjiro Noguchi

Appendix: Kiyoshi Oka 375
