1	Basics	1
1.1	History	1
1.2	Statistics	2
1.3	Contents of Statistics	2
1.4	Data	3
1.5	Level of Measurement	5
1.6	Variable	6
1.7	Notation	8
2	Presentation of Statistical Data	11
2.1	Tabular Presentation	11
2.2	Graphical Presentation	17
2.2.1	Bar Charts	17
2.2.2	Pie Charts	17
2.2.3	Histogram	19
2.2.4	Frequency Polygon	19
2.2.5	Pareto Chart	19
2.2.6	Line Diagram	23
2.2.7	Frequency Curve	23
	References	27
3	Descriptive Statistics	29
3.1	Central Tendency	30
3.1.1	Mean	30
3.1.2	Median	38
3.1.3	Mode	40
3.1.4	Comparison of Mean, Median, and Mode	42
3.2	Measures of Dispersion	43
3.2.1	Range	44
3.2.2	Interquartile Range (IQR)	44
3.2.3	Mean Deviation	47
3.2.4	Variance	47

3.2.5	Standard Deviation	48
3.2.6	Coefficient of Variation	51
3.2.7	Stem-and-Leaf Diagram.	51
3.2.8	Other Measures of Dispersion	54
	Reference	58
4	Probability Theory	59
4.1	Probability Definition	60
4.2	Two Approaches in Calculating Probability	60
4.3	Axioms of Probability.	61
4.4	Probability in Mutually Exclusive Events	61
4.5	Probability in Independent Events	62
4.6	Probability in Dependent Events (Conditional/Unconditional Probability)	63
4.7	Probability in Non-mutually Exclusive Events	63
4.8	Probability and Number of Possible Samples	64
4.8.1	Sampling with Replacement.	64
4.8.2	Sampling Without Replacement (Order Important)	64
4.8.3	Sampling Without Replacement (Order Irrelevant)	65
5	Probability Distributions	69
5.1	Discrete Probability Distribution.	70
5.1.1	The Binomial Distribution	70
5.1.2	Multinomial Probability Distribution	72
5.1.3	Hypergeometric Distribution	74
5.1.4	Poisson Distribution	76
5.1.5	Important Features	78
5.2	Continuous Probability Distribution	78
5.3	The Normal Distribution	78
5.3.1	Properties/Characteristics of Normal Distribution	79
5.3.2	Some Examples	80
5.4	The t Distribution.	82
5.5	The F Distribution	84
5.6	The Chi-Square Distribution	86
5.7	Joint Probability Distribution	89
5.7.1	Discrete Joint Probability Distribution	89
5.7.2	Continuous Joint Probability Distribution.	90
5.8	Data Fitting to Probability Distribution	91
6	Statistical Inference	101
6.1	Parameter and Statistics.	101
6.2	Estimation.	102
6.3	Properties of Estimators	102
6.3.1	Unbiasedness	103
6.3.2	Efficiency	103

6.3.3	Sufficiency	103
6.3.4	Consistency	104
6.4	Central Limit Theorem	104
6.5	Some Examples in Estimation	105
6.6	Point Estimation.	106
6.7	Interval Estimation/Confidence Interval of the Mean of a Single Population	107
6.8	Confidence Interval of the Difference of Means of Two Normal Populations.	110
6.9	Confidence Interval of the Variance of a Normal Population	112
6.10	Confidence Interval of a Population Proportion	113
6.11	Confidence Interval of the Difference of Two Population Proportions	114
6.12	Finite Population Correction Factor	115
7	Hypothesis Testing	127
7.1	Introduction.	127
7.2	Test Procedure.	131
7.3	Hypothesis Testing—One Population Mean (Variance Known)	133
7.3.1	One-Tail Test.	133
7.3.2	Two-Tail Test	135
7.4	Hypothesis Testing—One Population Mean (Variance Unknown—Large Sample)	135
7.5	Hypothesis Testing—Equality of Two Population Means (Variance Known)	137
7.5.1	One-Tail Test.	137
7.5.2	Two-Tail Test	139
7.6	Hypothesis Testing—One Population Mean (Variance Unknown).	141
7.6.1	One-Tail Test.	141
7.6.2	Two-Tail Test	143
7.7	Hypothesis Testing—Equality of Two Population Means (Variance Unknown—Small Sample)	144
7.7.1	Situation 1: $\sigma_1^2 = \sigma_2^2 = \sigma^2$	145
7.7.2	Situation 2: $\sigma_1^2 \neq \sigma_2^2$	147
7.8	Testing of Hypothesis—Population Proportion	149
7.8.1	One Population Proportion.	150
7.8.2	Equality of Two Population Proportions	153
7.9	Power of Hypothesis Testing.	157
8	The Chi-Square Test	171
8.1	Goodness-of-Fit Test	171
8.2	Test of Independence	174

9	Nonparametric Test	183
9.1	The Sign Test	183
9.2	The Rank Test	189
9.2.1	The Wilcoxon Rank-Sum Test	190
9.2.2	The Spearman Rank Correlation	194
9.3	Nonparametric Method in Analysis of Variance	196
	Reference	201
10	Correlation	203
11	Simple Regression	215
11.1	Simple Linear Regression Model	215
11.2	Hypothesis Testing in Simple Linear Regression	218
11.3	Confidence Intervals of Parameters	220
11.4	Adequacy of the Regression Model	221
11.4.1	Residual Analysis to Test Uncorrelated Errors	221
11.4.2	Residual Analysis to Test Normality	222
11.4.3	Lack-of-Fit Test	222
11.5	Coefficient of Determination	224
11.6	Data Transformation	225
11.7	Interpretation of Simple Regression Model	227
12	Multiple Regression	233
12.1	Multiple Regression Model	233
12.2	Interpretation	235
12.3	Prediction	235
12.4	Use of Dummy Variables	236
12.5	Other Regression Models	236
	Reference	244
13	Sampling Theory	245
13.1	Advantages of Sampling	245
13.2	Considerations Prior to Sample Survey	246
13.3	Considerations in Sampling	247
13.4	Principal Steps Involved in the Choice of a Sample Size	248
13.5	Types of Commonly Used Sampling Methods	249
13.5.1	Simple Random Sampling	249
13.5.2	Systematic Sampling	253
13.5.3	Cluster Sampling	254
13.5.4	Stratified Random Sampling	255
14	Determination of Sample Size	257
14.1	Basic Principle	257
14.2	Sample Size in the Case of Random Sampling (Continuous Data)	258
14.3	Sample Size in Case of Simple Random Sampling (Proportion)	260

14.4	Sample Size in the Case of Stratified Sampling (Means)	262
14.4.1	Allocation of Equal Subsamples to All Strata	262
14.4.2	Proportional Allocation	264
14.4.3	Optimum Allocation	264
14.5	Sample Size in the Case of Stratified Sampling (Proportion).	267
14.6	Simple Cluster Sampling	270
15	Index Numbers	277
15.1	Priority	278
15.2	Satisfaction	282
15.3	Agreement.	286
15.4	Performance	288
15.5	Price Index	290
15.5.1	Laspeyres Price Index	291
15.5.2	Paasche Price Index	291
15.5.3	Fisher's Ideal Price Index	292
15.5.4	Quantity Index	292
15.5.5	Total Cost Index.	294
15.5.6	Cost of Living/Standard of Living Index	295
15.5.7	Inflation	298
16	Analysis of Financial Data	303
16.1	Financial Terms	303
16.2	Calculation of Net Present Values	305
16.3	Project Investment Data	306
16.4	Risk and Statistical Estimation of IRR	308
16.4.1	Risk	308
16.4.2	Statistical Estimation of IRR	309
16.5	Time Series Financial Data	311
16.5.1	Trend Analysis.	312
16.6	Models for Time Series Financial Data	313
16.6.1	Autoregressive Model	313
16.7	Forecasting	319
16.7.1	Forecasting Without a Model	319
16.7.2	Forecasting Using a Model	320
16.8	Seasonal Variation	321
	References	324
17	Experimental Design	325
17.1	Definition of Design of Experiments.	325
17.2	Terms Related to Experimental Design	326
17.3	Procedure for Design of Experiments	327
17.4	Types of Designs	329

17.5	Illustration of a Completely Randomized Design	330
17.6	Illustration of a 2^3 Full Factorial Design	333
17.7	Concept of Anova	335
17.7.1	Procedure in the Analysis	335
17.7.2	Test with ANOVA	336
17.8	Single Factor Experiments.	338
17.8.1	Analysis of Variance.	338
17.8.2	Tests on Individual Treatment Means	340
17.8.3	Estimation of Treatment for Completely Randomized Design	342
17.8.4	Multiple Factor Design	343
17.8.5	Example of a 2^3 Factorial Design	343
17.8.6	Randomized Block Design.	344
18	Statistical Quality Control	353
18.1	History	353
18.2	Areas of Statistical Quality Control	354
18.3	Variation.	354
18.4	Control Chart.	355
18.4.1	Type of Data for Control Chart	355
18.4.2	Types of Control Charts	355
18.4.3	Control Limits in Control Charts	356
18.4.4	Theoretical Basis of the Control Limits	356
18.4.5	Control Chart for X-Bar and R.	357
18.4.6	I Chart (Individual Observation Chart)	360
18.4.7	P Chart (Proportion Defective).	362
18.4.8	c Chart (Control Chart for Defects).	364
18.4.9	u Chart (Defects Per Unit).	366
18.4.10	np Control Chart	368
18.4.11	Control Chart Zones	371
18.4.12	Guide for Using Type of Control Chart.	372
18.4.13	Special Topics	373
18.4.14	Summary of Control Chart Formulas.	378
	References	384
19	Summary for Hypothesis Testing	385
19.1	Prerequisite	385
19.1.1	Variable	385
19.1.2	Hypothesis.	386
19.1.3	Hypothesis Testing	386
19.1.4	Measurement of Data	386
19.1.5	Objective.	386
19.1.6	Distributions	387
19.1.7	Sample Size.	387
19.1.8	Probability.	388

19.1.9	Data Collection	388
19.1.10	Graph for Initial Idea	388
19.1.11	Type of Test	388
19.1.12	Parameter and Statistics.	389
19.1.13	Model Fitting.	389
