Part I Location Theory of Retailing Industry

1 Market Areas of Retailers in Linear Space	3
1.1 Formation Mechanism of a Monopoly Retailer's Market.	3
1.1.1 Basic Assumptions	3
1.1.2 Formation of the Market Area and Derivation of the Retailer's Profit	4
1.1.3 Retailer's Price and Location in Limited Linear Space. . . .	7
1.2 Emergence of Competition and Competition Styles	9
1.2.1 Retailers' Situation Before the Emergence of Free-Entry Competition	9
1.2.2 Change of Retailers' Situation Due to a Reduction of Transportation Costs	9
1.2.3 Analysis of Competition Styles Between the Retailers . . .	10
1.3 Equilibrium Price and Market Size Established in Linear Markets	11
1.3.1 Equilibrium Prices and Market Sizes in Three Different Competition Styles.	11
1.3.2 The Mechanisms of a Changing Equilibrium by Competition Style.	12
1.3.3 Characteristics of the Established Market Situations.	13
2 Market Areas of Retailers in Plane Space	15
2.1 Shapes of Boundary Between Two Retailers' Market Areas	15
2.1.1 Derivation of the Shapes of Market Boundaries by Using Two Regular Cone Surfaces	15
2.1.2 Boundary Shape in the Case of the Same Prices and Transportation Costs	17
2.1.3 Boundary Shape in a Case of the Same Prices and Different Transport Costs	18
2.1.4 Boundary Shape in a Case of Different Prices and the Same Transportation Costs	18

2.1.5	Boundary Shape in a Case of Different Prices and Different Transportation Costs.	19
2.1.6	Boundary in a Case of the Same Retailers' Locations and Different Transportation Costs	20
2.1.7	Market Boundary Shapes Derived by a Method of Numerical Calculation	21
2.1.8	A Comment on the Market Boundary Analysis	22
2.2	Market Area in Spatial Free-Entry Equilibrium	22
2.2.1	Feasible Market Shapes in a Free-Entry Equilibrium	22
2.2.2	Market Shapes of Retailers in Free-Entry Competitive Equilibria	23
2.2.3	Shapes of Demand Curves in Retail Market Space	25
2.3	Effects of a Variety of Items on Retailers' Market Situations. . . .	30
2.3.1	Effects of the Variety of Items on the Boundary of Market Areas.	31
2.3.2	Effect of the Variety of Items on Retailers' Market Area Size	35
2.3.3	The Difference in Traction Powers at a Store and the Market Boundary	40
2.4	Effects of Freight Rate on Items and Market of a Shopping Center	41
2.4.1	Assumptions and Framework	42
2.4.2	The Number of Retailers and Market Area of a Shopping Center.	44
2.4.3	Change of the Number of Retailers at Centers Due to Decreasing Freight Rates	45
3	Market Analysis Using the Contact Price Curve	49
3.1	Derivation of Spatial Free-Entry Equilibria Using an Existing Method	49
3.1.1	Derivation of Lösch Equilibrium in Spatial Free-Entry Market Space	49
3.1.2	Derivation of the Greenhut-Ohta Equilibrium in a Spatial Free-Entry Market Space.	50
3.2	Analysis of Spatial Free-Entry Equilibria Using the Contact Price Curve.	51
3.2.1	Derivation of the Contact Price Curve	51
3.2.2	Analysis of Free-Entry Competitive Equilibria in a Plane Market Space.	52

Part II Location Theory of Manufacturing Industry

4 Change of a Factory's Production in Agglomeration	57
4.1 Formation of Industrial Agglomeration	57
4.2 The Relationship Between the Number of Factories and Agglomeration Economies	58
4.2.1 Internal and External Economies in an Agglomeration	58
4.2.2 Relationship Between the Number of Factories and Agglomeration Economies	59
4.2.3 Mechanism of Structural Changes of Production in Agglomeration	61
4.2.4 Reformation of Agglomerations Due to Fragmentation Production	62
4.3 Spatial Departure of Production Processes from Agglomeration.	63
4.3.1 Assumptions for the Analysis of a Factory's Production Function.	63
4.3.2 A Firm's Profits as Derived from Different Production Modes	64
5 Location Theory for a Factory in the Globalized World	69
5.1 Factory's Location in the Globalized World	69
5.2 Derivation of the Profit Function of a Firm.	70
5.2.1 Assumptions and Framework of the Analysis	70
5.2.2 Derivation of the Profit Function of Factory 1.	71
5.2.3 The Profit Functions of Factory 2 and the Firm.	73
5.3 Settlement of a Prospective Location	75
5.3.1 Usefulness of a Chaotic Phenomenon.	75
5.3.2 Formation of the Location Prospective Area	77
5.4 Firm's Profits and Revenues in Countries with Different Corporate Tax Rates	77
5.5 Location Power of the Corporate Tax and the Interest Rate.	78
5.5.1 Assumptions for the Examination of Location Power of Corporate Tax Rates	78
5.5.2 Location of the Factory When the Corporate Tax Rate Is Relatively High	79
5.5.3 Change of Position of LPA Due to a Reduction of the Corporate Tax Rate	79
5.5.4 Position of the LPA When the Corporate Tax Rate Is Relatively Low	81
5.5.5 Location Power of the Interest Rate of the Country	81

5.6	Effects on a Factory's Location in an Industrial Park and Industrial Complex	85
5.6.1	Locational Shift of a Factory Due to an Increasing Change of Production Efficiency	85
5.6.2	Relationship Between the Location of the Industrial Park and Production Efficiency	87
5.6.3	Industrial Complex Aiming to Reduce Fixed Costs and Its Location	91
5.6.4	Effects of Improving the Industrial Park and Industrial Complex on the Manufacturing Firm	93
5.6.5	Differences Between an Industrial Park and Industrial Complex in Location Policy Making	95

Part III Location Theory of City System

6	City Systems Built on the Basis of Economic Activity	99
6.1	City Systems Constructed on the Basis of Market Area Theory	100
6.1.1	City Systems by Traditional Market Area Theory	100
6.1.2	City System in a Spatial Competitive Market Space.	101
6.1.3	Change of a City System Due to a Reduction of Transportation Costs	103
6.2	City System Built by Using Cities' Production Functions	105
6.2.1	Assumptions and Framework	105
6.2.2	Change of Optimal Population Size Due to an Increase of a Region's Population	107
6.2.3	Changes of a City System Due to an Increase of the Region's Population	112
6.2.4	Population Distribution Within a City System in Sweden	115
6.3	Change of a City System in the Real World	116
6.3.1	Polarization of a City System by a Change in the Manufacturing Industry	117
6.3.2	Polarization of a City System by a Change of the Retail Industry	117
6.3.3	A Simple Test of the Hypothesis of a Polarized City System in a Country	118
6.3.4	Reduction of Medium Cities' Shares of Laborers and Population in 1990s.	118
6.3.5	Distributions of Economic Activity and Population in City Systems in Japan and Sweden	122
6.3.6	Results of the Inspection of the Hypothesis of Polarization of Population.	126

7 Analysis of a City System by Using Cities' Land Rents	127
7.1 Assumptions and Framework of the Analysis	127
7.2 Land Rent and Capital Amount in a City	130
7.2.1 Land Rent Distribution in a City Area	130
7.2.2 Capital Amount Used by Manufacturing Firms	130
7.3 Analysis of Land Rents and Production Amounts of Cities Within a City System	131
7.4 Influences of Changes in Freight Rates and Production Efficiency on Cities	133
7.4.1 Effect of a Decrease of Freight Rate in the Largest City on Land Rent and Production	133
7.4.2 Effects of Increasing Production Efficiency on Land Rent and Production	134
8 City System as a Location Factor	137
8.1 Role of a City System in a Firm's Location Decision-Making	137
8.2 Numerical Index of Characteristics of a City System	138
8.2.1 Derivation of the City System Index	138
8.2.2 Divergence of a City's Population Distribution Toward the Largest City	138
8.2.3 Spatial Convergence of Distribution of a City's Location in a Region	139
8.2.4 Derivation of the City System Index	139
8.2.5 City System Indexes of 47 Prefectures in Japan	140
8.3 Estimation of the Social Health of 47 Prefectures in Japan	140
8.4 Relationships Between the City System and a Prefecture's Performances	145
8.4.1 Relationship Between City Systems and Economic Performance of Regions	145
8.4.2 The Relationship Between City Systems and Welfare of Regions	145
8.4.3 No Relationship Between City Systems and the Education of Regions	146
8.4.4 Relationship Between City Systems and Social Health of Regions	146
8.5 City System as a Location Factor	147
Appendix: Elements of the Seven Items Composing Social Health	148
