## Part I Link Level Simulations and Experiments

<b>1</b>	<b>Link Level Simulation Basics</b>	3
1.1	Some Basics on Wireless Channels and Notations	3
1.2	OFDM Basics	4
1.3	Advanced Features: ICI Modeling	9
1.3.1	Analytical Model	10
1.3.2	Extension to MIMO Transmissions	11
1.3.3	Performance Evaluation	12
1.4	LTE in a Nutshell	14
1.5	Input–Output Relationship of a Cellular User	15
1.6	Instantaneous Post-equalization SINR	19
	References	20
<b>2</b>	<b>Downlink Synchronization</b>	21
2.1	Introduction	21
2.2	Evaluation Model	23
2.3	Mean Square Error of Carrier Frequency Offset Estimation	24
2.4	Signal to Interference and Noise Ratio Modeling	27
2.5	Bit Interleaved Coded Modulation Capacity	29
2.6	Numerical Results	31
2.6.1	Mean Square Error	31
2.6.2	Post-equalization Signal to Interference and Noise Ratio	32
2.6.3	Average Spectral Efficiency	32
2.6.4	Coded Throughput Loss	34
2.7	Conclusion	36
	References	37
<b>3</b>	<b>Symbol Detection in High Speed Channels</b>	39
3.1	Introduction	39
3.2	OFDM in High Speed Channels	40

3.3	Closed-Form BEP Expression for One-Tap Equalizer . . . . .	43
3.4	Time-Variant Channel Estimation and ICI Mitigation . . . . .	48
3.5	Simulations and Measurements . . . . .	52
	References . . . . .	58
<b>4</b>	<b>Optimal Pilot Pattern for Downlink Transmissions . . . . .</b>	<b>61</b>
4.1	Introduction . . . . .	61
4.2	Least Squares Channel Estimation . . . . .	62
4.3	Linear Minimum Mean Square Error Channel Estimation . . . . .	67
4.4	Optimal Power Allocation . . . . .	69
4.4.1	Simulation Results . . . . .	72
4.5	Optimal Pilot Patterns . . . . .	74
4.5.1	Unit Pilot Power . . . . .	75
4.5.2	Optimal Pilot Power . . . . .	77
4.6	Adaptive Pilot Sets . . . . .	79
4.6.1	Simulation Results . . . . .	80
	References . . . . .	82
<b>5</b>	<b>Single User MIMO LTE Transmission with Quantized Feedback . . . . .</b>	<b>85</b>
5.1	Principles of Link Adaptation and Linear Precoding . . . . .	87
5.1.1	Link Adaptation . . . . .	87
5.1.2	Linear Precoding for Single User Multiple-Input Multiple-Output . . . . .	89
5.2	Implicit CSI Feedback Algorithms . . . . .	93
5.2.1	Feedback Clustering . . . . .	93
5.2.2	Feedback Selection Algorithm . . . . .	95
5.2.3	Approximate Sequential Solution . . . . .	98
5.2.4	Antenna Subset Selection for DASs . . . . .	100
5.3	Performance Investigation . . . . .	101
5.3.1	Comparison of LTE to Theoretical Throughput Bounds . . . . .	102
5.3.2	Evaluation of the Feedback Algorithms . . . . .	104
5.3.3	Impact of CSI Feedback Granularity . . . . .	108
5.4	Summary . . . . .	110
	References . . . . .	111
<b>6</b>	<b>Multi User and Multi Cell Simulations . . . . .</b>	<b>115</b>
6.1	Zero-Forcing and Block-Diagonalization Precoding . . . . .	117
6.1.1	Transmit Strategy . . . . .	117
6.1.2	Limited Feedback Model . . . . .	120
6.2	Explicit CSI Feedback Algorithms . . . . .	122
6.2.1	Memoryless Grassmannian Quantization . . . . .	123
6.2.2	Predictive Grassmannian Quantization . . . . .	124
6.2.3	Evaluation of the Quantization MSE . . . . .	136
	References . . . . .	139

<b>7</b>	<b>Advanced Multi User MIMO Concepts</b>	143
7.1	Extension to Systems with Excess Antennas	143
7.1.1	Summary of Previous Results	144
7.1.2	Subspace Quantization Based Combining	146
7.1.3	Maximum Eigenmode Transmission	153
7.1.4	Achievable Rate Comparison of SQBC and MET	155
7.1.5	Adjustment of the Grassmannian CSI Feedback	158
7.2	Extension to Frequency-Selective Systems	159
7.2.1	Grassmannian Interpolation and Clustering	160
7.2.2	Channel Quality Feedback and Multi-user Scheduling	165
7.2.3	Performance Investigation	168
	References	175
<b>8</b>	<b>LTE-Advanced Uplink Transmissions</b>	177
8.1	LTE-Specific System Model and Post-equalization SINR	178
8.1.1	Post-spreading SINR in SC-FDM Transmissions	180
8.1.2	Post-equalization SINR in OFDM Transmissions	181
8.2	SC-FDM Features	182
8.2.1	Peak to Average Power Ratio	182
8.2.2	BER Comparison Over Frequency Selective Channels	183
8.3	Throughput Performance with Link Adaptation	185
8.3.1	Optimal Rate Adaptation	186
8.3.2	Realistic Link Adaptation	189
8.4	Reference Symbols	192
8.5	Channel Estimation	193
8.5.1	Minimum Mean Square Error Estimation	194
8.5.2	Correlation Based Estimation	195
8.5.3	MSE and BER Comparison	199
	References	200
<b>9</b>	<b>Link Level Measurements</b>	203
9.1	Introduction	203
9.2	The Vienna MIMO Testbed	204
9.3	Evaluation of LTE MIMO Downlink Transmissions	206
9.3.1	Physical Layer Throughput	209
9.3.2	Channel Capacity	211
9.4	Measurements at High Velocities	213
9.4.1	Measurement Setup and Methodology	214
9.4.2	LTE Uplink Fast Fading Channel Interpolation	215
	References	221

## Part II System Level Simulations

<b>10 Basic System Level Simulations and Advanced Features</b>	227
10.1 Survey on Existing Simulation Tools	227
10.2 The Vienna LTE-A Downlink System Level Simulator	228
10.3 Physical Layer Modeling	228
10.4 Link-to-System Mapping	229
10.5 Advanced Features: Runtime Precoding	231
10.5.1 Relevance	231
10.5.2 Implementation	232
10.5.3 Performance Evaluation	233
10.6 Advanced Features: 3D Channel Modeling	236
10.6.1 Introduction	236
10.6.2 3GPP 3D Channel Model	238
10.6.3 Implementation on System-Level	241
10.6.4 Calibration	244
10.6.5 Opportunities	246
References	248
<b>11 Modeling Regular Aggregate Interference by Symmetric Structures</b>	251
11.1 Preliminaries on the Gamma Distribution	252
11.2 Hexagonal Reference Model	253
11.3 Circular Interference Model	254
11.3.1 Proposed Model	255
11.3.2 The Dual Model	255
11.4 Statistics of Aggregate Interference	256
11.4.1 Interference Statistics at the Center	256
11.4.2 Interference Statistics Outside the Center	257
11.5 Numerical Results and Discussion	258
11.5.1 Validation of Expected Aggregate Interference	258
11.5.2 Validation of Gamma Approximation	260
11.6 Application in Heterogeneous Networks	262
11.7 LTE-Advanced System Level Simulations	265
11.7.1 System Model	266
11.7.2 Validation of Gamma Approximation	267
11.8 Conclusion	269
References	270
<b>12 Modeling Asymmetric Aggregate Interference by Symmetric Structures</b>	273
12.1 Circular Interference Model	274
12.2 Distribution of the Sum of Gamma Random Variables	278
12.2.1 Proposed Finite Sum Representation	278
12.2.2 Application in Circular Interference Model	279

12.3	Mapping Scheme for Stochastic Network Deployments . . . . .	280
12.3.1	Mapping Procedure . . . . .	280
12.3.2	Performance Evaluation of Homogeneous Base Station Deployments . . . . .	282
12.3.3	Performance Evaluation of Heterogeneous Base Station Deployments . . . . .	283
12.4	Interference and Rate at Eccentric User Locations . . . . .	285
12.4.1	Generic Circularly Symmetric Scenario . . . . .	285
12.4.2	Components of Asymmetric Interference . . . . .	286
12.4.3	Transmitter Collaboration Schemes . . . . .	287
12.5	LTE-Advanced System Level Simulations . . . . .	291
	References . . . . .	294
<b>13</b>	<b>Analysis of Urban Two-Tier Heterogeneous Cellular Networks . . .</b>	<b>297</b>
13.1	Preliminaries . . . . .	298
13.1.1	Random Shape Theory . . . . .	298
13.1.2	Indoor Coverage Ratio . . . . .	299
13.2	System Model . . . . .	300
13.2.1	Topology Model for Urban Environments . . . . .	300
13.2.2	Network Deployment . . . . .	300
13.2.3	User Association . . . . .	301
13.2.4	Virtual Building Approximation . . . . .	302
13.2.5	Signal Propagation . . . . .	303
13.3	Performance Analysis . . . . .	304
13.3.1	Typical Building with Small Cell Base Station . . . . .	304
13.3.2	Typical Building Without Small Cell Base Station . . . . .	305
13.3.3	Typical Indoor User . . . . .	306
13.4	Numerical Evaluation . . . . .	306
13.5	LOS- and NLOS Macro Base Stations . . . . .	308
13.5.1	Distance Distributions of Associated Macro Base Stations . . . . .	308
13.5.2	SINR and Coverage Analysis . . . . .	310
13.5.3	Numerical Evaluation . . . . .	312
13.6	Conclusion . . . . .	314
	References . . . . .	315
<b>14</b>	<b>Simulation of Two-Tier Heterogeneous Cellular Networks . . . . .</b>	<b>319</b>
14.1	System Model . . . . .	319
14.2	Urban Two-Tier Heterogeneous Cellular Network . . . . .	322
14.3	User Hot Spot Scenarios . . . . .	325
14.4	Sensitivity on Femtocell Deployment Density and -Isolation . . .	327
	References . . . . .	331

<b>15</b>	<b>Advanced System Level Applications</b>	335
15.1	Modeling Train Transmissions	335
15.1.1	Performance of Remote Unit Collaboration Schemes	336
15.1.2	Comparison of Relay-Based and Direct Communication	342
15.2	Evolved Multimedia Broadcast Multicast Service	345
15.2.1	Latency Evaluation	348
15.2.2	Network Utilization	348
15.2.3	CQI Adaptation	349
15.2.4	Performance Evaluation	349
15.2.5	Bandwidth Scaling	350
15.2.6	Conclusion	353
