<b>1</b>	<b>Model-Based Engineering of Runtime Reconfigurable Networked Embedded Systems</b>	<b>1</b>
	Coen van Leeuwen, Yolanda Rieter-Barrell, Zoltan Papp, Andrei Pruteanu and Teus Vogel	
1.1	Introduction	2
1.2	Multi-aspect Modeling for Networked Embedded Systems	3
1.2.1	Related Work	3
1.2.2	System Models	4
1.2.3	Multi-aspect Modeling	6
1.2.4	The Task Aspect	7
1.2.5	The Behavioral Aspect	10
1.2.6	The Physical Aspect	11
1.2.7	The Mapping Aspect	13
1.2.8	Conclusions	14
1.3	Model-Based Derivation of Key Performance Indicators	14
1.3.1	Deriving the Key Performance Indicators	15
1.3.2	Conclusions	19
1.4	Modeling of Runtime Reconfiguration	20
1.4.1	Model Based Design for Reconfiguration	21
1.4.2	Reconfiguration Types and Basic Architectures	22
1.4.3	Modeling of Runtime Reconfigurable NESs	24
1.4.4	Conclusions	27
1.5	Conclusions	27
	References	28
<b>2</b>	<b>Designing Reconfigurable Systems: Methodology and Guidelines</b>	<b>29</b>
	Zoltan Papp, Raul del Toro Matamoros, Coen van Leeuwen, Julio de Oliveira Filho, Andrei Pruteanu and Přemysl Šůcha	

2.1	Introduction: Why Design for Runtime Reconfiguration? . . . . .	30
2.1.1	Reasons for Reconfiguration . . . . .	30
2.2	The Design Time Versus Runtime Optimization Trade-Off . . . . .	32
2.3	Design Patterns for Reconfigurable Real-Time Monitoring and Control . . . . .	36
2.3.1	Formalizing the Reconfiguration Functionality . . . . .	39
2.3.2	Task Models for Runtime Reconfiguration . . . . .	41
2.4	Design Space Exploration for Runtime Reconfiguration . . . . .	47
2.4.1	A Quick Survey on Design Space Exploration and Design Decision Making . . . . .	48
2.5	A Systems Engineering Process for Runtime Reconfigurable NESs . . . . .	58
2.5.1	Related Work . . . . .	59
2.5.2	The Customized Design Process . . . . .	61
2.5.3	Managing Runtime Reconfiguration . . . . .	65
2.6	Conclusions . . . . .	66
	References . . . . .	67
