

Contents

1 Sufficiency and Completeness	1
1.1 Introduction	1
1.2 Sufficient Statistics	3
1.3 Minimal Sufficiency	13
1.4 Ancillary Statistics	20
1.5 Completeness	21
1.6 Exponential Class Representation: Exponential Family	31
1.7 Exercise 1	34
References	37
2 Unbiased Estimation	39
2.1 Unbiased Estimates and Mean Square Error	39
2.2 Unbiasedness and Sufficiency	47
2.3 UMVUE in Nonexponential Families	75
2.4 Exercise 2	101
References	107
3 Moment and Maximum Likelihood Estimators	109
3.1 Method of Moments	109
3.2 Method of Maximum Likelihood	112
3.3 MLE in Censored Samples	138
3.4 Newton–Raphson Method	141
3.5 Exercise 3	147
References	150
4 Bound for the Variance	153
4.1 Cramme–Rao Lower Bound	153
4.2 Bhattacharya Bound	169
4.3 Chapman–Robbins–Kiefer Bound	181
4.4 Exercise 4	193
References	195

5	Consistent Estimator	197
5.1	Prerequisite Theorems	197
5.2	Definition and Examples	200
5.3	Consistent Estimator for Multiparameter	207
5.4	Selection Between Consistent Estimators	210
5.5	Determination of n_0	213
5.6	Exercise 5	224
	References	225
6	Bayes Estimator	227
6.1	Bayes Theorem	228
6.2	Bayes Theorem for Random Variables	230
6.3	Bayesian Decision Theory	230
6.4	Limit Superior and Limit Inferior	237
6.5	Exercise 6	255
	References	259
7	Most Powerful Test	261
7.1	Type-1 and Type-2 Errors	261
7.2	Best Critical Region	275
7.3	P-Value	283
7.4	Illustrative Examples on the MP Test	285
7.5	Families with Monotone Likelihood Ratio	320
7.6	Exercise 7	337
	References	344
8	Unbiased and Other Tests	345
8.1	Generalized NP Lemma and UMPU Test	345
8.2	Locally Most Powerful Test (LMPT)	367
8.3	Similar Test	375
8.4	Neyman Structure Tests	378
8.5	Likelihood Ratio Tests	397
8.6	Exercise 8	418
	References	420
	Index	421

Examples in Parametric Inference with R

Dixit, U.J.

2016, LVIII, 423 p. 26 illus., Hardcover

ISBN: 978-981-10-0888-7
