

Contents

1	Introduction	1
1.1	Objectives	1
1.2	Highlights of the Book	1
1.3	Organisation of the Book	2
2	Embedded Intruder System	5
2.1	Requirements and Assumptions	6
2.2	Hardware Design	7
2.3	Software Design	14
2.4	System Program	19
3	Mechatronics	27
3.1	Liquid Level Control	27
3.2	Oscillating Planar	29
3.3	Conveyor Inspection Using Shift Registers	34
3.4	Modern Speed Control	35
4	Microcontroller	39
4.1	Basic I/O Modules	39
4.2	LCD and Keypad	44
4.3	Waveform Timings	58
4.4	Pressure Sensing	65
4.5	Temperature Measurement	67
4.6	Stepper Motor Control	67
4.7	Serial Communications	76
5	Electronics Control	79
5.1	Servo Motor Control	79
5.2	Square Wave Generator	80
5.3	PID Controller	83
5.4	Control of an Electro-pneumatic Mechanism	87

6	Electrical System	91
6.1	Elevator Control	91
6.2	Programmable Logic Controller	91
6.3	Ladder Diagram Control Structures	91
6.3.1	Part 1:- Indicating Lights	93
6.3.2	Part 2:- Lift Door Open/Close	94
6.3.3	Part 3:- Lift Up/Down	96
6.4	Safety Control Features.	98
7	Power Flow	101
7.1	Power System Analysis	101
7.2	Newton Raphson Formulation	101
7.3	Load Flow Analysis Using Newton Raphson.	104
8	Process Control	115
8.1	Water Tank Control System	115
8.1.1	First-Order Derivation.	115
8.2	Single Tank Control.	118
9	Machine Learning	121
9.1	Neural Network in Process Control	121
9.2	The Artificial Neurons	122
9.3	Techniques Involved in the Controllers.	123
9.4	NN Learning Rules	124
9.5	Selection of the Learning Algorithms	126
9.6	The Network Topology.	129
9.7	MLP Backpropagation Network for Process Control.	130
9.8	Chemical Plant NN Feedback Control System	133
9.8.1	Process Design	134
9.8.2	Process Verification	135
9.8.3	Process Improvement	137
9.9	Remote Operated Neural Network Control Plant	138
9.9.1	Field Instrumentations.	138
9.9.2	Scaling and Conversions.	139
9.9.3	Control Valves	140
9.9.4	Wireless Transmissions.	140
9.10	Valves and Chemical Plant Tunings	142
9.10.1	Desired Chemical Mixture, Samples and NN Data	142
9.10.2	Chemical and Valves Calibration	142
9.10.3	Trial Test in Actual Plant	143
9.11	Computerized Neural Network Control System	144
9.11.1	NN Real Time Control Plant	144
9.11.2	Neural Network Control Valves.	145
9.11.3	Intelligent Advisor	148

10 Computer Vision 153

10.1 Image Thresholding 153

10.2 Zhang-Suen Thinning Algorithm 154

10.3 Brief Descriptions of the Program Algorithms 154

10.4 Image Results 161

Appendix A: MC68HC11 Registers 167

Appendix B: MCU Port Testers. 169

Appendix C: LCD References 173

References 177

Index 179

Real Time Control Engineering

Systems And Automation

Tian Seng, N.

2016, XXIII, 181 p. 95 illus., 26 illus. in color., Hardcover

ISBN: 978-981-10-1508-3
