

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	General Background	1
1.2	Zones of Protection	2
1.3	Requirements of Protection System	3
1.4	Main and Back-up Protection	4
1.5	Protective Relays	4
1.5.1	Electromechanical Relays	5
1.5.2	Static Relays	5
1.5.3	Digital/Numerical Relays	5
1.6	Adaptive Relaying	6
1.7	Research Opportunities in Digital/Numerical Protection of Transmission Lines	7
1.7.1	High Resistance Ground Faults on Single Infeed Transmission Lines	7
1.7.2	High Resistance Ground Faults on Double Infeed Transmission Lines	8
1.7.3	Simultaneous Open Conductor and Ground Fault on Parallel Transmission Lines	8
1.7.4	Inter-circuit Faults on Parallel Transmission Lines	9
1.7.5	Simultaneous Open Conductor and Ground Fault on Series Compensated Parallel Transmission Lines	9
1.7.6	Inter-circuit Faults on Series Compensated Parallel Transmission Lines	10
1.7.7	Phase Faults on Series Compensated Double Infeed Transmission Lines	10
1.8	Objectives of Present Work	11
1.9	Organization of Thesis	11
	References	13

<b>2</b>	<b>Distance Relaying Algorithm for a Single Line-To-Ground Fault on Single Infeed Transmission Lines</b>	<b>17</b>
2.1	Introduction	17
2.2	Distance Protection of Transmission Lines	18
2.3	Stepped Distance Characteristic of a Distance Relay	19
2.4	Problem of Fault Resistance in Distance Protection	20
2.5	Techniques Used in Commercial Relays and Their Problems	21
2.6	Current State of the Art	22
2.7	Performance of the Conventional Digital Distance Relay	23
2.8	New Digital Distance Relaying Algorithm	25
2.9	Experimental Test Setup	27
2.9.1	Development of Experimental Test Setup	28
2.9.2	Results of Test Setup	30
2.10	Simulation Results	31
2.10.1	High Resistance Faults	31
2.10.2	Sensitivity During Close-in Faults	33
2.10.3	Discrimination Between In-Zone and Out-Zone Faults	34
2.10.4	Effect of Variations in Short-Circuit Capacity of Source	35
2.10.5	Effect of Change in Power Factor	36
2.11	Advantages of the Proposed Algorithm	37
2.12	Conclusion	37
	References	37
<b>3</b>	<b>Digital Distance Relaying Scheme for Compensation of High Resistance Faults on Double Infeed Transmission Lines</b>	<b>41</b>
3.1	Introduction	41
3.2	Ground Faults on Double Infeed Transmission Lines	42
3.3	Problem of Remote Infeed for Double Infeed Transmission Lines	43
3.4	Techniques Used in Commercial Relays and Their Problems	44
3.5	Current State of the Art	46
3.6	Analysis of Ground Faults on Double Infeed Transmission Lines	47
3.6.1	Impedance Measured by the Conventional Ground Distance Relaying Scheme	48
3.6.2	Impedance Measured by the Proposed Scheme	48
3.7	Results and Discussions	51
3.7.1	Single Line-to-Ground Fault	52
3.7.2	Double Line-to-Ground Fault	57
3.7.3	Triple Line-to-Ground Fault	58
3.7.4	Simultaneous Open Conductor and Ground Fault	58

3.8	Conclusion . . . . .	60
	References . . . . .	60
