

Contents

1 Storm Water Treatment	1
1.1 Overview	1
1.2 Common Structural Treatment Measures	3
1.2.1 Gross Pollutant Traps	3
1.2.2 Vegetated Swales/Bioretention Swales	3
1.2.3 Detention/Retention Basins	6
1.2.4 Infiltration Systems	6
1.2.5 Bioretention Basins	8
1.2.6 Constructed Wetlands	10
1.3 Summary	12
References.	13
2 Creating Conceptual Models of Treatment Systems	15
2.1 Background	15
2.2 Study Sites	16
2.3 Conceptual Model for a Bioretention Basin	18
2.3.1 Description of the Bioretention Basin	18
2.3.2 Model Set-up	18
2.3.3 Model Calibration	25
2.3.4 Generating Hydraulic Factors from the Model	26
2.4 Conceptual Model for a Constructed Wetland	27
2.4.1 Description of the Constructed Wetland	27
2.4.2 Model Set-up	28
2.4.3 Model Calibration	36
2.4.4 Generating Hydraulic Factors from the Model	36
2.5 Summary	37
References.	38
3 Assessing Bioretention Basin Treatment Performance	39
3.1 Background	39
3.2 Hydrologic/Hydraulic Factors Selection	40

3.3 Relationship Between Water Quality Treatment and Hydrologic/Hydraulic Factors	43
3.4 Analysis of Water Quality Treatment Performance	45
3.5 Conclusions	47
References.	47
4 Assessing Constructed Wetland Treatment Performance	49
4.1 Background	49
4.2 Selection of Hydrologic/Hydraulic Factors and Determination of Section Parameters	50
4.2.1 Selection of Hydrologic/Hydraulic Factors	50
4.2.2 Determination of Section Parameters.	50
4.3 Preliminary Investigation	52
4.4 Analysis of Different Rainfall Hydrograph Sectors	53
4.5 Comparison of Treatment Characteristics for Different Sectors of the Inflow Runoff Hydrograph	54
4.6 Relationships Between Hydrologic/Hydraulic Factors and Treatment Performance	56
4.7 Conclusions	61
References.	61
5 Implications for Engineering Practice	63
5.1 Background	63
5.2 Application to Engineering Practice	64
5.2.1 Bioretention Basins	64
5.2.2 Constructed Wetlands	65
5.3 Knowledge Gaps for Future Research	66
5.3.1 Investigation of the Removal of Other Common Storm Water Pollutants	66
5.3.2 Investigating Other Typical Storm Water Treatment Systems.	67
5.3.3 Laboratory Scale Models to Investigate Relationship Between Hydraulic Factors and Water Quality Treatment Performance	67
References.	68
Appendix A: Generating Wetland Volume Versus Depth Correlation Model.	69
Appendix B: Data Analysis Techniques.	73
Index	79

Enhancing the Storm Water Treatment Performance of
Constructed Wetlands and Bioretention Basins

Mangangka, I.R.; Liu, A.; Goonetilleke, A.; Egodawatta,
P.

2016, VIII, 80 p. 30 illus., 26 illus. in color., Softcover

ISBN: 978-981-10-1659-2
