1	Introduction	1
	References.	2
2	Magnetism	5
2.1	Origin of Magnetism	5
2.2	Types of Magnetism in Materials	7
2.2.1	Diamagnetism	7
2.2.2	Paramagnetism.	7
2.2.3	Ferromagnetism	8
2.2.4	Antiferromagnetism	9
2.2.5	Ferrimagnetism	9
2.2.6	Superparamagnetism	11
	References.	12
3	Magnetorheological (MR) Fluids	13
3.1	Introduction to MR Fluids	13
3.2	Dispersed Phase (Magnetizable Particles)	14
3.2.1	Magnetic Behavior	15
3.2.2	Magnetizable Particle Size.	16
3.2.3	Magnetizable Particles Volume Fraction	21
3.2.4	Magnetizable Particle Shape	24
3.2.5	Magnetizable Particle Density	30
3.2.6	Magnetizable Particle Materials Type	34
3.2.7	Preparation of Magnetizable Nanoparticles	37
3.3	Base Fluid	39
3.4	Surfactant Additives	41
	References.	44

4	Models and Modes in MR Fluids	51
4.1	Relevance Models Between Shear Rate and Shear Stress in MR Fluids	51
4.1.1	Bingham Fluid Model	53
4.1.2	Herschel–Bulkley Fluid	55
4.1.3	Power Law Model	57
4.1.4	Casson Model	58
4.2	MR Fluid Modes	62
4.2.1	Valve Mode (Fixed Plate Mode)	62
4.2.2	Shear Mode (Clutch Mode)	63
4.2.3	Squeeze Mode (Compression Mode)	63
	References	64
5	Magnetorheological Fluid Applications	67
5.1	Damper	68
5.1.1	Dampers in the Flow Mode	68
5.1.2	Dampers in the Shear Mode	70
5.1.3	Dampers in the Squeeze Mode	70
5.2	Brakes	70
5.3	MR Clutch	72
5.4	Hydraulic Valves	74
5.5	Polishing Devices	75
5.6	Seals	77
	References	79
6	Temperature Dependence of Magnetorheological Fluids and Their Components	83
6.1	Temperature Dependence of the MRF Components	83
6.1.1	Effects of Temperature on the Magnetization Behaviors of the Magnetic Particles	83
6.1.2	Effect of Temperature on the Carrier Fluids	86
6.2	Temperature Dependence of Magnetorheological Fluids	88
	References	93
7	Electrorheological (ER) Fluids	95
7.1	Background of ER Fluids	95
7.2	Proposed Mechanisms	97
7.3	Forces Relevant to Electrorheology	98
7.3.1	Hydrodynamic Forces	98
7.3.2	Colloidal Forces	99
7.3.3	Short-Range Repulsive Forces	99
7.3.4	Brownian Forces	100
7.3.5	Electrostatic Forces	101
7.3.6	Adhesion Due to Water Bridges	104
	References	105

8	A Yield Stress Scaling Function for ER Fluids	109
	References.	112
9	Ferrofluids	115
9.1	Ferrofluid Properties	116
9.2	Application of Ferrofluid	117
9.2.1	Magnetic Fluids Tackle Tough-Sealing Jobs	117
9.2.2	D'Arsonval Galvanometer in Ferrofluid Technology	118
9.2.3	Ferrofluid Sensor	119
	References.	119
10	Preparation of Magnetic Nanoparticle	121
10.1	Examples of Magnetizable Particle Used in Ferrofluids	121
10.2	Preparation of Magnetic Nanoparticle	122
10.2.1	Milling Method	122
10.2.2	Co-precipitation Method	123
10.2.3	Sun's Method	124
10.2.4	Sol-Gel Method	124
10.2.5	Solvothermal Method	124
10.2.6	Chemical Precursor Method	125
	References.	125
11	Insight into the Field Responsive Fluids	127
11.1	Comparison of Some of the Properties Between the Field Responsive Fluids.	127
11.1.1	MR Fluids Versus Ferrofluids	127
11.1.2	MR Fluids Versus ER Fluids	128
11.2	Mechanism of Chain Formation in Nanofluid-Based MR Fluid	130
	References.	134
12	Summary	135

Field Responsive Fluids as Smart Materials

Hajalilou, A.; Amri Mazlan, S.; Lawwafi, H.; Shameli, K.

2016, IX, 135 p. 60 illus., 44 illus. in color., Hardcover

ISBN: 978-981-10-2494-8
