

Preface

The International Conference on Applications and Techniques in Information Security (ATIS) has been held annually since 2010. This year, the seventh in the series was held at Central Queensland University, Cairns, Australia, during October 26–28, 2016. ATIS 2016 focuses on all aspects of techniques and applications in information security research, and provides a valuable connection between the theoretical and the implementation communities attracting participants from industry, academia, and government organizations.

The selection process this year was competitive, each submitted paper was reviewed by three members of the Program Committee. Following this independent review, there were discussions among reviewers and chairs. A total of ten papers were selected as full papers, and another three papers were selected as short papers.

We would like to thank everyone who participated in the development of the ATIS 2016 program. In particular, we would give special thanks to the Program Committee, for their diligence and concern for the quality of the program, and also with their detailed feedback to the authors. The general organization of the conference also relied on the efforts of ATIS 2016 Organizing Committee. We especially thank Biplob Ray, Judy Chow, and Gina Jing for the general administrative issues, the registration process, and the maintaining of the conference website.

Finally and most importantly, we thank all the authors, who are the primary reason why ATIS 2016 is so exciting, and why it is the premier forum for presentation and discussion of innovative ideas, research results, applications, and experience from around the world as well as for highlight activities in the related areas. Because of your great work, ATIS 2016 was a great success.
