

Contents

1	Short History of Energy Transfer Theory Before Förster, At The Time of Förster, and After Förster	1
1.1	Brief Review of Scientific Achievements Before Förster Theory	2
1.2	Förster Energy Transfer Theory	4
1.3	Developments After Förster	6
	References	7
2	Energy Transfer Review	9
2.1	Introduction	9
2.2	Classical Description of Energy Transfer	10
2.3	Quantum Mechanical Description of Energy Transfer	12
2.4	Radiative and Nonradiative Energy Transfer	14
2.4.1	Radiative Energy Transfer	14
2.4.2	Nonradiative Energy Transfer	15
	References	17
3	Förster-Type Nonradiative Energy Transfer Models	19
3.1	Nonradiative Energy Transfer	19
3.2	Dexter Energy Transfer, Charge Transfer, Exciton Diffusion and Dissociation	23
3.3	Selection Rules for Energy Transfer	25
3.3.1	Dipole-Dipole Mechanism	25
3.3.2	Exchange Mechanism	26
	References	26
4	Background Theory	29
4.1	Quantum Confinement	29
4.1.1	Three Dimensional Cartesian Coordinates	29
4.1.2	The Box Potential	31
4.1.3	Three Dimensional Spherical Coordinates	33
4.1.4	Three Dimensional Cylindrical Coordinates	36

4.2 Fermi's Golden Rule	38
References	40
5 Theoretical Approaches: Exciton Theory, Coulomb	
Interactions and Fluctuation-Dissipation Theorem.	41
5.1 Electron-Hole Interaction (Exciton)	41
5.1.1 Frenkel Excitons	42
5.1.2 Mott-Wannier Excitons	44
5.2 Coulombic Interaction	46
5.3 Exciton in Quantum Dots: Single-Particle Quantization	
Energy and Coulomb Interaction	47
5.4 Fermi's Golden Rule and Fluctuation Dissipation Theorem.	48
References	51
Appendix	53

Understanding and Modeling Förster-type Resonance
Energy Transfer (FRET)

Introduction to FRET, Vol. 1

Govorov, A.; Hernández Martínez, P.L.; Demir, H.V.

2016, VI, 54 p. 9 illus. in color., Softcover

ISBN: 978-981-287-377-4
