<b>1</b>	<b>Introduction to Neutrino Physics</b>	<b>1</b>
1.1	Neutrinos	1
1.1.1	Discovery of Neutrinos	1
1.1.2	Neutrinos in the Standard Model	2
1.2	Neutrino Oscillations	2
1.2.1	Theory of Neutrino Oscillations	2
1.2.2	Solar Neutrino Problem	6
1.2.3	Discovery of Neutrino Oscillations	6
1.2.4	Measurements of Neutrino Oscillation Parameters	7
1.3	Unresolved Questions in Neutrino Physics	8
1.4	Neutrino Interactions	13
1.4.1	Weak Interactions	13
1.4.2	Neutrino-Nucleus Interactions	14
1.5	Introduction to the T2K Experiment	17
1.5.1	Overview	17
1.5.2	Physics Goals	17
1.5.3	Experimental Principle	18
1.6	Outline of This Thesis	19
	References	20
<b>2</b>	<b>T2K Experiment</b>	<b>23</b>
2.1	Off-Axis Beam Configuration	23
2.2	J-PARC Accelerator	24
2.3	T2K Neutrino Beamline	26
2.3.1	Primary Beamline	27
2.3.2	Secondary Beamline	28
2.4	Near Detectors	30
2.4.1	INGRID	31
2.4.2	ND280	31
2.5	Super-Kamiokande Detector	32
2.5.1	Detector Overview	32

2.5.2	T2K Beam Data . . . . .	33
2.6	Data Set . . . . .	34
	References. . . . .	35
<b>3</b>	<b>INGRID Detector . . . . .</b>	<b>37</b>
3.1	Standard Modules . . . . .	37
3.2	Proton Module . . . . .	39
3.3	Hardware Components . . . . .	41
3.3.1	Iron Plates . . . . .	41
3.3.2	Extruded Scintillator . . . . .	41
3.3.3	Wavelength Shifting Fiber . . . . .	42
3.3.4	Multi-pixel Photon Counter . . . . .	43
3.3.5	Connectors and Cables . . . . .	46
3.3.6	Readout Electronics . . . . .	46
3.4	Data Acquisition. . . . .	48
	References. . . . .	49
<b>4</b>	<b>Neutrino Event Prediction. . . . .</b>	<b>51</b>
4.1	Neutrino Beam Simulation . . . . .	51
4.1.1	Method of Neutrino Flux Prediction . . . . .	51
4.1.2	Neutrino Flux Uncertainties . . . . .	53
4.2	Neutrino Interaction Simulation . . . . .	54
4.2.1	Neutrino-Nucleus Interactions in NEUT. . . . .	54
4.2.2	Neutrino-Nucleus Interactions in GENIE . . . . .	61
4.2.3	Intra-nuclear Interactions in NEUT . . . . .	62
4.2.4	Neutrino Interaction Model Uncertainties. . . . .	63
4.3	Detector Simulation. . . . .	67
4.3.1	INGRID . . . . .	67
4.3.2	ND280 . . . . .	69
4.3.3	Super-Kamiokande . . . . .	70
	References. . . . .	71
<b>5</b>	<b>Overview of Measurements . . . . .</b>	<b>73</b>
5.1	Overall Flow of Measurements . . . . .	73
5.2	Measurement of Neutrino Beam Properties. . . . .	73
5.3	Measurement of Neutrino-Nucleus Cross Sections. . . . .	74
5.4	Measurement of Neutrino Oscillations . . . . .	75
	References. . . . .	75
<b>6</b>	<b>Measurement of Neutrino Beam Properties . . . . .</b>	<b>77</b>
6.1	Analysis Overview . . . . .	77
6.2	Event Reconstruction and Event Selection . . . . .	78
6.2.1	Data Set . . . . .	78
6.2.2	Event Reconstruction. . . . .	78

6.2.3	Event Selection. . . . .	81
6.2.4	Corrections . . . . .	84
6.3	Systematic Errors . . . . .	89
6.4	Results . . . . .	92
6.4.1	Event Rate. . . . .	92
6.4.2	Beam Direction . . . . .	93
6.4.3	Beam Width. . . . .	95
6.4.4	Summary. . . . .	96
6.5	Considerations . . . . .	96
6.5.1	Future Prospects of the Beam Property Measurement . . . . .	96
6.5.2	Slight Variations. . . . .	97
	References. . . . .	98
<b>7</b>	<b>Measurement of Charged Current Inclusive Cross Section . . . . .</b>	<b>99</b>
7.1	Introduction to the Measurement of the Charged Current Inclusive Cross Section . . . . .	99
7.2	Event Selection. . . . .	101
7.2.1	Data Set . . . . .	101
7.2.2	Event Selection for the Proton Module . . . . .	101
7.2.3	Event Selection for the Standard Module. . . . .	102
7.2.4	Event-Pileup Correction. . . . .	105
7.3	Analysis Strategy . . . . .	106
7.4	Systematic Errors . . . . .	107
7.4.1	Systematic Errors from the Neutrino Flux Prediction . . . . .	107
7.4.2	Systematic Errors from the Neutrino Interaction Model . . . . .	108
7.4.3	Systematic Errors from the Detector Response . . . . .	110
7.4.4	Summary of the Systematic Errors . . . . .	111
7.5	Results . . . . .	111
7.6	Considerations . . . . .	113
7.6.1	Impact of Our Absolute CC Inclusive Cross Section Results. . . . .	113
7.6.2	Future Prospects of Absolute CC Inclusive Cross Section Measurement . . . . .	113
7.6.3	Impact of Our CC Inclusive Cross Section Ratio Result on Different Targets . . . . .	114
7.6.4	Future Prospects of CC Inclusive Cross Section Ratio Result Measurement on Different Targets . . . . .	114
7.6.5	Establishment of the Method of Neutrino Cross Section Measurements Using INGRID. . . . .	115
	References. . . . .	115

<b>8</b>	<b>Measurement of Charged Current Quasi-elastic Cross Section . . .</b>	<b>117</b>
8.1	Introduction to the Measurement of the Charged Current Quasi-elastic Cross Section . . . . .	117
8.2	Event Selection. . . . .	119
8.2.1	Overview of Event Selection . . . . .	119
8.2.2	The Number of Tracks . . . . .	119
8.2.3	Particle Identification. . . . .	121
8.2.4	Kinematic Cut . . . . .	123
8.2.5	Energy Classification. . . . .	125
8.2.6	Summary of Event Selection . . . . .	125
8.3	Analysis Strategy . . . . .	127
8.4	Systematic Errors . . . . .	129
8.5	Results . . . . .	131
8.5.1	Results with the T2K Default Interaction Model . . . . .	131
8.5.2	Results with the Spectral Function Model . . . . .	132
8.5.3	Results Assuming the Existence of the Multi-nucleon Interaction . . . . .	134
8.5.4	Cross Section Ratio of CCQE to Total CC Interaction . . . . .	135
8.6	Considerations . . . . .	137
8.6.1	Impact of Our CCQE Cross Section Results. . . . .	137
8.6.2	Inconsistency Between the MiniBooNE and NOMAD Results . . . . .	138
8.6.3	Future Prospects of CCQE Cross Section Measurement . . . . .	139
	References. . . . .	140
<b>9</b>	<b>Measurement of Charged Current Coherent Pion Production Cross Section . . . . .</b>	<b>141</b>
9.1	Introduction to the Coherent Pion Production Measurement . . .	141
9.2	Event Selection. . . . .	143
9.2.1	Overview of Event Selection . . . . .	143
9.2.2	Event Selection Criteria. . . . .	143
9.2.3	Summary of Event Selection . . . . .	146
9.3	Analysis Strategy . . . . .	146
9.4	Systematic Errors . . . . .	147
9.5	Results . . . . .	148
9.6	Considerations . . . . .	151
9.6.1	Impact of Our CC Coherent Pion Cross Section Result . . . . .	151
9.6.2	Dependence on the Kinematics of the CC Coherent Pion Production . . . . .	151
9.6.3	Future Prospects of CC Coherent Pion Cross Section Measurement . . . . .	152
	References. . . . .	153

<b>10</b>	<b>Measurement of Neutrino Oscillations</b>	155
10.1	Analysis Overview	155
10.2	Measurement at ND280	156
10.2.1	CC Event Selection	156
10.2.2	CC Event Classification	157
10.3	Constraint from the ND280 Measurement	159
10.4	Measurement at Super-K	161
10.4.1	$\nu_e$ Event Selection	162
10.4.2	$\nu_\mu$ Event Selection	165
10.4.3	Super-K Detector Uncertainties	167
10.5	Introduction to the Three-Flavor Neutrino Oscillation	
	Analysis	168
10.6	Analysis Strategy	169
10.6.1	Treatment of Oscillation Parameters	169
10.6.2	Fitting Methods	169
10.6.3	Determination of the Confidence Regions	
	of the Oscillation Parameters	170
10.6.4	Neutrino Event Prediction at Super-K	171
10.7	Systematic Errors	172
10.7.1	Treatment of Systematic Errors	172
10.7.2	Method of Generating Covariance Matrix	173
10.7.3	Oscillation Parameter Dependence	
	of the Covariance Matrix	174
10.7.4	Systematic Error Implementation	
	with the Covariance Matrix	175
10.7.5	Super-K Energy Scale Error Implementation	176
10.7.6	Spectral Function Error Implementation	177
10.7.7	Summary of the Systematic Error Treatment	178
10.7.8	Systematic Errors on the Number of Events	
	at Super-K	178
10.8	Results	181
10.8.1	Results Without Prior Constraints on	
	Oscillation Parameters	181
10.8.2	Results with Reactor $\theta_{13}$ Constraint	183
10.9	Considerations	187
10.9.1	Three-Flavor Joint Neutrino Oscillation Analysis	187
10.9.2	New Method of the Systematic Error Treatment	188
10.9.3	Matter-Antimatter Asymmetry in the Universe	188
10.9.4	Neutrino Mixing Scheme	189
10.9.5	Future Prospects of Neutrino Oscillation	
	Measurement	190
	References	191
