Contents

1 Introduction 1
1.1 Signal Enhancement from a Signal Subspace Perspective 2
1.2 From Subspace Methods to Variable Span Linear Filters 3
1.3 Organization of the Work 4
References 5

2 General Concept with Filtering Vectors 7
2.1 Signal Model and Problem Formulation 7
2.2 Joint Diagonalization 8
2.3 Variable Span (VS) Linear Filtering 9
2.4 Performance Measures 11
2.4.1 Noise Reduction 11
2.4.2 Desired Signal Distortion 12
2.4.3 Mean-Squared Error (MSE) Criterion 13
2.5 Optimal VS Linear Filters 14
2.5.1 VS Minimum Distortion 14
2.5.2 VS Wiener 16
2.5.3 VS Tradeoff 17
2.6 Indirect Optimal VS Linear Filters 18
2.6.1 Indirect Approach 18
2.6.2 MSE Criterion and Performance Measures 20
2.6.3 Optimal Filters 21
References 24

3 General Concept with Filtering Matrices 25
3.1 Signal Model and Problem Formulation 25
3.2 VS Linear Filtering with a Matrix 25
3.3 Performance Measures 27
3.3.1 Noise Reduction 27
3.3.2 Desired Signal Distortion 28
3.3.3 MSE Criterion 29

3.4 Optimal VS Linear Filtering Matrices 30
3.4.1 VS Minimum Distortion 30
3.4.2 VS Wiener 32
3.4.3 VS Tradeoff 33
3.5 Indirect Optimal VS Linear Filtering Matrices 34
3.5.1 Indirect Approach 34
3.5.2 MSE Criterion and Performance Measures 35
3.5.3 Optimal Filtering Matrices 37
References 39

4 Single-Channel Signal Enhancement in the STFT Domain 41
4.1 Signal Model and Problem Formulation 41
4.2 Joint Diagonalization 42
4.3 Linear Filtering 43
4.4 Performance Measures 44
4.4.1 Noise Reduction 44
4.4.2 Desired Signal Distortion 45
4.4.3 MSE Criterion 46
4.5 Optimal Linear Filters 47
4.5.1 Maximum SNR 47
4.5.2 Minimum Distortion 47
4.5.3 Wiener 48
4.5.4 Tradeoff 49
4.6 Experimental Results 50
References 57
4.A MATLAB Code 58
4.A.1 Main Scripts 58
4.A.2 Functions 67

5 Multichannel Signal Enhancement in the Time Domain . . . 75
5.1 Signal Model and Problem Formulation 75
5.2 Linear Filtering with a Rectangular Matrix 78
5.3 Performance Measures 80
5.3.1 Noise Reduction 80
5.3.2 Desired Signal Distortion 81
5.3.3 MSE Criterion 82
5.4 Optimal Rectangular Linear Filtering Matrices 83
5.4.1 Maximum SNR 83
5.4.2 Wiener 84
5.4.3 MVDR 85
5.4.4 Tradeoff 86
5.5 Experimental Results 88
References 97
5.A MATLAB Code 98
5.A.1 Main Scripts 98

5.A.2 Functions 108

6 Multichannel Signal Enhancement in the STFT Domain . . 115
6.1 Signal Model and Problem Formulation 115
6.2 Direct Approach for Signal Enhancement 117
6.3 Indirect Approach for Signal Enhancement 123
6.4 Experimental Results 125
References 131
6.A MATLAB Code 132
6.A.1 Main Scripts 132
6.A.2 Functions 141

7 Binaural Signal Enhancement in the Time Domain 149
7.1 Signal Model and Problem Formulation 149
7.2 Widely Linear Filtering with a Rectangular Matrix 154
7.3 Performance Measures 155
7.3.1 Noise Reduction 155
7.3.2 Desired Signal Distortion 156
7.3.3 MSE Criterion 157
7.4 Optimal Rectangular Linear Filtering Matrices 158
7.4.1 Maximum SNR 159
7.4.2 Wiener 160
7.4.3 MVDR 161
7.4.4 Tradeoff 162
References 163

A Auxiliary MATLAB Functions 165
References 169
