

# Contents

<b>1 Complexity and Swarming Systems</b> . . . . .	1
<b>2 A Biologically Inspired Approach to Collective Behaviors</b> . . . . .	5
2.1 Collective Animal Behaviors . . . . .	5
2.2 Ethology . . . . .	6
2.3 Why Biological Inspiration? . . . . .	7
2.4 What Nature Teaches Us About Swarming . . . . .	8
2.4.1 Self-Organization and the Importance of Order in Life . . .	9
2.4.2 Positive Feedback and the Emergence of Order . . . . .	11
2.4.3 Collective Behavior Without Large-Scale Order . . . . .	12
2.4.4 Information Processing and Swarm Intelligence . . . . .	13
References . . . . .	14
<b>3 A Physical Approach to Swarming</b> . . . . .	17
3.1 Self-Organization in Physicochemical Systems . . . . .	17
3.1.1 Elementary Cellular Automata . . . . .	18
3.1.2 Collective Phenomena in Physical Systems . . . . .	20
3.1.3 Collective Motion. . . . .	22
3.2 The Self-Propelled Particles (SPP) Model . . . . .	24
3.2.1 Dynamical Foundations. . . . .	24
3.2.2 Neighborhood of Interactions. . . . .	26
3.2.3 Dynamic Update Rule. . . . .	28
3.3 What Statistical Physics Teaches Us . . . . .	29
3.3.1 Phase Transitions . . . . .	30
3.3.2 Scaling and Universality . . . . .	32
3.3.3 Fluctuations, Correlations, Susceptibility, and Nonapparent Collective Behavior . . . . .	33
3.3.4 Nonequilibrium Systems and Self-Organized Criticality . . . . .	36

3.4	What the Theory of Dynamical Systems Teaches Us. . . . .	36
3.4.1	Bifurcation, Catastrophe, Collapse, and Tipping Point. . . .	37
3.4.2	At the Edge of Chaos . . . . .	39
3.5	Inspiration and Swarm Design . . . . .	40
	References . . . . .	41
<b>4</b>	<b>A Network-Theoretic Approach to Collective Dynamics . . . . .</b>	<b>45</b>
4.1	A Science of Networks . . . . .	45
4.2	Swarm Signaling Networks . . . . .	47
4.3	Network Properties and Swarm Dynamics . . . . .	49
4.3.1	Assembling the Swarm Signaling Network . . . . .	49
4.3.2	Connectedness of the Signaling Network. . . . .	51
4.3.3	Shortest Connecting Path. . . . .	54
4.3.4	Clustering Coefficient . . . . .	55
4.3.5	Degree Distribution . . . . .	56
4.3.6	Resilience of Swarming. . . . .	59
4.3.7	Controllability of Swarming. . . . .	60
4.3.8	Swarm Network Dynamics . . . . .	62
4.4	Design of Signaling Network for Artificial Swarming . . . . .	63
4.4.1	Models of Signaling Networks. . . . .	64
4.4.2	Enhanced Swarming Behaviors . . . . .	68
4.4.3	Some Words of Caution . . . . .	71
	References . . . . .	72
<b>5</b>	<b>An Information-Theoretic Approach to Collective Behaviors . . . . .</b>	<b>75</b>
5.1	Social Information Transmission. . . . .	75
5.2	Role of Information in Collective Behaviors . . . . .	76
5.3	Information Flow in Swarms . . . . .	77
5.3.1	Quantifying Information . . . . .	77
5.3.2	Dynamics of Information Transfer . . . . .	78
5.3.3	Transmission Channels . . . . .	79
5.3.4	Capacity of the Transmission Channel . . . . .	81
5.3.5	Informational Bottlenecks in Collective Behaviors . . . . .	82
5.3.6	Conditions for the Emergence of Collective Behavior Under Data Rate Limitations . . . . .	83
5.3.7	Swarming Collapse Under Data Rate Limitations . . . . .	86
5.4	Information and Swarm Design . . . . .	88
5.4.1	Acquisition of Stimuli Information by the Swarm. . . . .	88
5.4.2	Dynamic Balancing of Positive and Negative Feedback Loops. . . . .	89
5.4.3	Leveraging Technological Advances for Novel Swarm Designs . . . . .	90

5.4.4 Coupling Between Information Flow and Agent's Movement . . . . .	91
References . . . . .	91
<b>6 A Computational Approach to Collective Behaviors . . . . .</b>	<b>95</b>
6.1 From Collective Behavior to Computation and Information Processing . . . . .	95
6.1.1 Nature of Information and Its Storage in Swarms . . . . .	96
6.1.2 Swarms and Algorithms . . . . .	97
6.2 The Theory of Computation . . . . .	98
6.2.1 A Definition of Computation . . . . .	98
6.2.2 The Concept of Computability . . . . .	98
6.2.3 Computation and Causal Systems . . . . .	99
6.2.4 Randomized Algorithms, Probabilistic Turing Machines, and Computation . . . . .	100
6.3 Collective Information Processing in Swarms . . . . .	100
6.3.1 A Tentative Classification of Collective Decision-Making Processes . . . . .	101
6.3.2 The Importance of Randomness for Collective Computation . . . . .	102
6.4 Computation and Swarm Design . . . . .	103
References . . . . .	104
<b>7 Outlook: Can Swarms Be Designed? . . . . .</b>	<b>105</b>
References . . . . .	106
