1	Biocultural Diversity in Melanesia	1
1.1	Diversity in Melanesia	2
1.1.1	Biological Diversity	2
1.1.2	Cultural Diversity	5
1.2	Socioeconomic Changes	9
1.3	Previous Studies in Melanesia	12
1.4	Living with Biodiversity	13
2	Ecological History and Regional Context of Roviana	15
2.1	Fieldwork in Solomon Islands	15
2.2	Geography and Ecosystem	17
2.3	People of Roviana	19
2.4	Social and Cultural Background	23
2.4.1	<i>Kastom</i>	24
2.4.2	Chief	24
2.4.3	<i>Wantok</i>	24
2.4.4	Land Tenure	25
2.4.5	<i>Tabu ples/Hope</i>	26
2.4.6	<i>Tension</i>	27
2.4.7	Christianity	28
2.5	Main Villages Studied Here	28
3	Diversity in Landscape	31
3.1	Landscape Classification	31
3.2	Folk Classification of the Landscape	32
3.3	Primary and Secondary Forest	35
3.4	Logged Forest and Timber Plantations	37
3.5	Forest Reserve	42
3.6	Mangrove	44
3.7	Horticultural Gardens and Settlements	44
3.8	Similarity and Dissimilarity Between Forests	46

4	Subsistence on the Main Island, Barrier Islands, and at Sea	49
4.1	Human Ecological Approach	49
4.2	Subsistence Pattern	50
4.3	A Comparison of Human Use of the Main and Barrier Islands	51
4.4	Spatiotemporal Distribution of Cultivation Lands	56
4.5	Horticultural Practices and Soil Fertility	58
4.6	Crop Diversity and Production from Annuals and Perennials	63
4.7	Carrying Capacity of the Barrier Island	64
4.8	Fishing Activities in the Lagoon and Outer Seas	70
5	Plant Resources as Ecosystems Services	77
5.1	Quantitative Ethnobotany	77
5.2	Plants Used for Food	78
5.3	Plants Used to Treat Illnesses	82
5.4	Plants Used to Build Houses	83
5.5	Plants Used for Tools	85
5.6	Plants Used for Fuel	88
5.7	Plants Used in Two or More Purposes	88
5.8	Distribution of Useful Trees in Different Forest Types and on Islands	90
5.9	The Relationship between Subsistence Plant Use and Botanical Diversity	91
5.10	Traditional Methods of Subsistence May Contribute to Forest Biodiversity	91
6	Recognized Webs in Ecosystems	95
6.1	Folk Ecology	95
6.2	Knowledge and Recognition of Nature	96
6.3	Human–Plant Relationships	101
6.4	Human–Animal Relationships	102
6.5	Plant–Animal Relationships	104
6.6	Development and Changing Recognition of Ecological Webs	108
6.7	Conservation in Recognition	109
7	Changing Ethnobotanical Knowledge	111
7.1	Changing Ethnobotanical Knowledge	111
7.2	Cultural Consensus and Modernity	112
7.2.1	Conceptual Framework	112
7.2.2	Cultural Consensus	114
7.2.3	Modernity Score	116
7.3	Correlation Between Knowledge and Modernity	118
7.4	Effects of Individual Characteristics	119
7.5	Transformation of Knowledge	123

8	Painful Lessons from Urban Ecology and Economics	127
8.1	Urbanization in the Solomon Islands	127
8.2	Near Future of Socio-ecological Changes	128
8.3	Health and Survival	135
9	Customary Rules and Wisdom Related to Conservation	139
9.1	Social and Cultural Aspects of Conservation	139
9.2	Biodiversity Conservation as a Social Institution	140
9.3	Practices and Institutions Under Socioeconomic Changes	142
10	Living with Internal and External Diversity	147
10.1	Living with Biodiversity	147
10.2	Risk-Averse and Risk-Prone Subsistence Strategy	148
10.3	Valuing Biodiversity and Ecological Services	151
10.4	Diversity of Conservation Ethics	153
10.5	Internal Diversity and External Inputs	155
	Epilogue	159
	Appendix	161
	Appendix 1: List of plants used in the Roviana, sorted alphabetically by the Roviana name, with observed uses and purposes	161

Living with Biodiversity in an Island Ecosystem

Cultural Adaptation in the Solomon Islands

Furusawa, T.

2016, XXI, 190 p. 59 illus., 17 illus. in color., Hardcover

ISBN: 978-981-287-902-8
