<i>Preface</i>	<i>v</i>
<i>Contributors</i>	<i>xi</i>
SECTION I GENE AND GENOME-EDITING METHODS PART I	
1 Design and Validation of CRISPR/Cas9 Systems for Targeted Gene Modification in Induced Pluripotent Stem Cells	3
<i>Ciaran M. Lee, Haibao Zhu, Timothy H. Davis, Harshabardhan Deshmukh, and Gang Bao</i>	
2 Mutagenesis and Genome Engineering of Epstein–Barr Virus in Cultured Human Cells by CRISPR/Cas9	23
<i>Kit-San Yuen, Chi-Ping Chan, Kin-Hang Kok, and Dong-Yan Jin</i>	
3 Use of CRISPR/Cas Genome Editing Technology for Targeted Mutagenesis in Rice	33
<i>Rongfang Xu, Pengcheng Wei, and Jianbo Yang</i>	
4 All-in-One CRISPR-Cas9/FokI-dCas9 Vector-Mediated Multiplex Genome Engineering in Cultured Cells	41
<i>Tetsushi Sakuma, Takuya Sakamoto, and Takashi Yamamoto</i>	
5 CRISPR/Cas9-Mediated Mutagenesis of Human Pluripotent Stem Cells in Defined Xeno-Free E8 Medium	57
<i>Chew-Li Soh and Danwei Huangfu</i>	
6 Development of CRISPR/Cas9 for Efficient Genome Editing in <i>Toxoplasma gondii</i>	79
<i>Bang Shen, Kevin Brown, Shaojun Long, and L. David Sibley</i>	
SECTION II GENE AND GENOME-EDITING METHODS PART II	
7 Generation of Stable Knockout Mammalian Cells by TALEN-Mediated Locus-Specific Gene Editing	107
<i>Barun Mahata and Kaushik Biswas</i>	
8 Efficient Generation of Gene-Modified Mice by Haploid Embryonic Stem Cell-Mediated Semi-cloned Technology	121
<i>Cuiqing Zhong and Jinsong Li</i>	
9 Insertion of Group II Intron-Based Ribozyme Switches into Homing Endonuclease Genes	135
<i>Tubin Kumar Guha and Georg Hausner</i>	
10 Generating a Genome Editing Nuclease for Targeted Mutagenesis in Human Cells	153
<i>Zhenyu He and Kehkooi Kee</i>	

11	Use of Group II Intron Technology for Targeted Mutagenesis in <i>Chlamydia trachomatis</i>	163
	<i>Charlotte E. Key and Derek J. Fisher</i>	
SECTION III BIOINFORMATICS APPROACHES FOR IDENTIFYING AND ANALYZING MUTAGENESIS TARGETS		
12	In Silico Approaches to Identify Mutagenesis Targets to Probe and Alter Protein–Cofactor and Protein–Protein Functional Relationships	181
	<i>Brian A. Dow, Esha Sehanobish, and Victor L. Davidson</i>	
13	In Silico Prediction of Deleteriousness for Nonsynonymous and Splice-Altering Single Nucleotide Variants in the Human Genome	191
	<i>Xueqiu Jian and Xiaoming Liu</i>	
14	In Silico Methods for Analyzing Mutagenesis Targets	199
	<i>Troy C. Messina</i>	
15	Methods for Detecting Critical Residues in Proteins	227
	<i>Nurit Haspel and Filip Jagodzinski</i>	
16	A Method for Bioinformatic Analysis of Transposon Insertion Sequencing (INSeq) Results for Identification of Microbial Fitness Determinants.	243
	<i>Nengding Wang and Egon A. Ozer</i>	
SECTION IV IN VITRO TRANSPOSON MUTAGENESIS METHODS IN DIVERSE PROKARYOTIC SYSTEMS		
17	Application of In Vitro Transposon Mutagenesis to Erythromycin Strain Improvement in <i>Saccharopolyspora erythraea</i>	257
	<i>J. Mark Weber, Andrew Reeves, William H. Cernota, and Roy K. Wesley</i>	
18	Engineering Gram-Negative Microbial Cell Factories Using Transposon Vectors.	273
	<i>Esteban Martínez-García, Tomás Aparicio, Víctor de Lorenzo, and Pablo I. Nikel</i>	
19	PERMutation Using Transposase Engineering (PERMUTE): A Simple Approach for Constructing Circularly Permuted Protein Libraries	295
	<i>Alicia M. Jones, Joshua T. Atkinson, and Jonathan J. Silberg</i>	
20	Transposon Insertion Mutagenesis for Archaeal Gene Discovery	309
	<i>Saija Kiljunen, Maria I. Pajunen, and Harri Savilähti</i>	
21	Genome-Wide Transposon Mutagenesis in <i>Mycobacterium tuberculosis</i> and <i>Mycobacterium smegmatis</i>	321
	<i>Gaurav Majumdar, Rendani Mban, Vinayak Singh, Digby F. Warner, Marte Singsås Dragset, and Raju Mukherjee</i>	
SECTION V SITE-DIRECTED MUTAGENESIS: PCR AND DNA POLYMERASE-BASED METHODS		
22	Multiple Site-Directed and Saturation Mutagenesis by the Patch Cloning Method.	339
	<i>Naohiro Taniguchi and Hiroshi Murakami</i>	

23	Seamless Ligation Cloning Extract (Slice) Method Using Cell Lysates from Laboratory <i>Escherichia coli</i> Strains and its Application to Slip Site-Directed Mutagenesis	349
	<i>Ken Motobashi</i>	
24	Facile Site-Directed Mutagenesis of Large Constructs Using Gibson Isothermal DNA Assembly	359
	<i>Isaac T. Yonemoto and Philip D. Weyman</i>	
25	Revised Mechanism and Improved Efficiency of the QuikChange Site-Directed Mutagenesis Method	367
	<i>Yongzhen Xia and Luying Xun</i>	
26	An In Vitro Single-Primer Site-Directed Mutagenesis Method for Use in Biotechnology	375
	<i>Yanchao Huang and Likui Zhang</i>	
27	Use of Megaprimer and Overlapping Extension PCR (OE-PCR) to Mutagenize and Enhance Cyclodextrin Glucosyltransferase (CGTase) Function	385
	<i>Kian Mau Goh, Kok Jun Liew, Kian Piau Chai, and Rosli Md Illias</i>	
SECTION VI IN VITRO MUTAGENESIS FOR STUDIES OF PROTEIN STRUCTURE AND FUNCTION		
28	Step-By-Step In Vitro Mutagenesis: Lessons From Fucose-Binding Lectin PA-IIL	399
	<i>Jana Mrázková, Lenka Malinová, and Michaela Wimmerová</i>	
29	Analytical Methods for Assessing the Effects of Site-Directed Mutagenesis on Protein–Cofactor and Protein–Protein Functional Relationships.	421
	<i>Esha Sehanobish, Brian A. Dow, and Victor L. Davidson</i>	
30	Biochemical and Biophysical Methods to Examine the Effects of Site-Directed Mutagenesis on Enzymatic Activities and Interprotein Interactions	439
	<i>Misaki Kinoshita, Ju Yaen Kim, Yuxi Lin, Natalia Markova, Toshiharu Hase, and Young-Ho Lee</i>	
31	Use of Random and Site-Directed Mutagenesis to Probe Protein Structure–Function Relationships: Applied Techniques in the Study of <i>Helicobacter pylori</i>	461
	<i>Jeannette M. Whitmire and D. Scott Merrell</i>	
SECTION VII RANDOM MUTAGENESIS: NOVEL PCR-BASED METHODS		
32	Novel Random Mutagenesis Method for Directed Evolution.	483
	<i>Hong Feng, Hai-Yan Wang, and Hong-Yan Zhao</i>	
33	Random Mutagenesis by Error-Prone Polymerase Chain Reaction Using a Heavy Water Solvent	491
	<i>Toshifumi Minamoto</i>	

34 Development and Use of a Novel Random Mutagenesis Method:
In Situ Error-Prone PCR (*is-epPCR*) 497
Weilan Shao, Kesen Ma, Yilin Le, Hongcheng Wang, and Chong Sha

Index 507

In Vitro Mutagenesis

Methods and Protocols

Reeves, A. (Ed.)

2017, XV, 511 p. 96 illus., 52 illus. in color., Hardcover

ISBN: 978-1-4939-6470-3
