<i>Preface</i>	<i>v</i>
<i>Acknowledgements</i>	<i>ix</i>
<i>Contributors</i>	<i>xiii</i>
1 Methodologies to Identify and Analyze Genetic Polymorphisms for Human Histamine Receptors	1
<i>Stephany Micallef and Astrid Sasse</i>	
2 Development, Characterization, and Validation of Anti-Human H ₃ Receptor Isoform-Specific Antibodies	19
<i>Fiona C. Shenton, Natasha Lethbridge, and Paul L. Chazot</i>	
3 Approaches to Recombinant Histamine H ₃ /H ₄ Receptor Expression in Mammalian Cells	49
<i>Tadeusz Karcz, Urszula Cichoń, and Katarzyna Kieć-Kononowicz</i>	
4 Histamine H ₂ Receptor Biased Signaling Methods	67
<i>Natalia C. Fernández, Carina Shayo, Carlos Davio, and Federico Monczor</i>	
5 Ligand-Binding Kinetics on Histamine Receptors	115
<i>Reggie Bosma, Tamara A.M. Mocking, Rob Leurs, and Henry F. Vischer</i>	
6 Methods to Study the Molecular Pharmacology of the Histamine H ₄ Receptor	157
<i>Eléonore W.E. Verweij, Rob Leurs, and Henry F. Vischer</i>	
7 Chemiluminescence: A Sensitive Method for Detecting the Effects of Histamine Receptor Agonists/Antagonists on Neutrophil Oxidative Burst	183
<i>Ondřej Vašíček, Tomáš Perečko, Viera Jančinová, Silvia Pažoureková, Radomír Nosál, and Milan Číž</i>	
8 Techniques Used in Pharmacological Evaluation of Histamine H ₄ Receptor Function on Native Human Eosinophils	209
<i>Marek Grosicki and Katarzyna Kieć-Kononowicz</i>	
9 Assessment of the Efficacy of Histamine Receptor Antagonists in Murine Models of Atopic Dermatitis	233
<i>Kristine Roßbach, Hanna Köchling, Tomoki Fukuyama, Jenny Wilzopolski, Manfred Kietzmann, and Wolfgang Bäumer</i>	
10 Methodological Approaches to Study Histamine Pharmacology in the Kidney: From Cell Culture and Cell Imaging to Functional Assays and Electron Microscopy	263
<i>Alessandro Pini, Eleonora Veglia, Cristina Grange, and Arianna Carolina Rosa</i>	

11	Histamine and the Kidney: In Vivo Animal Models	309
	<i>Alessandro Pini, Eleonora Veglia, and Arianna Carolina Rosa</i>	
12	Methodological Approaches to Investigate the Effects of Histamine Receptor Targeting Compounds in Preclinical Models of Breast Cancer	353
	<i>Diego J. Martinel Lamas, Melisa B. Nicoud, Helena Sterle, Graciela P. Cricco, Gabriela A. Martin, Graciela A. Cremaschi, Hubert G. Schwelberger, Elena S. Rivera, and Vanina A. Medina</i>	
13	Evaluation of Histidine Decarboxylase (HDC) Activity and Human Histamine Receptor 3 (H ₃ R) and HDC mRNA Levels.	389
	<i>Carlos Acosta-Andrade, José L. Urdiales, Ignacio Fajardo, and Francisca Sánchez-Jiménez</i>	
14	Cerebrospinal Fluid Markers in Neuroinflammation: The Paradigm of Optic Neuritis	411
	<i>Dimitrios P. Besinis and Maria C. Anagnostouli</i>	
15	In Vivo Diagnostic Procedures for IgE-Mediated Allergic Disorders	433
	<i>Christopher Koulias, Xenophon Aggelides, Caterina Chliva, and Michael Makris</i>	
16	Dermatological Indications of Antihistamines	473
	<i>Chrysovalantis Korfitis, Efsthios Rallis, and Dimitrios Rigopoulos</i>	
17	Histamine Quantification in Human Blood Samples	489
	<i>Ekaterini Tiligada, Maria Kakolyri, and Madeleine Ennis</i>	
	<i>Index</i>	509

Histamine Receptors as Drug Targets

Tiligada, E.; Ennis, M. (Eds.)

2017, XVI, 517 p. 138 illus., 93 illus. in color., Hardcover

ISBN: 978-1-4939-6841-1

A product of Humana Press
