

# Contents

<i>Preface</i> . . . . .	<i>vii</i>
<i>Contributors</i> . . . . .	<i>xiii</i>
1 Isolation of Peroxisomes from Rat Liver and Cultured Hepatoma Cells by Density Gradient Centrifugation . . . . .	1
<i>Andreas Manner and Markus Islinger</i>	
2 Isolation of Peroxisomes from Mouse Brain Using a Continuous Nycodenz Gradient: A Comparison to the Isolation of Liver and Kidney Peroxisomes . . . . .	13
<i>Miriam J. Schönenberger and Werner J. Kovacs</i>	
3 Determining the Topology of Peroxisomal Proteins Using Protease Protection Assays . . . . .	27
<i>Tânia Francisco, Ana F. Dias, Ana G. Pedrosa, Cláudia P. Grou, Tony A. Rodrigues, and Jorge E. Azevedo</i>	
4 Isolation of Native Soluble and Membrane-Bound Protein Complexes from Yeast <i>Saccharomyces cerevisiae</i> . . . . .	37
<i>Tobias Hansen, Anna Chan, Thomas Schröter, Daniel Schwerter, Wolfgang Girzalsky, and Ralf Erdmann</i>	
5 Method for Measurement of Peroxisomal Very Long-Chain Fatty Acid Beta-Oxidation and De Novo C26:0 Synthesis Activity in Living Cells Using Stable-Isotope Labeled Docosanoic Acid . . . . .	45
<i>Malu-Clair van de Beek, Inge M.E. Dijkstra, and Stephan Kemp</i>	
6 Analysis of Plasmalogen Synthesis in Cultured Cells. . . . .	55
<i>Masanori Honsho and Yukio Fujiki</i>	
7 Transfection of Primary Human Skin Fibroblasts for Peroxisomal Studies . . . .	63
<i>Janet Koster and Hans R. Waterham</i>	
8 siRNA-mediated Silencing of Peroxisomal Genes in Mammalian Cells . . . . .	69
<i>Tina A. Schrader and Michael Schrader</i>	
9 Dual Reporter Systems for the Analysis of Translational Readthrough in Mammals . . . . .	81
<i>Julia Hofhuis, Severin Dieterle, Rosemol George, Fabian Schueren, and Sven Thoms</i>	
10 Cytochemical Detection of Peroxisomes in Light and Electron Microscopy with 3,3'-diaminobenzidine . . . . .	93
<i>H. Dariush Fahimi</i>	
11 Cryo-Immuno Electron Microscopy of Peroxisomal Marker Proteins . . . . .	101
<i>Karina Mildner and Dagmar Zeuschner</i>	
12 Detection and Immunolabeling of Peroxisomal Proteins . . . . .	113
<i>Tina A. Schrader, Markus Islinger, and Michael Schrader</i>	

13	Labeling of Peroxisomes for Live Cell Imaging in the Filamentous Fungus <i>Ustilago maydis</i> . . . . .	131
	<i>Sofia C. Guimarães, Sreedhar Kilaru, Michael Schrader, and Martin Schuster</i>	
14	Quantitative Monitoring of Subcellular Redox Dynamics in Living Mammalian Cells Using RoGFP2-Based Probes . . . . .	151
	<i>Celien Lismont, Paul A. Walton, and Marc Fransen</i>	
15	KillerRed as a Tool to Study the Cellular Responses to Peroxisome-Derived Oxidative Stress . . . . .	165
	<i>Marc Fransen and Chantal Brees</i>	
16	Determination of Peroxisomal pH in Living Mammalian Cells Using pHRed . . . . .	181
	<i>Luis F. Godinho and Michael Schrader</i>	
17	<i>In Cellulo</i> Approaches to Study Peroxisomal Protein Import – Yeast Immunofluorescence Microscopy . . . . .	191
	<i>Tobias Hansen, Wolfgang Girzalsky, and Ralf Erdmann</i>	
18	Blue Native PAGE: Applications to Study Peroxisome Biogenesis . . . . .	197
	<i>Kanji Okumoto, Shigebiko Tamura, and Yukio Fujiki</i>	
19	In Vitro PMP Import Analysis Using Cell-Free Synthesized PMP and Isolated Peroxisomes . . . . .	207
	<i>Yuqiong Liu, Masanori Honsbo, and Yukio Fujiki</i>	
20	Peroxisomal Membrane and Matrix Protein Import Using a Semi-Intact Mammalian Cell System . . . . .	213
	<i>Kanji Okumoto, Masanori Honsbo, Yuqiong Liu, and Yukio Fujiki</i>	
21	The Use of Glycosylation Tags as Reporters for Protein Entry into the Endoplasmic Reticulum in Yeast and Mammalian Cells. . . . .	221
	<i>Judith Buentzel and Sven Thoms</i>	
22	Detection of Ubiquitinated Peroxisomal Proteins in Yeast . . . . .	233
	<i>Natasha Danda and Chris Williams</i>	
23	Assessing Pexophagy in Mammalian Cells . . . . .	243
	<i>Shun-ichi Yamashita and Yukio Fujiki</i>	
24	Experimental Systems to Study Yeast Pexophagy . . . . .	249
	<i>Shun-ichi Yamashita, Masahide Oku, Yasuyoshi Sakai, and Yukio Fujiki</i>	
25	Flow Cytometric Analysis of the Expression Pattern of Peroxisomal Proteins, Abcd1, Abcd2, and Abcd3 in BV-2 Murine Microglial Cells . . . . .	257
	<i>Meryam Debbabi, Thomas Nury, Imen Helali, El Mostafa Karym, Flore Geillon, Catherine Gondcaille, Doriane Trompier, Amina Najid, Sébastien Terreau, Maryem Bezine, Amira Zarrouk, Anne Vejux, Pierre Andreoletti, Mustapha Cherkaoui-Malki, Stéphane Savary, and Gérard Lizard</i>	
26	Study of Peroxisomal Protein Phosphorylation by Functional Proteomics . . . .	267
	<i>Andreas Schummer, Sven Fischer, Silke Oeljeklaus, and Bettina Warscheid</i>	

27	Analysis of Peroxisomal $\beta$ -Oxidation During Storage Oil Mobilization in <i>Arabidopsis thaliana</i> Seedlings . . . . .	291
	<i>Björn Hielscher, Lennart Charton, Tabea Mettler-Altmann, and Nicole Linka</i>	
28	Peroxisome Mini-Libraries: Systematic Approaches to Study Peroxisomes Made Easy . . . . .	305
	<i>Noa Dahan, Maya Schuldiner, and Einat Zalcckvar</i>	
29	Generation of Peroxisome-Deficient Somatic Animal Cell Mutants . . . . .	319
	<i>Kanji Okumoto and Yukio Fujiki</i>	
30	Clinical and Laboratory Diagnosis of Peroxisomal Disorders . . . . .	329
	<i>Ronald J.A. Wanders, Femke C.C. Klouwer, Sacha Ferdinandusse, Hans R. Waterham, and Bwee Tien Poll-Thé</i>	
	<i>Index</i> . . . . .	343

Peroxisomes

Methods and Protocols

Schrader, M. (Ed.)

2017, XVII, 347 p. 63 illus., 36 illus. in color., Hardcover

ISBN: 978-1-4939-6935-7
