

# Contents

<b>1</b>	<b>Introduction</b>	1
<b>2</b>	<b>Divergence Operator</b>	13
2.1	Solutions of the Divergence on Star-Shaped Domains	14
2.2	Solutions of the Divergence on John Domains	23
2.3	Improved Poincaré Inequality and Equivalences	38
2.4	A Partial Converse Result	43
2.5	Comments and References	44
<b>3</b>	<b>Korn's Inequalities</b>	47
3.1	Classical Versions of Korn's Inequalities	48
3.2	The Korn Inequality on John Domains	55
<b>4</b>	<b>Singular Domains</b>	61
4.1	Weighted Korn and Poincaré Inequalities on Hölder $\alpha$ Domains	62
4.2	Solutions of the Divergence in Domains with External Cusps	66
4.3	Weighted Korn Inequalities on External Cusps	71
4.4	Some Simple Counterexamples	73
4.5	$\text{Korn}_p$ and $\text{div}_p$ for Linked Domains	79
4.6	From Linked Domains to More General External Cusps	92
4.7	Comments and References	95
<b>A</b>	<b>Basic Equations of Continuum Mechanics</b>	99
A.0.1	Linearized Elasticity	102
A.0.2	The Stokes Equations	104

<b>B</b>	<b>Powers of the distance to the boundary as <math>A_p</math> weights</b> .....	107
<b>C</b>	<b>An Auxiliary Result on Hölder <math>\alpha</math> Domains</b> .....	109
	<b>References</b> .....	115
	<b>Index</b> .....	123

Divergence Operator and Related Inequalities

Acosta, G.; Durán, R.G.

2017, XIII, 124 p. 7 illus., Softcover

ISBN: 978-1-4939-6983-8
