

Contents

1	Clinical Features of β-Thalassemia and Sickle Cell Disease	1
	Patrick T. McGann, Alecia C. Nero, and Russell E. Ware	
2	Genetic Basis and Genetic Modifiers of β-Thalassemia and Sickle Cell Disease	27
	Swee Lay Thein	
3	Current Standards of Care and Long Term Outcomes for Thalassemia and Sickle Cell Disease	59
	Satheesh Chonat and Charles T. Quinn	
4	Allogeneic/Matched Related Transplantation for β-Thalassemia and Sickle Cell Anemia	89
	Françoise Bernaudin, Corinne Pondarré, Claire Galambrun, and Isabelle Thuret	
5	Alternative Donor/Unrelated Donor Transplants for the β-Thalassemia and Sickle Cell Disease	123
	Courtney D. Fitzhugh, Allistair Abraham, and Matthew M. Hsieh	
6	Gene Addition Strategies for β-Thalassemia and Sickle Cell Anemia	155
	Alisa C. Dong and Stefano Rivella	
7	Reactivation of Fetal Hemoglobin for Treating β-Thalassemia and Sickle Cell Disease	177
	Shuaiying Cui and James Douglas Engel	
8	Genome Editing for the β-Hemoglobinopathies	203
	Matthew H. Porteus	

9 Gene and Cell Therapy for β -Thalassemia and Sickle Cell Disease with Induced Pluripotent Stem Cells (iPSCs): The Next Frontier 219
Eirini P. Papapetrou

Index. 241

Gene and Cell Therapies for Beta-Globinopathies

Malik, MD, P.; Tisdale, J. (Eds.)

2017, XII, 248 p. 16 illus., 12 illus. in color., Hardcover

ISBN: 978-1-4939-7297-5
