

# Contents

<b>1</b>	<b><math>\mathbb{R}^p \rightarrow \mathbb{R}</math> functions</b>	<b>1</b>
1.1	Euclidean Spaces	1
1.2	Real Functions of Several Variables and Their Graphs	3
1.3	Convergence of Point Sequences	5
1.4	Basics of Point Set Theory	8
1.5	Limits	20
1.6	Continuity	24
1.7	Partial Derivatives	30
1.8	Differentiability	35
1.9	Higher-Order Derivatives	46
1.10	Applications of Differentiation	52
1.11	Appendix: Tangent Lines and Tangent Planes	63
<b>2</b>	<b>Functions from <math>\mathbb{R}^p</math> to <math>\mathbb{R}^q</math></b>	<b>67</b>
2.1	Limits and Continuity	67
2.2	Differentiability	70
2.3	Differentiation Rules	74
2.4	Implicit and Inverse Functions	79
<b>3</b>	<b>The Jordan Measure</b>	<b>95</b>
3.1	Definition and Basic Properties of the Jordan Measure	95
3.2	The measure of a Few Particular Sets	106
3.3	Linear Transformations and the Jordan Measure	115
3.4	Appendix: The Measurability of Bounded Convex Sets	119
<b>4</b>	<b>Integrals of Multivariable Functions I</b>	<b>123</b>
4.1	The Definition of the Multivariable Integral	123
4.2	The Multivariable Integral on Jordan Measurable Sets	128
4.3	Calculating Multivariable Integrals	135
4.4	First Appendix: Proof of Theorem 4.12	146
4.5	Second Appendix: Integration by Substitution (Proof of Theorem 4.22)	148

<b>5</b>	<b>Integrals of Multivariable Functions II</b>	155
5.1	The Line Integral	155
5.2	Conditions for the Existence of the Primitive Function	163
5.3	Green's Theorem	175
5.4	Surface and Surface Area	183
5.5	Integral Theorems in Three Dimension	187
<b>6</b>	<b>Infinite Series</b>	193
6.1	Basics on Infinite Series	193
6.2	Operations on Infinite Series	197
6.3	Absolute and Conditionally Convergent Series	202
6.4	Other Convergence Criteria	209
6.5	The Product of Infinite Series	217
6.6	Summable Series	222
6.7	Appendix: On the History of Infinite Series	227
<b>7</b>	<b>Sequences and Series of Functions</b>	229
7.1	The Convergence of Sequences of Functions	229
7.2	The Convergence of Series of Functions	239
7.3	Taylor Series and Power Series	249
7.4	Abel Summation	264
7.5	Fourier Series	268
7.6	Further Applications	283
7.7	First Appendix: The Cauchy–Hadamard Formula	292
7.8	Second Appendix: Complex Series	295
7.9	Third Appendix: On the History of the Fourier Series	297
<b>8</b>	<b>Miscellaneous Topics</b>	303
8.1	Approximation of Sums	303
8.2	Approximation of Definite Integrals	311
8.3	Parametric Integrals	321
8.4	Sets with Lebesgue Measure Zero and the Lebesgue Criterion for Integrability	339
8.5	Two Applications of Lebesgue's Theorem	343
8.6	Some Applications of Integration in Number Theory	346
8.7	Brouwer's Fixed-Point Theorem	352
8.8	The Peano Curve	358
<b>9</b>	<b>Hints, Solutions</b>	361
	<b>Notation</b>	383
	<b>References</b>	385
	<b>Index</b>	387

Real Analysis

Series, Functions of Several Variables, and Applications

Laczkovich, M.; T. Sós, V.

2017, IX, 392 p. 44 illus., Hardcover

ISBN: 978-1-4939-7367-5
