1	Theory of Elasticity	1
1.1	Introduction	1
1.2	Definitions	2
1.3	Stress State	3
1.4	Engineering Stress State	7
1.4.1	Plane Conditions	11
1.5	Equilibrium Equations	11
1.6	Biharmonic Equation	14
1.7	The Airy Stress Function	17
1.7.1	Airy Power Series	18
1.8	Complex Variable Theory	26
1.8.1	Cauchy–Riemann Equations	27
1.8.2	Complex Potential Functions	28
1.9	Conformal Mapping	39
1.9.1	Cauchy Integral Formula	43
1.10	Problems	49
	References	52
2	Introduction to Fracture Mechanics	53
2.1	Introduction	53
2.2	Theoretical Strength	54
2.3	Stress Concentration Factor	58
2.4	Griffith Crack Theory	62
2.5	Strain Energy Release Rate	68
2.6	Grain-Boundary Strengthening	73
2.7	Problems	76
	References	76
3	Linear-Elastic Fracture Mechanics	79
3.1	Introduction	79
3.2	Modes of Loading	80
3.3	Westergaard Stress Function	82
3.3.1	Far-Field Boundary Conditions	85
3.3.2	Near-Field Boundary Conditions	86
3.4	Specimen Geometries	88

3.4.1	Through-Thickness Cracks	88
3.4.2	Elliptical Cracks	94
3.4.3	Cylindrical Pressure Vessels	96
3.4.4	Leak-Before-Break Criterion	107
3.4.5	Radial Cracks Around Cylinders	110
3.5	Fracture Control	113
3.6	Significance of Thickness	115
3.7	Fracture Tests	116
3.7.1	ASTM E399 Plane-Strain K_{IC} Test	117
3.7.2	ASTM E1820 K_I , J_I , and $CTOD$ Tests	119
3.7.3	Crack Plane Identification	123
3.8	Problems	125
	References	129
4	Linear-Elastic Field Equations	131
4.1	Introduction	131
4.2	Field Equations: Mode I	131
4.3	Field Equations: Mode II	137
4.4	Polar Coordinate Formulation	140
4.4.1	Mode I and Mode II Cases	140
4.4.2	Mode III Loading Case	147
4.5	Higher-Order Stress Field	151
4.6	Method of Conformal Mapping	155
4.6.1	Cauchy Integral Formula	159
4.6.2	Point Forces	176
4.6.3	Complex T-Stress	179
4.7	Problems	181
	References	183
5	Crack Tip Plasticity	187
5.1	Introduction	187
5.2	Crack Tip Stress State	188
5.3	The Plastic Zone Shape	189
5.4	Irwin's Approximation	191
5.5	Dugdale's Approximation	193
5.6	Yield Criteria	197
5.6.1	Von Mises Yield Criterion	197
5.6.2	Tresca Yield Criterion	198
5.7	Fracture Parameters	205
5.8	Crack Tip Opening Displacement	206
5.8.1	Crack Opening Displacement (COD) δ_5	214
5.8.2	Crack Tip Opening Angle (CTOA)	215
5.9	Problems	219
	References	222

6	The Energy Principle	227
6.1	Introduction	227
6.2	Energy Balance	228
6.3	Linear Compliance	230
6.4	Nonlinear Compliance	232
6.5	Traction Forces	233
6.6	Load and Displacement Control	236
6.7	Crack Resistance Curves	240
6.8	The J-Integral	242
6.9	The J-Integral Measurements	246
6.10	Tearing Modulus	250
6.11	Problems	254
	References	255
7	Elastic-Plastic Fracture Mechanics	257
7.1	Introduction	257
7.2	J-Controlled Crack Growth	258
7.3	Plastic Field Equations	259
	7.3.1 Strain Hardening Effects	268
	7.3.2 Near-Field J-Integral Approximation	269
	7.3.3 Far-Field J-Integral Approximation	273
7.4	Engineering Approach	274
	7.4.1 Practical Aspects	283
7.5	Problems	283
	References	285
8	Mixed-Mode Fracture Mechanics	289
8.1	Introduction	289
8.2	Elastic State of Stresses	290
8.3	Strain Energy Methodology	293
	8.3.1 Mode-Mode I and II	293
	8.3.2 Mode-Mode I and III	298
8.4	Principle Stress Criterion	299
8.5	Strain Energy Density Factor	301
8.6	Crack Branching	313
8.7	Wood	317
8.8	Problems	322
	References	323
9	Fatigue Crack Growth	327
9.1	Introduction	327
9.2	Cyclic Stress History	328
9.3	Fatigue Crack Initiation	331
9.4	Fatigue Crack Growth Rate	335
	9.4.1 Crack Closure	337
9.5	Fatigue Life Calculations	338

9.6	Crack Growth Rate Diagram	343
9.7	Weldments.....	348
9.8	Surface Fracture Appearances.....	350
9.9	Mixed-Mode Fatigue Loading.....	358
9.9.1	Crack Growth Rate Measurements	360
9.10	Stress-Induced Corrosion.....	362
9.11	Problems	367
	References.....	369
10	Fracture Toughness Correlations	373
10.1	Introduction	373
10.2	Failure Assessment Diagram	374
10.3	Grain Size Refinement.....	378
10.4	Indentation-Induced Cracking.....	380
10.5	Charpy Impact Testing.....	384
10.6	Dynamic Effects	387
10.7	Dynamic Strain Energy Release Rate	393
10.8	Ductile-to-Brittle Transition	395
10.9	Smart Hybrid Composites	402
10.10	Problems	404
	References.....	405
A	Metric Conversions	409
A.1	Fracture Toughness Data	412
	References.....	412
