----------------------	-----------

1 Overview of lymphoma	1
-------------------------------	----------

Jasmine Zain and Larry W Kwak

References	7
------------	---

2 Pathogenesis of lymphomas	11
------------------------------------	-----------

Raju K Pillai and Wing C Chan

Genetic alterations lead to development of lymphomas	11
--	----

Mechanisms of genetic alterations in B-cell lymphomas	13
---	----

Signaling pathways involved in development of B-cell lymphomas	14
--	----

Pathogenesis of T-cell and natural killer cell lymphomas	25
--	----

Pathogenesis of Hodgkin lymphoma	27
----------------------------------	----

Conclusions	28
-------------	----

References	29
------------	----

3 Classification of Hodgkin and non-Hodgkin lymphoma	33
---	-----------

Joo Y Song and Dennis D Weisenburger

Introduction	33
--------------	----

Clinical features in lymphoma	36
-------------------------------	----

New lymphoproliferative disorders with an indolent behavior	38
---	----

Large B-cell lymphomas	39
------------------------	----

Peripheral T-cell lymphomas	40
-----------------------------	----

Conclusion	42
------------	----

References	42
------------	----

Case Study Section One: Indolent B-Cell Lymphomas

4 Small B-cell lymphocytic lymphoma and chronic lymphocytic leukemia	47
---	-----------

Tanya Siddiqi and Steven T Rosen

Case presentation	47
-------------------	----

Introduction and epidemiology	48
-------------------------------	----

Work up and diagnosis	49
Recommended treatment and discussion:	53
Treatment components (systemic)	55
Sequencing of systemic treatment	64
Management of associated conditions and complications	68
Conclusions	70
References	70
5 Follicular lymphoma	75
<i>Alex F Herrera</i>	
Case presentation	75
Epidemiology	75
Pathology	76
Clinical presentation	76
Staging	77
Prognosis	77
Treatment of limited stage follicular lymphoma	79
Treatment of advanced stage follicular lymphoma	80
Treatment of relapsed or refractory follicular lymphoma	86
Hematopoietic stem cell transplantation for follicular lymphoma	89
Transformed follicular lymphoma	92
Case conclusion	92
References	93
6 Lymphoplasmacytic lymphoma in the era of next generation sequencing	97
<i>Michelle Afkhami, Tanya Siddiqi, and Steven T Rosen</i>	
Case presentation	97
Lymphoplasmacytic lymphoma	97
Work up, diagnosis, and treatment	98
Clinical and pathologic diagnosis of lymphoplasmacytic lymphoma	99
Molecular diagnostic features in the era of next generation sequencing	100
Treatment of primary and previously treated disease	103
Prognosis and conclusions	106
References	106

Case Study Section Two: Aggressive B-Cell Lymphomas

7	Mantle cell lymphoma	113
	<i>Elizabeth Budde</i>	
	Case presentation	113
	Disease overview	113
	Clinical presentation	114
	Diagnosis and staging	114
	Prognosis	115
	Frontline treatment	116
	Management of relapsed/refractory mantle cell lymphoma	118
	Case conclusion	120
	References	121
8	Burkitt lymphoma	123
	<i>Auayporn Nademanee</i>	
	Case presentation	123
	Introduction	124
	Pathology	124
	Differential diagnosis	125
	Clinical presentation	125
	Initial evaluation	126
	Treatment	126
	Central nervous system prophylaxis	130
	Stem cell transplantation	131
	Relapse or refractory disease	131
	Human immunodeficiency virus-positive Burkitt lymphoma	131
	Special considerations	132
	Conclusion	132
	References	137
9	Diffuse large B-cell lymphoma	139
	<i>Leslie Popplewell</i>	
	Case presentation	139
	Pathologic features	140

Staging and workup	142
Prognostic factors	142
Fluorodeoxyglucose-positron emission tomography	143
Initial therapy	143
Treatment of specific subtypes	145
Management of relapsed disease	145
High-dose therapy and autologous stem cell transplant	146
Allogeneic stem cell transplantation	148
New therapeutic targets	148
High grade B-cell lymphoma with MYC and BCL2 and/or BCL6 rearrangements	148
Case conclusion	150
References	151

Case Study Section Three: T-Cell Lymphomas

10 Cutaneous T-cell lymphoma 157

Belen Rubio Gonzalez, Steven T Rosen, and Christiane Querfeld

Case presentation	157
Primary cutaneous T-cell lymphomas (mycosis fungoides and Sézary syndrome)	158
Work up and diagnosis	158
Recommended treatment and discussion	164
Outcomes with standard treatment regimens	166
Case study follow-up	170
References	171

11 Systemic T-cell lymphoma 173

Jasmine Zain

Case presentation	173
Introduction	173
Peripheral T-cell lymphoma-not otherwise specified	177
Angioimmunoblastic T-cell lymphoma	179
Anaplastic large cell lymphoma	181
Adult T-cell leukemia/lymphoma	182
Hepatosplenic T cell lymphoma	184

Enteropathy-associated T-cell lymphoma	185
Subcutaneous panniculitis-like T-cell lymphoma	186
Epstein-Barr virus-associated T-cell and NK-cell proliferation	186
Extranodal natural killer-/T-cell lymphoma, nasal type, and other Epstein-Barr virus-positive T-/natural killer-cell neoplasms	187
Treatment guidelines for peripheral T-cell lymphoma	190
First-line therapy	190
Stem cell transplant as consolidation	192
Relapsed disease	194
Allogeneic stem cell transplant for relapsed disease	194
References	197

Case Study Section Four: Hodgkin Lymphoma

12 Hodgkin lymphoma 205

Robert Chen

Case presentation	205
Background	205
Diagnosis and prognosis	207
Early stage treatment (classical Hodgkin lymphoma)	209
Advanced stage treatment (classical Hodgkin lymphoma)	211
Elderly patients	212
Relapsed/refractory disease	213
Novel targeted agents	214
Long-term complications	216
References	217

Case Study Section Five: Lymphomas in Special Clinical Situations

13 Acquired immunodeficiency syndrome-related lymphoma 225

Joseph Alvarnas

Case presentation	225
Lymphoma risk and human immunodeficiency virus infection	225

Incidence and spectrum of lymphomas in human immunodeficiency virus-infected patients	226
Clinical presentation	228
Initial treatment of acquired immunodeficiency syndrome-related non-Hodgkin lymphoma	228
Management of human immunodeficiency virus-related Hodgkin lymphoma	232
Autologous transplant in patients with human immunodeficiency virus-related lymphomas	233
Allogeneic transplant for human immunodeficiency virus-infected patients with non-Hodgkin lymphoma	235
Management of combination antiretroviral therapy in patients with human immunodeficiency virus-related lymphomas	235
Conclusions	236
References	237
14 Central nervous system lymphoma	241
<i>Matthew Mei</i>	
Case presentation	241
Epidemiology	241
Clinical presentation and pathology	242
Workup and staging	243
Initial treatment	243
Case presentation continued	245
Patients with comorbidities	246
Response evaluation and surveillance	247
Treatment of relapsed or refractory primary central nervous system lymphoma	247
References	248
15 Conclusion	249
<i>Jasmine Zain and Larry W Kwak</i>	

Management of Lymphomas: A Case-Based Approach

Zain, J.; Kwak, L.W. (Eds.)

2017, XXII, 204 p. 36 illus., 26 illus. in color., Softcover

ISBN: 978-3-319-26825-5
