

# Contents

<b>1</b>	<b>Introduction.....</b>	<b>1</b>
<b>2</b>	<b>The Wall: Where Every Trace Begins .....</b>	<b>7</b>
2.1	Introduction.....	7
2.2	Wall Types.....	8
2.3	Surface Morphology .....	32
<b>3</b>	<b>Other Characters: Shape, Fillings and Further Micromorphological Characters .....</b>	<b>35</b>
3.1	Introduction.....	35
3.2	Shape.....	35
3.3	Fillings .....	43
3.4	Other Micromorphological Characters .....	50
3.4.1	Phytoliths .....	50
3.4.2	Micromorphological Evidence of Termite Activity in Laterites .....	52
<b>4</b>	<b>Classifications: The Utopia of Classifying the Unclassifiable .....</b>	<b>55</b>
4.1	Introduction.....	55
4.2	Classifications with More Biological Taste .....	57
4.3	Ethological Classifications.....	60
4.4	Ichnotaxonomy .....	65
4.5	When Ichnotaxonomy Becomes Problematic.....	67
<b>5</b>	<b>The Keys I: Celliformidae and Coprinisphaeridae.....</b>	<b>71</b>
5.1	Brief Introduction for Two Chapters.....	71
5.1.1	Those Left Behind.....	72
5.2	Key to Separate Ichnofamilies of Chambered Trace Fossils Occurring in Paleosols .....	73
5.3	Ichnofamily Celliformidae Genise (2000) .....	74
5.3.1	Diagnosis and Comments .....	74
5.3.2	Key to Separate the Ichnogenera of Celliformidae.....	74

5.3.3	<i>Cellicalichnus</i> Genise 2000 .....	74
5.3.4	<i>Celliforma</i> Brown 1934 .....	78
5.3.5	<i>Corimbatichnus</i> Genise and Verde 2000 .....	81
5.3.6	<i>Elipsoideichnus</i> Roselli 1987.....	81
5.3.7	<i>Palmiraichnus</i> Roselli 1987 .....	84
5.3.8	<i>Rosellichnus</i> Genise and Bown 1996.....	86
5.3.9	<i>Uruguay</i> Roselli 1939.....	87
5.4	Ichnofamily Coprinisphaeridae Genise 2004.....	88
5.4.1	Diagnosis and Comments .....	88
5.4.2	Key to Separate the Ichnogenera of Coprinisphaeridae ....	91
5.4.3	<i>Coprinisphaera</i> Sauer 1955 .....	91
5.4.4	<i>Chubutulithes</i> Von Ihering 1922 .....	97
5.4.5	<i>Eatonichnus</i> Bown et al. 1997 .....	97
5.4.6	<i>Feoichnus</i> Krause et al. 2008 .....	98
5.4.7	<i>Monesichnus</i> Roselli 1987 .....	100
5.4.8	<i>Quirogaichnus</i> Laza 2006.....	100
5.4.9	<i>Rebuffoichnus</i> Roselli 1987 .....	101
5.4.10	<i>Teisseirei</i> Roselli 1939.....	104
<b>6</b>	<b>The Keys II: Krausichnidae and Pallichnidae .....</b>	<b>107</b>
6.1	Ichnofamily Krausichnidae Genise 2004.....	107
6.1.1	Diagnosis and Comments .....	107
6.1.2	Key to Separate the Ichnogenera of Krausichnidae.....	108
6.1.3	<i>Archeoentomichnus</i> Hasiotis and Dubiel 1995 .....	109
6.1.4	<i>Attaichnus</i> Laza 1982.....	109
6.1.5	<i>Barberichnus</i> Laza 2006.....	110
6.1.6	<i>Coatonichnus</i> Düringer et al. 2007.....	112
6.1.7	<i>Daimoniobarax</i> Smith et al. 2011 .....	112
6.1.8	<i>Fleaglellius</i> Genise and Bown 1994.....	114
6.1.9	<i>Krausichnus</i> Genise and Bown 1994.....	116
6.1.10	<i>Masrichnus</i> Bown 1982.....	116
6.1.11	<i>Microfavichnus</i> Düringer et al. 2007 .....	118
6.1.12	<i>Parowanichnus</i> Bown et al. 1997 .....	119
6.1.13	<i>Socialites</i> Roberts and Tapanila 2006.....	120
6.1.14	<i>Syntermesichnus</i> Bown and Laza 1990 .....	122
6.1.15	<i>Tacuruichnus</i> Genise 1997.....	122
6.1.16	<i>Termitichnus</i> Bown 1982 .....	123
6.1.17	<i>Vondrichnus</i> Genise and Bown 1994.....	127
6.2	Ichnofamily Pallichnidae Genise 2004 .....	129
6.2.1	Diagnosis and Comments .....	129
6.2.2	Key to Separate the Ichnogenera of Pallichnidae .....	129
6.2.3	<i>Fictovichnus</i> Johnston et al. 1996.....	129
6.2.4	<i>Pallichnus</i> Retallack 1984.....	132
6.2.5	<i>Scaphichnium</i> Bown and Kraus 1983.....	132

<b>7</b>	<b>Dung Beetle Masonry .....</b>	<b>135</b>
7.1	Historical Perspective of Dung Beetle Behavior and Traces: From the Ancient Egyptians to Fabre .....	135
7.2	The Modern Classifications of Nesting Patterns and Behavioral Characters .....	152
7.3	Some Ecological Preferences of Dung Beetles.....	169
<b>8</b>	<b>Trace Fossils of Dung Beetles.....</b>	<b>173</b>
8.1	Introduction.....	173
8.2	<i>Coprinisphaera</i> .....	173
8.3	<i>Quirogaichnus</i> .....	183
8.4	<i>Eatonichnus</i> .....	184
8.5	<i>Chubutolithes</i> .....	187
8.6	<i>Pallichnus</i> .....	189
8.7	<i>Scaphichnium</i> and Other Meniscate Burrows .....	190
8.8	Brief History of Scarabaeinae Coprophagy and Necrophagy as Reflected by Trace Fossils.....	191
<b>9</b>	<b>Basic Architecture of Soil Nesting Wasps and Bees .....</b>	<b>193</b>
9.1	Introduction.....	193
9.2	Basic Architecture of Solitary Hymenopterans.....	196
9.3	Malyshev's Phases and Wasp Behavior .....	198
9.4	Bee Architecture.....	206
<b>10</b>	<b>Wasp and Bee Trace Fossils .....</b>	<b>219</b>
10.1	Introduction.....	219
10.2	Wasp Trace Fossils in Paleosols.....	220
10.2.1	<i>Fictovichnus sciuttoi</i> and <i>Fictovichnus aragon</i> .....	220
10.3	Bee Trace Fossils in Paleosols .....	225
10.3.1	<i>Celliforma</i> .....	226
10.3.2	<i>Palmiraichnus</i> .....	229
10.3.3	<i>Corimbatichnus</i> .....	233
10.3.4	<i>Rosellichnus</i> .....	235
10.3.5	<i>Uruguay</i> .....	236
10.3.6	<i>Elipsoideichnus</i> .....	241
10.3.7	<i>Cellicalichnus</i> .....	242
<b>11</b>	<b>Blueprints of Termite and Ant Nests .....</b>	<b>247</b>
11.1	Introduction.....	247
11.2	Termite Nests .....	249
11.3	Ant Nests.....	265
<b>12</b>	<b>The Trace Fossil Record of Eusociality in Ants and Termites .....</b>	<b>285</b>
12.1	Introduction.....	285
12.2	Reliability of Named Krausichnidae.....	288
12.3	<i>Archeoentomichnus</i> .....	291
12.4	<i>Attaichnus</i> .....	291

12.5	<i>Barberichnus</i> .....	293
12.6	<i>Coatonichnus</i> .....	295
12.7	<i>Daimoniobarax</i> .....	296
12.8	<i>Fleaglellius</i> .....	297
12.9	<i>Krausichnus</i> .....	299
12.10	<i>Masrichnus</i> .....	301
12.11	<i>Microfavichnus</i> .....	301
12.12	<i>Parowanichnus</i> .....	302
12.13	<i>Socialites</i> .....	304
12.14	<i>Syntermesichnus</i> .....	304
12.15	<i>Tacuruichnus</i> .....	305
12.16	<i>Termitichnus</i> .....	306
12.17	<i>Vondrichnus</i> .....	310
<b>13</b>	<b>Other Insect Trace Fossils in Paleosols: Cicadas, Chafers, Weevils, and Sphinx Moths</b> .....	<b>313</b>
13.1	Introduction .....	313
13.2	Cicadas .....	314
13.2.1	Trace Fossils of Cicadas .....	319
13.3	Chafers and Weevils .....	330
13.3.1	Trace Fossils of Chafers and Weevils .....	337
13.4	Sphinx Moths and its Trace Fossil: <i>Teisseirei barattinia</i> .....	345
<b>14</b>	<b>Traces from Nest Invaders</b> .....	<b>353</b>
14.1	Introduction .....	353
14.2	The Fellowship of the Smoking Dung .....	355
14.3	Bees and Wasps in the Neighborhood .....	358
14.4	The Trace Fossil Record of Parasitoidism, Cleptoparasitism and Detritivory Reflected By Insect Trace Fossils in Paleosols .....	369
14.4.1	Key to Separate the Ichnogenera of Lazaichnidae .....	369
14.4.2	<i>Tombownichnus</i> Mikuláš and Genise .....	369
14.4.3	<i>Lazaichnus</i> Mikuláš and Genise .....	376
14.4.4	Unnamed Records of Trace Fossils in Insect Trace Fossils in Paleosols .....	379
<b>15</b>	<b>Soil Neighbors I: Traces of Other Organisms in Paleosols. Crustaceans and Earthworms</b> .....	<b>383</b>
15.1	Crustaceans .....	383
15.2	Earthworms .....	404
<b>16</b>	<b>Soil Neighbors II. Traces of Other Organisms in Paleosols. Vertebrates and Roots</b> .....	<b>417</b>
16.1	Vertebrates .....	417
16.2	Roots .....	431

<b>17</b>	<b>Insect Trace Fossils in Other Substrates than Paleosols I. Plant Remains.....</b>	<b>447</b>
17.1	Introduction.....	447
17.2	Insect Trace Fossils in Wood .....	447
17.3	Insect Trace Fossils in Leaves.....	458
17.3.1	Excisions.....	460
17.3.2	Incisions .....	465
17.3.3	Galls.....	467
17.3.4	Mines.....	471
17.4	Insect Trace Fossils in Other Plant Remains.....	474
<b>18</b>	<b>Insect Trace Fossils in Substrates Other than Paleosols II. Bones, Caddisfly Cases, Trackways, Imprints and Aerial Nests .....</b>	<b>477</b>
18.1	Insect Trace Fossils in Bones.....	477
18.2	Fossil Caddisfly Cases .....	482
18.3	Insect Trackways.....	490
18.4	Insect Imprints .....	501
18.5	Aerial Insect Nests .....	502
<b>19</b>	<b>Trace Fossils as the Physical Evidence of Evolution of Insect Behavior .....</b>	<b>507</b>
19.1	Introduction.....	507
19.2	A Brief and Biased Early History of How Ideas on Evolution of Behavior Evolved .....	508
19.3	Ethological Studies in Hymenoptera .....	517
19.4	Some Hits in the Most Recent History of the Evolution of Behavior up to the Crossroad with Cladistics .....	521
19.5	The Crossroad Between Cladistics and Evolution of Behavior.....	522
19.6	The Crossroad Between Cladistics and Paleontology .....	524
19.7	The Ichnological Approach of Evolution of Behavior.....	525
19.8	Brief History of the Meeting Point among Ichnology, Cladistics, and Evolution of Behavior in Insects .....	532
<b>20</b>	<b>(The Most Remarkable Insect) Ichnofabrics in Paleosols.....</b>	<b>537</b>
20.1	Methodological Introduction .....	537
20.2	The Paleogene Asencio Formation of Uruguay and Other Study Cases of Paleosol Tiering and Cross-Cuttings Related to Environmental Changes.....	549
20.3	The Middle Eocene–Early Miocene Sarmiento Formation of Patagonia. Cross-Cuttings Related to Cleptoparasitism or Detritivory .....	554
20.4	The Quaternary of Canary Islands. Self Cross-Cuttings Related to Density of Trace Fossils .....	556

<b>21</b>	<b>Paleosol Ichnofacies .....</b>	<b>559</b>
21.1	Introduction.....	559
21.2	The Paleozoic Beginning of Paleosol Ichnofacies.....	560
21.3	The Mesozoic Born Paleosol Ichnofacies.....	565
21.4	The Cenozoic Born Paleosol Ichnofacies .....	572
<b>22</b>	<b>Paleoenvironmental Analysis and Ichnoentomological Synthesis .....</b>	<b>579</b>
22.1	Introduction.....	579
22.2	Facing the Ghost of Waterlogging .....	583
22.3	Increasing the Complexity of Interpretations. Gran Barranca and One of the Oldest Grassy Open Habitats .....	587
22.4	Tracking Anthropoid Evolution in Africa and its Controversial Paleoenvironments with Insect Trace Fossils .....	593
22.5	The Ichnoentomological Synthesis.....	601
	<b>Appendix.....</b>	<b>607</b>
	<b>References.....</b>	<b>623</b>

Ichnoentomology

Insect Traces in Soils and Paleosols

Genise, J.F.

2017, XXVIII, 695 p. 397 illus., 289 illus. in color.,

Hardcover

ISBN: 978-3-319-28208-4
