

Contents

Part I Process and Design

1	Overview of the Interconnect Problem	3
	Ahmet Ceyhan and Azad Naeemi	
2	Overview of Carbon Nanotube Interconnects	37
	A. Srivastava, X.H. Liu, and Y.M. Banadaki	
3	Overview of Carbon Nanotube Processing Methods	81
	Franz Kreupl	
4	Electrical Conductivity of Carbon Nanotubes: Modeling and Characterization	101
	Antonio Maffucci, Sergey A. Maksimenko, Giovanni Miano, and Gregory Ya. Slepyan	
5	Computational Studies of Thermal Transport Properties of Carbon Nanotube Materials	129
	Leonid V. Zhigilei, Richard N. Salaway, Bernard K. Wittmaack, and Alexey N. Volkov	

Part II Applications

6	Overview of Carbon Nanotubes for Horizontal On-Chip Interconnects	165
	Jean Dijon	
7	Carbon Nanotubes as Vertical Interconnects for 3D Integrated Circuits	195
	Sten Vollebregt and Ryoichi Ishihara	
8	Carbon Nanotubes as Microbumps for 3D Integration	215
	Dominique Baillargeat and E.B.K. Tay	

9	Electrothermal Modeling of Carbon Nanotube-Based TSVs	247
	Wen-Yan Yin, Wen-Sheng Zhao, and Wenchao Chen	
10	Exploring Carbon Nanotubes for 3D Power Delivery Networks	283
	Aida Todri-Sanial	
11	Carbon Nanotubes for Monolithic 3D ICs	315
	Max Marcel Shulaker, Hai Wei, Subhasish Mitra, and H.-S. Philip Wong	

Carbon Nanotubes for Interconnects

Process, Design and Applications

Todri-Sanial, A.; Dijon, J.; Maffucci, A. (Eds.)

2017, XII, 333 p. 167 illus., 133 illus. in color.,

Hardcover

ISBN: 978-3-319-29744-6
