

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Cold Spray Coating-Basic Principals	1
1.2	Cold Spray Apparatus	2
1.3	Materials for Cold Spray	4
1.3.1	Metals	4
1.3.2	Metal Matrix Composites	8
1.3.3	Ceramics	10
1.3.4	Polymers	11
1.3.5	Nanostructured Powders	13
1.3.6	Path Forward	14
	References	16
<b>2</b>	<b>Experiments</b>	21
2.1	Surface Treatment	21
2.1.1	Cold Spray Coating	21
2.1.2	Shot Peening	21
2.2	Characterization	22
2.2.1	Micro-Structural Observation	22
2.2.2	Hardness	22
2.2.3	XRD Measurement of Residual Stress	23
2.2.4	Roughness Measurement	26
2.2.5	Fatigue Test	28
2.2.6	Bond Strength and Tubular Coating Tensile Test	29
2.2.7	Contact Angle Measurement	31
	References	31
<b>3</b>	<b>Modeling Cold Spray</b>	33
3.1	Impact Phenomenon: Lagrangian Approach	33
3.1.1	Background	33
3.1.2	Concluding Remarks	36

3.2	Impact Phenomenon: Hybrid Lagrangian-Analytical Approach . . . . .	36
3.2.1	Analytical Model. . . . .	37
3.2.2	Finite Element Simulation. . . . .	40
3.2.3	Calculating Critical and Erosion Velocities. . . . .	43
3.2.4	Results and Discussion . . . . .	44
3.2.5	Concluding Remarks. . . . .	49
3.3	Eulerian Simulation . . . . .	50
3.3.1	Fundamental Assumption . . . . .	51
3.3.2	Eulerian Model, Initial and Boundary Conditions . . . . .	51
3.3.3	Material Behavior . . . . .	52
3.3.4	General Deformation Behavior . . . . .	53
3.3.5	Plastic Strain . . . . .	55
3.3.6	Temperature . . . . .	56
3.3.7	Material Flow Velocity . . . . .	58
3.3.8	Discussion. . . . .	59
3.3.9	Concluding Remarks. . . . .	60
3.4	Damage Based Simulation of Consolidated Coating. . . . .	61
3.4.1	Indentation Across Size Scales . . . . .	61
3.4.2	Finite Element Model of Consolidated Coating. . . . .	64
3.4.3	Results and Discussion . . . . .	68
3.4.4	Concluding Remarks. . . . .	72
	References. . . . .	73
4	<b>Applications</b> . . . . .	77
4.1	Repair. . . . .	77
4.1.1	Cavity Filling Using Cold Spray. . . . .	79
4.1.2	Fatigue Behavior for Structural Applications. . . . .	82
4.1.3	Hybrid Treatment for Fatigue Life Enhancement . . . . .	88
4.2	Additive Manufacturing . . . . .	99
4.2.1	Cold Spray, a Low Temperature, Solid State, Additive Manufacturing Process . . . . .	101
4.2.2	Challenges. . . . .	102
4.2.3	Concluding Remarks. . . . .	104
4.3	Porous Coating/Cellular Structure by Subcritical Cold Spray . . . . .	105
4.3.1	New Deposition Window for Cold Spray . . . . .	106
4.3.2	Materials and Methods . . . . .	106
4.3.3	Microscopic Observation. . . . .	107
4.3.4	Cohesion Strength and Fracture Analysis . . . . .	108
4.3.5	Surface Characterization . . . . .	110
4.3.6	Concluding Remarks. . . . .	111
4.4	Cold Spray to Mitigate Corrosion. . . . .	111
4.4.1	Deposition Temperature and Pressure . . . . .	112
4.4.2	Particle Size and Coating Thickness . . . . .	114
4.4.3	Carrier Gas . . . . .	115

- 4.4.4 Post Treatment . . . . . 116
- 4.4.5 Co-Deposition of Metals/Alloys  
with Ceramics/Intermetallics . . . . . 117
- 4.4.6 Path Forward. . . . . 119
- References. . . . . 121

Powder Consolidation Using Cold Spray  
Process Modeling and Emerging Applications

Moridi, A.

2017, XVII, 127 p. 52 illus., 20 illus. in color., Softcover

ISBN: 978-3-319-29961-7
