

Contents

Part I Nonlinear Control Systems

1	Controlled Invariant Distributions and Differential Properties	3
	Arjan van der Schaft	
2	Some Recent Results on Distributed Control of Nonlinear Systems	21
	Tengfei Liu and Zhong-Ping Jiang	
3	Convergent Systems: Nonlinear Simplicity	51
	Alexey Pavlov and Nathan van de Wouw	

Part II Synchronization in Networked Systems

4	Synchronisation and Emergent Behaviour in Networks of Heterogeneous Systems: A Control Theory Perspective	81
	Elena Panteley and Antonio Loria	
5	Anticipating Synchronization and State Predictor for Nonlinear Systems	103
	Toshiki Oguchi	
6	Delays Effects in Dynamical Systems and Networks: Analysis and Control Interpretations	123
	Wim Michiels	
7	Emergence of Oscillations in Networks of Time-Delay Coupled Inert Systems	137
	Erik Steur and Alexander Pogromsky	

Part III Control of Nonlinear Mechanical Systems

8 Leader–Follower Synchronisation for a Class of Underactuated Systems	157
Dennis J.W. Belleter and Kristin Y. Pettersen	
9 Position Control via Force Feedback in the Port-Hamiltonian Framework	181
Mauricio Muñoz-Arias, Jacqueliën M.A. Scherpen and Daniel A. Dirks	
10 Endogenous Configuration Space Approach: An Intersection of Robotics and Control Theory	209
Krzysztof Tchoń	

Nonlinear Systems

Techniques for Dynamical Analysis and Control

van de Wouw, N.; Lefeber, E.; Lopez Arteaga, I. (Eds.)

2017, XIV, 234 p. 44 illus., 19 illus. in color., Softcover

ISBN: 978-3-319-30356-7
