## CLINICALLY ISOLATED SYNDROME

|                               |          |
|-------------------------------|----------|
| <b>Case 1: Optic neuritis</b> | <b>3</b> |
| History                       | 3        |
| Examination                   | 3        |
| Investigations                | 4        |
| Outcome                       | 4        |
| Discussion                    | 4        |
| Clinical pearls               | 9        |
| References                    | 10       |

|                         |           |
|-------------------------|-----------|
| <b>Case 2: Myelitis</b> | <b>11</b> |
| History                 | 11        |
| Examination             | 11        |
| Investigations          | 12        |
| Outcome                 | 13        |
| Discussion              | 14        |
| Clinical pearls         | 16        |
| References              | 16        |

## EARLY MULTIPLE SCLEROSIS

|                                            |           |
|--------------------------------------------|-----------|
| <b>Case 3: Disease-modifying therapies</b> | <b>19</b> |
| History                                    | 19        |
| Examination                                | 19        |
| Investigations                             | 19        |
| Outcome                                    | 20        |
| Discussion                                 | 20        |
| Clinical pearls                            | 25        |
| References                                 | 26        |

**Case 4: Management of relapses with corticosteroids 27**

|                 |    |
|-----------------|----|
| History         | 27 |
| Examination     | 27 |
| Investigations  | 28 |
| Outcome         | 28 |
| Discussion      | 28 |
| Clinical pearls | 31 |
| References      | 31 |

**ESTABLISHED RELAPSING-REMITTING  
MULTIPLE SCLEROSIS****Case 5: Breakthrough disease 35**

|                 |    |
|-----------------|----|
| History         | 35 |
| Examination     | 36 |
| Investigations  | 36 |
| Outcome         | 36 |
| Discussion      | 37 |
| Clinical pearls | 41 |
| References      | 42 |

**Case 6: Progressive multifocal leukoencephalopathy 43**

|                 |    |
|-----------------|----|
| History         | 43 |
| Examination     | 43 |
| Investigations  | 44 |
| Outcome         | 45 |
| Discussion      | 45 |
| Clinical pearls | 48 |
| References      | 49 |

**Case 7: Induction therapy 51**

|                |    |
|----------------|----|
| History        | 51 |
| Examination    | 52 |
| Investigations | 52 |
| Outcome        | 53 |
| Discussion     | 53 |

|                 |    |
|-----------------|----|
| Clinical pearls | 56 |
| References      | 56 |

## PRIMARY PROGRESSIVE MULTIPLE SCLEROSIS

### **Case 8: Diagnosing primary progressive multiple sclerosis 61**

|                 |    |
|-----------------|----|
| History         | 61 |
| Examination     | 62 |
| Investigations  | 62 |
| Outcome         | 64 |
| Discussion      | 64 |
| Clinical pearls | 67 |
| References      | 68 |

### **Case 9: Symptomatic care in primary progressive multiple sclerosis 69**

|                 |    |
|-----------------|----|
| History         | 69 |
| Examination     | 69 |
| Investigations  | 70 |
| Outcome         | 70 |
| Discussion      | 70 |
| Clinical pearls | 73 |
| References      | 73 |

## SECONDARY PROGRESSIVE MULTIPLE SCLEROSIS

### **Case 10: Diagnosing secondary progressive multiple sclerosis 77**

|                 |    |
|-----------------|----|
| History         | 77 |
| Examination     | 78 |
| Investigations  | 78 |
| Outcome         | 78 |
| Discussion      | 78 |
| Clinical pearls | 82 |
| References      | 82 |

|                                                                   |                |
|-------------------------------------------------------------------|----------------|
| <b>Case 11: Walking disability in multiple sclerosis</b>          | <b>85</b>      |
| History                                                           | 85             |
| Examination                                                       | 85             |
| Outcome                                                           | 86             |
| Discussion                                                        | 86             |
| Clinical pearls                                                   | 89             |
| References                                                        | 89             |
| <br><b>Case 12: Cognitive impairment</b>                          | <br><b>91</b>  |
