

Contents

1	Introduction	1
1.1	Context	1
1.2	Motivation	3
1.3	Focus of the Book	5
1.4	Organization of the Book	8
	Bibliography	9
2	Service Control Paradigms and Network Architectures	11
2.1	Introduction	11
2.2	Services	13
2.3	Interaction and Control Paradigms	17
2.4	Network Architectures and Distributed Platforms	24
2.4.1	Distributed Platforms as a Means to Cope with Network Fallacies	25
2.4.2	Control Paradigms and Network Architectures	27
2.5	Service Architectures	35
2.5.1	The Web and IT Views on Service Architectures	35
2.5.2	The Network Intelligence View on Service Architectures	39
2.5.3	The Peer-to-Peer View on Service Architectures	41
2.6	Findings	45
	Bibliography	46
3	Technological Evolution of the ICT Sector	53
3.1	Introduction	53
3.2	The ICT Ecosystem	54
3.3	Data Center Evolution	57
3.4	Resource Virtualization	60
3.5	Distributed Applications and Technologies	62
3.6	Harvesting Data: Big Data and Personal Data	65
3.7	Disruptions in Identity Management	67

3.8	Cloud Computing and Beyond	69
3.8.1	A Market-Driven Evolution of Cloud Computing	72
3.8.2	Some Technology Trends in Cloud Computing	72
3.9	Terminals and Devices Evolution	80
3.10	Findings	82
	Bibliography	84
4	The New Network	89
4.1	Introduction	89
4.2	Ossification of the Internet, and the Future Internet	91
4.3	Virtualized Networks	95
4.4	Toward Software-Defined Networks	97
4.5	Information Centric Networks	99
4.6	Cognitive Networks	102
4.6.1	General Principles	105
4.7	Disruptive Approaches	107
4.7.1	Local Area Networks	108
4.7.2	Community Networks	108
4.7.3	Military Communication (MilCom)	109
4.8	Findings	110
	Bibliography	112
5	Emerging Services	115
5.1	Introduction	115
5.2	New Communication Services	118
5.3	From Cloud to Everything as a Services (XaaS)	124
5.3.1	Cloud Computing Services from a Telco Perspective	124
5.3.2	On the Cloud Business Ecosystem	125
5.3.3	On the Cloud Technical Framework	129
5.3.4	Examples of Telco Services in a Cloud Context	131
5.3.5	An Agenda for Telco-Oriented Cloud Platforms	135
5.4	Bank of User Data	136
5.4.1	The Value of (User) Data	137
5.4.2	Toward an Architecture for Dealing with Aggregated Data	139
5.5	Smart Environments	142
5.6	Internet with Things	146
5.6.1	The Value of the Internet of Things	147
5.6.2	Toward a Platform for the Internet with Things	149
5.6.3	Virtualization-Enabled Scenarios	155
5.6.4	Virtual Continuum	155
5.6.5	Virtual Terminal	157
5.7	Findings	160
	Bibliography	163

- 6 TelCos Approach to Services 167**
 - 6.1 Introduction 167
 - 6.2 The Network Intelligence Legacy 169
 - 6.3 About Network APIs 176
 - 6.4 The Recurring Myth of Quality of Service and Quality
of Experience 180
 - 6.5 Conclusions 182
- Bibliography 184

Networks and New Services: A Complete Story

Minerva, R.; Crespi, N.

2017, XIX, 186 p. 90 illus., 83 illus. in color., Hardcover

ISBN: 978-3-319-33993-1
