

# Contents

---

<b>1</b>	<b>Introduction.....</b>	<b>1</b>
1.1	Initial Situation.....	2
1.2	Motivation and Purpose of This Work.....	6
1.3	Structure of This Work.....	8
1.4	Who Should Read This Book.....	11
1.5	Used Conventions.....	11
1.6	Software Requirements.....	12
1.7	Web Pages and Contact.....	12
<b>2</b>	<b>Writing Code for Scientific Software.....</b>	<b>13</b>
2.1	Scientific Software as It Is in Most Cases.....	14
2.2	A Suitable Programming Language.....	19
2.3	A Coding Style Guide.....	24
2.3.1	An Impression of Coding Layout.....	27
2.3.2	An Impression of Coding Policies.....	30
2.4	Including Legacy Code.....	39
2.5	Documentation.....	47
2.5.1	Documentation for the Development Team.....	48
2.5.2	Documentation for the Users.....	56
2.5.3	Documentation for Administration and Other Scientists.....	60
2.5.4	Documentation Landscape.....	60
2.6	Code Testing and Code Inspections.....	62
2.6.1	Code Quality Metrics.....	64
2.6.2	Dynamic Code Testing.....	68
2.6.3	Static Code Inspections.....	84
2.6.4	Dynamic Code Analysis.....	86
2.6.5	Testing Landscape.....	96
2.7	Version Control.....	97
2.7.1	A Suitable Project Directory Tree.....	98
2.7.2	A Suitable Version Control System.....	100
2.8	Continuous Integration.....	109
2.9	Agile Software Development.....	117
2.10	Summary.....	128
2.10.1	What Did We Learn?.....	128
2.10.2	How Did We Use the Contents Learned?.....	129
2.11	Questions.....	129
<b>3</b>	<b>Using a Code Toolbox.....</b>	<b>131</b>
3.1	The Idea Behind a Code Toolbox.....	132
3.2	Well-Tested Modules and Components.....	144
3.3	Generative Programming.....	148
3.3.1	Classic Solutions for Interprocess Communication (IPC).....	149
3.3.2	Remote Procedure Calls.....	168
3.3.3	Extending Generative Programming for Interprocess Communication.....	181
3.4	A Rudimentary Middleware for Controlling of Distributed Systems.....	236
3.5	Summary.....	243
3.5.1	What Did We Learn?.....	243
3.5.2	How Did We Use the Contents Learned?.....	244
3.6	Questions.....	244

<b>4</b>	<b>Controlling a Laser Ranging System .....</b>	<b>247</b>
4.1	Principles of Laser Ranging Systems.....	248
4.2	The Laser Ranging System as an Autonomous Production Cell .....	253
4.2.1	Distributed Hardware Control .....	254
4.2.2	The Construction of the Autonomous Production Cell .....	277
4.3	User Interfacing.....	283
4.4	Autonomous Coordination Cell .....	300
4.5	Autonomous Hardware Control Cells .....	332
4.6	Autonomous Data Management Cell .....	338
4.7	Autonomous System Monitoring and Safety Cell .....	369
4.8	Summary.....	390
4.8.1	What Did We Learn? .....	390
4.8.2	How Did We Use the Contents Learned? .....	391
4.9	Questions.....	391
<b>5</b>	<b>Controlling a VLBI System Remotely .....</b>	<b>395</b>
5.1	Autonomous Production Cells as Parts of Multi-agent Systems .....	396
5.2	Principles of Very Long Baseline Interferometry.....	400
5.3	The Used Control System for VLBI: The NASA Field System .....	409
5.4	Extend Existing Control Systems with Multi-agent Abilities .....	415
5.5	Security for the Controlled Systems .....	431
5.5.1	Security for Internal Local Access to a Computer.....	433
5.5.2	Security for External Accesses to a Computer .....	438
5.5.3	Security for a Complete Distributed System .....	457
5.5.4	Security for a Complete Observatory .....	466
5.5.5	On-the-Fly Management of Temporary SSH Tunnels .....	469
5.6	Summary.....	481
5.6.1	What Did We Learn? .....	481
5.6.2	How Did We Use the Contents Learned? .....	482
5.7	Questions.....	482
<b>6</b>	<b>Coordination, Communication, and Automation for the GGOS .....</b>	<b>483</b>
6.1	The Global Geodetic Observing System (GGOS) at a Glance .....	484
6.2	Operational Deficits of GGOS.....	488
6.3	Coordination, Control, and Operation of the Terrestrial GGOS Infrastructure .....	491
6.4	Communication on GGOS Networks .....	494
6.5	Automation as Key to Deal with 24/7 .....	504
6.6	Summary.....	507
6.6.1	What Did We Learn? .....	507
6.6.2	How Did We Use the Contents Learned? .....	507
6.7	Questions.....	508
<b>7</b>	<b>Outlook.....</b>	<b>509</b>
7.1	GGOS Operations as a Revolution.....	510
	<b>Service Part</b>	
	Appendix: A Style Guide for Geodetic Software in C and C++.....	514
	References.....	524
	Index .....	531

Applied Computer Science for GGOS Observatories  
Communication, Coordination and Automation of Future  
Geodetic Infrastructures

Neidhardt, A.N.J.

2017, XV, 546 p. 244 illus., 165 illus. in color.,

Hardcover

ISBN: 978-3-319-40137-9
