

# Contents

<b>1</b>	<b>Lightweight Electric Vehicles—A Good Environmental Choice?</b>	<b>1</b>
1.1	Relevance and Environmental Burdens of Vehicles	1
1.2	Research Objective and Structure	4
	References	6
<b>2</b>	<b>Electric Vehicles, Lightweight Design and Environmental Impacts</b>	<b>9</b>
2.1	Electric Vehicles	9
2.1.1	Components and Functioning of Electric Vehicles	9
2.1.2	Energy Consumption of Electric Vehicles in Use Phase	11
2.2	Lightweight Design for Vehicle Engineering	16
2.2.1	Lightweight Design	16
2.2.2	Material Lightweight Design	18
2.3	Environmental Impacts	20
2.3.1	Life Cycle of Electric Vehicles	20
2.3.2	Sustainable Development and Environmental System Analysis Tools	22
2.3.3	Life Cycle Assessment	24
2.4	Environmental Impact of Lightweight Electric Vehicles	30
2.4.1	Environmental Impact of Electric Vehicles	30
2.4.2	Environmental Impact of Lightweight Materials	33
2.4.3	Environmental Impact of Lightweight Electric Vehicles	34
	References	36
<b>3</b>	<b>State of Research on the Environmental Assessment of Electric and Lightweight Vehicles</b>	<b>41</b>
3.1	Discussion of Existing Approaches	41
3.1.1	LCA Guidelines for Vehicles	41
3.1.2	LCA Studies on Electric Vehicles	44

3.1.3	LCA Studies on Conventional Lightweight Vehicles . . . . .	47
3.1.4	LCA Studies on Lightweight Electric Vehicles . . . . .	49
3.2	Comparative Assessment of Existing Approaches . . . . .	50
3.2.1	Criteria for Comparative Assessment . . . . .	50
3.2.2	Identification of Research Demand . . . . .	52
	References . . . . .	56
<b>4</b>	<b>Concept for the Environmental Assessment of Lightweight</b>	
	<b>Electric Vehicles . . . . .</b>	<b>59</b>
4.1	Objective and Requirements . . . . .	59
4.1.1	Objective . . . . .	59
4.1.2	Requirements . . . . .	60
4.2	Concept . . . . .	61
4.3	System Description . . . . .	63
4.3.1	Use Pattern. . . . .	63
4.3.2	Regional Influencing Factors . . . . .	66
4.3.3	Lightweight Design . . . . .	67
4.3.4	Energy Consumption . . . . .	67
4.4	Modelling. . . . .	67
4.4.1	Energy Consumption of Electric Vehicles Depending on Terms of Use. . . . .	68
4.4.2	Energy Reduction Value of Electric Vehicles . . . . .	75
4.5	Visualization. . . . .	80
4.5.1	Regional Differences . . . . .	80
4.5.2	Impact of Lightweight Design. . . . .	82
4.5.3	Impact Categories . . . . .	84
4.6	Implementation . . . . .	85
4.6.1	Software Solutions . . . . .	85
4.6.2	Data and Data Processing. . . . .	86
4.6.3	Country-Specific Electricity Mixes . . . . .	87
4.6.4	Vehicle Data . . . . .	88
4.6.5	Thermo-isopleth Diagrams . . . . .	88
	References . . . . .	90
<b>5</b>	<b>Case Studies on the Comparison of (Lightweight) Electric</b>	
	<b>Vehicles with Conventional and Reference Electric Vehicles . . . . .</b>	<b>93</b>
5.1	Comparison of Electric Vehicles and Conventional Vehicles. . . . .	93
5.1.1	Data Collection and Results . . . . .	94
5.1.2	Findings. . . . .	95
5.2	Comparison of Lightweight Electric Vehicles with Reference Electric Vehicles . . . . .	110
5.2.1	Data Collection and Results . . . . .	110
5.2.2	Findings. . . . .	115
	References . . . . .	118

**6 Summary, Critical Review and Outlook . . . . . 121**

6.1 Summary . . . . . 121

6.2 Critical Review . . . . . 123

6.3 Outlook . . . . . 124

References . . . . . 125

Environmental Assessment of Lightweight Electric  
Vehicles

Egede, P.

2017, XXII, 125 p. 59 illus., 33 illus. in color., Hardcover

ISBN: 978-3-319-40276-5
