
Contents

Part I Operational Applications and Requirements

| | | |
|----------|--|-----------|
| 1 | Operational Applications in the Power Delivery System | 3 |
| 2 | IEC 61850 Communication Model. | 7 |
| 3 | Substation-to-Substation Applications | 11 |
| 3.1 | Line Protection Applications. | 11 |
| 3.1.1 | State Comparison Protection Schemes. | 14 |
| 3.1.2 | Analogue Comparison Protection Schemes. | 18 |
| 3.1.3 | Protection Relay Communication in the IEC 61850 | 21 |
| 3.2 | System Protection Schemes | 22 |
| 3.2.1 | SPS Applications | 23 |
| 3.2.2 | SPS Architecture | 24 |
| 3.2.3 | Wide Area Protection & Control (WAP&C). | 25 |
| 4 | Field Device to Central Platform Applications | 29 |
| 4.1 | Power System SCADA | 30 |
| 4.2 | Synchrophasor-Based Wide Area Monitoring System. | 31 |
| 4.3 | Other IP-Based Monitoring Applications in the Substation | 34 |
| 5 | Inter-platform Applications. | 37 |
| 6 | Office-to-Field Applications. | 39 |
| 6.1 | Remote Access from Office to Grid Device and Information | 41 |
| 6.2 | Field Worker Access to Central Platforms and Applications. | 41 |
| 7 | Smart Distribution Applications | 45 |

Part II Provisioning of Utility-Grade Communication Services

| | | |
|----------|--|-----------|
| 8 | Service Provisioning, Quality of Service, and SLA | 49 |
|----------|--|-----------|

| | | |
|---|---|------------|
| 9 | Service Specification Attributes | 53 |
| 9.1 | Operational Coverage and Topology | 53 |
| 9.2 | Throughput | 54 |
| 9.3 | Time Constraints. | 55 |
| 9.4 | Service Integrity and Data Loss | 59 |
| 9.5 | Availability and Dependability | 62 |
| 9.6 | Communication Security | 64 |
| 9.7 | Future Proofing, Legacy Support, Vendor Independence | 65 |
| 9.8 | Electromagnetic and Environmental Constraints | 66 |
| 9.9 | Service Survivability, Resilience and Disaster Readiness | 67 |
| 9.10 | Cost Considerations. | 68 |
| 10 | Building and Adjusting Service Level Agreements | 75 |
| 11 | Service Provisioning Models—Impact on the Delivery Process . . . | 81 |
| Part III Delivery of Communication Services in the Utility Environment | | |
| 12 | Introduction on Service Delivery | 89 |
| 13 | Communication Service Delivery Architecture | 91 |
| 14 | Service Interfacing at the Access Point. | 95 |
| 14.1 | Legacy Interfacing. | 95 |
| 14.2 | Ethernet Access | 96 |
| 15 | Synchronization at User-to-Network Interface | 99 |
| 16 | Circuit and Packet Conversions at the Service Access Point | 103 |
| 16.1 | Packet Over TDM. | 103 |
| 16.2 | Circuit Emulation Over Packet | 104 |
| 17 | Modeling the Service Delivery Process. | 109 |
| 18 | Managing the Delivered Communication Service | 115 |
| 19 | Meeting Service Quality at a Packet-Switched Access Point | 119 |
| 20 | Integrating Service Delivery for IT and OT Communications | 129 |
| Part IV Deploying Reliable and Secure Network Infrastructures | | |
| 21 | Deploying Reliable and Secure Network Infrastructures | 137 |
| 22 | An Overview on Network Technologies | 139 |
| 22.1 | Multiplexing and Switching Fundamentals | 139 |
| 22.2 | Optical Communication | 140 |
| 22.3 | Wavelength Division Multiplexing (C- and D-WDM) | 141 |
| 22.4 | Time Division Multiplexing (PDH and SDH) | 142 |
| 22.5 | Optical Transport Networks (OTN) | 145 |

| | | |
|---|--|------------|
| 22.6 | Ethernet Transport | 146 |
| 22.7 | Multi-protocol Label Switching (MPLS) | 147 |
| 22.8 | MPLS-TP or IP-MPLS in Operational Context | 150 |
| 22.9 | Radio Communication | 151 |
| 22.10 | Power Line Carrier | 153 |
| 23 | Hierarchical and Overlay Architectures | 155 |
| 24 | Revisiting the Process Model—Upstream Management | 161 |
| 24.1 | Policy Definition and Business Planning | 163 |
| 24.2 | Strategic Deployment and Tactical Adjustments | 165 |
| 24.3 | Business Development, Service Offer, and Service Migrations | 169 |
| 25 | Telecom Network Asset Ownership | 171 |
| 25.1 | Fiber and RF Infrastructure | 172 |
| 25.2 | Transport Network Assets | 175 |
| 25.3 | Application Service Networks and Platforms | 176 |
| 26 | Planning Network Transformations and Migrations | 177 |
| 27 | Cyber-Secure and Disaster-Resistant Communications | 183 |
| 27.1 | Risk and Impact Assessment | 184 |
| 27.2 | Designing for Cyber-Security | 185 |
| 27.3 | Designing for Disaster-Resistance | 190 |
| Part V Maintaining Network Operation | | |
| 28 | Maintaining Network Operation—Introduction | 195 |
| 29 | Reasons for a Formal Approach to O&M | 197 |
| 30 | O&M Scope, Process, and Organization | 201 |
| 30.1 | User-Provider Relationship | 202 |
| 30.2 | Network Perimeter for O&M | 203 |
| 30.3 | Scope of O&M Activities. | 204 |
| 30.4 | Evolution of O&M Scopes and Processes. | 205 |
| 30.5 | Transforming the O&M | 206 |
| 30.6 | Operation and Maintenance Organization | 208 |
| 30.7 | Network Operation Center Activities | 210 |
| 31 | Managing Faults and Anomalies | 213 |
| 31.1 | Fault Detection | 213 |
| 31.2 | Fault Localization and Problem Management | 217 |
| 31.3 | Fault Notification and Reporting | 217 |
| 31.4 | Fault Diagnostics | 218 |
| 31.5 | Fault Recovery and Reporting. | 218 |

| | |
|--|------------|
| 32 Incident Management and Work Assignment | 219 |
| 33 Configuration and Change Management | 221 |
| 33.1 Configuration Database—Network and Service Inventory. | 221 |
| 33.2 User Order Handling and Service Activation | 224 |
| 33.3 Configuration and Change Management, Capacity Management. | 224 |
| 33.4 O&M Tools and IT Platform Management | 226 |
| 33.5 Asset Lifecycle and Spare Management | 226 |
| 34 Quality and Performance Monitoring | 229 |
| 34.1 TDM Transmission Performance Monitoring | 230 |
| 34.2 Packet-Switched Network Performance Monitoring | 230 |
| 35 Telecom O&M Communications and Field Worker Support. | 233 |
| 35.1 Telecom O&M Communications. | 233 |
| 35.2 Connecting to Field Device and Management Platforms. | 234 |
| 35.3 Human-to-Human O&M Communications | 235 |
| 35.4 External O&M Interventions. | 236 |
| 35.5 Field Worker Access to Operational Sites and Assets. | 237 |
| 35.6 Disaster-Mode Operation | 240 |
| Appendix 1: Termination Networks and Service Access. | 243 |
| Appendix 2: ITIL Management Framework | 253 |
| Appendix 3: Some Relevant Standards | 259 |
| Appendix 4: CIGRE Technical Brochure Contributors | 263 |
| Bibliography | 265 |
| Index | 267 |

Utility Communication Networks and Services

Specification, Deployment and Operation

Samitier, C. (Ed.)

2017, XXIX, 269 p. 75 illus., 56 illus. in color., Hardcover

ISBN: 978-3-319-40282-6
