1	Introduction to Decentralized Infrastructure for Wastewater Treatment and Water Reclamation	1
1.1	Scope	1
1.2	Key Concepts	1
1.3	Conceptual and Technical Details	5
1.4	Terminology	6
1.5	Acronyms, Abbreviations and Symbols	8
1.6	Problems	9
	References	10
	Chapter 1 Slides	14
1.1	Introduction	14
1.2	Wastewater Perspectives	17
1.3	Wastewater Infrastructure	19
1.4	Decentralized Infrastructure	29
1.5	Summary	37
2	Selection, Design and Implementation of Decentralized Infrastructure	39
2.1	Scope	39
2.2	Key Concepts	39
2.3	Conceptual and Technical Details	44
2.4	Terminology	44
2.5	Acronyms, Abbreviations and Symbols	46
2.6	Problems	47
	References	49
	Chapter 2 Slides	51
2.1	Introduction	51
2.2	Project Requirements	54
2.3	Treatment Performance	61
2.4	Sustainability Attributes	65

2.5	Configuring Viable Systems	69
2.6	Ensuring System Performance	73
2.7	Management Systems	77
2.8	Summary	80
3	Contemporary Water Use and Wastewater Generation	81
3.1	Scope	81
3.2	Key Concepts	81
3.3	Conceptual and Technical Details	83
3.4	Terminology	84
3.5	Acronyms, Abbreviations and Symbols	86
3.6	Problems	88
	References	90
	Chapter 3 Slides	92
3.1	Introduction	92
3.2	Characterization Data	96
3.3	Water Use and Wastewater Flow	98
3.4	Wastewater Composition	113
3.5	Predicting Flow and Composition	117
3.6	Current and Emerging Issues	128
3.7	Summary	130
3.8	Example Problems	131
4	Water Use Efficiency and Waste Stream Source Separation	141
4.1	Scope	141
4.2	Key Concepts	141
4.3	Conceptual and Technical Details	144
4.4	Terminology	144
4.5	Acronyms, Abbreviations and Symbols	145
4.6	Problems	147
	References	150
	Chapter 4 Slides	152
4.1	Introduction	152
4.2	Water Use Efficiency	154
4.3	Source Separation	160
4.4	Predicting Effects and Benefits	168
4.5	Summary	176
4.6	Example Problems	177
5	Alternative Wastewater Collection and Conveyance Systems for Decentralized Applications	181
5.1	Scope	181
5.2	Key Concepts	181
5.3	Conceptual and Technical Details	184
5.4	Terminology	184
5.5	Acronyms, Abbreviations and Symbols	186

5.6	Problems	187
	References	191
	Chapter 5 Slides	193
5.1	Introduction	193
5.2	Principles and Processes	201
5.3	Design and Implementation	216
5.4	Summary	227
5.5	Example Problems	228
6	Treatment Using Septic Tanks	237
6.1	Scope	237
6.2	Key Concepts	237
6.3	Conceptual and Technical Details	241
6.4	Terminology	241
6.5	Acronyms, Abbreviations and Symbols	243
6.6	Problems	244
	References	246
	Chapter 6 Slides	248
6.1	Introduction	248
6.2	Treatment Performance	252
6.3	Principles and Processes	258
6.4	Design and Implementation	266
6.5	Summary	281
6.6	Example Problems	282
7	Treatment Using Aerobic Bioreactors	289
7.1	Scope	289
7.2	Key Concepts	289
7.3	Conceptual and Technical Details	294
7.4	Terminology	294
7.5	Acronyms, Abbreviations and Symbols	298
7.6	Problems	300
	References	303
	Chapter 7 Slides	305
7.1	Introduction	305
7.2	Treatment Performance	310
7.3	Principles and Processes	312
7.4	Design and Implementation	327
7.5	Summary	351
7.6	Example Problems	352
8	Treatment Using Porous Media Biofilters	365
8.1	Scope	365
8.2	Key Concepts	365
8.3	Conceptual and Technical Details	369
8.4	Terminology	370

8.5	Acronyms, Abbreviations and Symbols	374
8.6	Problems	376
	References	380
	Chapter 8 Slides	383
8.1	Introduction	383
8.2	Treatment Performance	388
8.3	Principles and Processes	391
8.4	Design and Implementation	400
8.5	Summary	434
8.6	Example Problems	435
9	Treatment Using Membrane Bioreactors	451
9.1	Scope	451
9.2	Key Concepts	451
9.3	Conceptual and Technical Details	454
9.4	Terminology	454
9.5	Acronyms, Abbreviations and Symbols	456
9.6	Problems	457
	References	460
	Chapter 9 Slides	461
9.1	Introduction	461
9.2	Treatment Performance	465
9.3	Principles and Processes	467
9.4	Design and Implementation	472
9.5	Summary	484
9.6	Example Problems	485
10	Treatment Using Constructed Wetlands	491
10.1	Scope	491
10.2	Key Concepts	491
10.3	Conceptual and Technical Details	494
10.4	Terminology	495
10.5	Acronyms, Abbreviations and Symbols	498
10.6	Problems	499
	References	503
	Chapter 10 Slides	504
10.1	Introduction	504
10.2	Treatment Performance	508
10.3	Principles and Processes	511
10.4	Design and Implementation	518
10.5	Summary	538
10.6	Example Problems	538
11	Treatment Using Subsurface Soil Infiltration	547
11.1	Scope	547
11.2	Key Concepts	547

11.3	Conceptual and Technical Details	553
11.4	Terminology	553
11.5	Acronyms, Abbreviations and Symbols	558
11.6	Problems	560
	References	564
	Chapter 11 Slides	568
11.1	Introduction	568
11.2	Treatment Performance	573
11.3	Principles and Processes	577
11.4	Design and Implementation	594
11.5	Summary	625
11.6	Example Problems	626
12	Treatment Using Landscape Drip Dispersal	641
12.1	Scope	641
12.2	Key Concepts	641
12.3	Conceptual and Technical Details	643
12.4	Terminology	644
12.5	Acronyms, Abbreviations and Symbols	645
12.6	Problems	647
	References	650
	Chapter 12 Slides	651
12.1	Introduction	651
12.2	Treatment Performance	653
12.3	Principles and Processes	655
12.4	Design and Implementation	660
12.5	Summary	689
12.6	Example Problems	689
13	Treatment for Nutrient Reduction	701
13.1	Scope	701
13.2	Key Concepts	701
13.3	Conceptual and Technical Details	705
13.4	Terminology	705
13.5	Acronyms, Abbreviations and Symbols	708
13.6	Problems	710
	References	711
	Chapter 13 Slides	714
13.1	Introduction	714
13.2	Treatment Performance	717
13.3	Principles and Processes	719
13.4	Design and Implementation	729
13.5	Development-Scale Situations	755
13.6	Summary	759
13.7	Example Problems	759

14 Treatment for Pathogen Reduction	765
14.1 Scope	765
14.2 Key Concepts	765
14.3 Conceptual and Technical Details	770
14.4 Terminology	770
14.5 Acronyms, Abbreviations and Symbols	772
14.6 Problems	773
References	775
Chapter 14 Slides	777
14.1 Introduction	777
14.2 Treatment Performance	781
14.3 Principles and Processes	783
14.4 Design and Implementation	802
14.5 Summary	817
14.6 Example Problems	817
15 Management of Process Solids, Sludges, and Residuals	825
15.1 Scope	825
15.2 Key Concepts	825
15.3 Conceptual and Technical Details	831
15.4 Terminology	831
15.5 Acronyms, Abbreviations and Symbols	833
15.6 Problems	833
References	834
Chapter 15 Slides	836
15.1 Introduction	836
15.2 Septage	840
15.3 Waste Biological Solids	848
15.4 Granular Media	851
15.5 Vegetation	853
15.6 Excreta and Fecal Sludge	855
15.7 Summary	866
Appendix A: Unit Conversion Table	867
Appendix B: Glossary	869
Appendix C: Acronyms, Abbreviations and Symbols	901
Appendix D: References	915
Index	939

Decentralized Water Reclamation Engineering
A Curriculum Workbook

Siegrist, R.L.

2017, LVI, 947 p. 347 illus., 180 illus. in color.,
Hardcover

ISBN: 978-3-319-40471-4
