1	Groundwater Generation and Distribution Regularities	1
1.1	Hydrogeological Zonation	1
1.2	Groundwater Formation and Distribution Regularities in the Fold-Mountain Zones	1
1.2.1	The Greater Caucasus Fold-Mountain Zone	1
1.2.2	The Lesser Caucasus Fold-Mountain Zone	4
1.2.3	The Talysh Fold-Mountain Zone	8
1.3	Groundwater Formation and Distribution Regularities in the Piedmont and Intermountain Zones	10
1.3.1	Groundwater Hydrochemical Characteristics and Their Zoning	10
1.3.2	Groundwater Formation and Distribution Regularities in the Piedmont Neogene Deposits	10
1.4	Groundwater Formation and Distribution Regularities in Lowlands	13
1.4.1	Groundwater Formation and Distribution Regularities in Azerbaijan Lowlands	13
1.4.2	Groundwater Formation and Distribution Regularities in the Absheron Peninsula	14
1.5	Resources and Reserves of Fresh Groundwater	16
1.5.1	Formation Conditions of Fresh Groundwater Resources and Reserves	16
1.5.2	Commercial Reserves of Fresh Groundwater Reserves	18
1.6	Generation and Accumulation Conditions and Resources of Mineral, Thermal, and Industrial Water	18
	References	22
2	Economic Minerals of Azerbaijan	25
2.1	Oil and Gas	25
2.1.1	Lithological and Facial Characteristics, Porosity, and Permeability of Meso-Cenozoic Deposits	25
2.1.2	Productive Series (PS) and Its Lithofacial Types	26
2.1.3	Geochemistry of Organic Matter and Hydrocarbon Fluids and Simulation of Oil and Gas Formation Processes	35
2.1.4	Thermobaric Conditions and Hydrochemical Characteristics of Oil- and Gas-Bearing Complexes	47
2.1.5	Oil- and Gas-Bearing Capacity of Azerbaijan Sedimentary Sequences	52
2.1.6	Assessment of Resources for Various Azerbaijan Stratigraphic Complexes	57
2.1.7	Development Outlook of Oil and Gas Extraction in Azerbaijan	63
2.2	Hard Economic Minerals	66
2.2.1	Metallic Minerals	66
2.2.2	Non-ferrous and Light Metals	71

2.2.3	Gold	94
2.2.4	Non-metallic Minerals	98
	References	103
3	Petrophysical Support of Geophysical Studies	107
3.1	Use of Geological Data	107
3.2	Use of Petrophysical Data.	107
3.2.1	Analysis of Some Paleomagnetic Parameters.	109
3.2.2	Results of Some Regional Paleomagnetic Examinations	112
3.2.3	Analysis of Other Physical Parameters	113
3.3	The Formation of an Indicator Space	117
3.4	Common Characteristics of Petrophysical Boundaries and Geological Associations	125
	References	127
4	Regional Geophysical–Geological Zonation	129
4.1	Development of New Geophysical Maps (Cross Sections).	129
4.1.1	Gravity Field	129
4.1.2	Remote Sensing	129
4.1.3	Thermal Field.	131
4.1.4	Radioactivity	132
4.1.5	Paleomagnetic Analysis	133
4.1.6	Deep Seismic Sounding Reinterpretation	133
4.2	Qualitative and Semiquantitative Analysis of Geophysical Data	134
4.2.1	Magnetic Data Analysis	135
4.2.2	Gravity Data Analysis	141
4.2.3	Thermal Data Analysis.	150
4.2.4	Topography Data Analysis	151
4.3	Quantitative Analysis and Regioning	155
4.4	Compilation of Final Geophysical–Geological Maps.	157
