

Contents

1	Introduction	1
1.1	Research and Development Status of Generalized Markov Jump Linear System Theory	1
1.1.1	Basic Model of Generalized Markov Jump Linear Systems	1
1.1.2	Research Status of Generalized Markov Jump Systems	5
1.2	Differential Games for the Generalized Markov Jump Linear Systems	8
1.3	Contents of This Book	10
	References	11
2	Deterministic and Stochastic Differential Games	17
2.1	Dynamic Optimization Techniques	17
2.1.1	Dynamic Programming	17
2.1.2	Optimal Control	19
2.1.3	Stochastic Control	21
2.2	Differential Games and Their Solution Concepts	23
2.2.1	Open-Loop Nash Equilibria	23
2.2.2	Closed-Loop Nash Equilibria	24
2.2.3	Feedback Nash Equilibria	25
2.3	Stochastic Differential Games and Their Solutions	27
2.3.1	The Model of Stochastic Differential Game	27
2.3.2	The Solutions of Stochastic Differential Game	28
3	Stochastic Differential Games of Continuous-Time Markov Jump Linear Systems	31
3.1	Stochastic LQ Problem—Differential Game with One Player	31
3.1.1	Finite-Time Horizon Case	32
3.1.2	Infinite-Time Horizon Case	39

3.2	Stochastic Nash Differential Games with Two Player	42
3.2.1	Finite-Time Horizon Case	42
3.2.2	Infinite-Time Horizon Case	45
3.2.3	Two Person Zero-Sum Stochastic Differential Game	47
3.2.4	Numerical Example	51
3.3	Stochastic Stackelberg Differential Game with Two Person	54
3.3.1	Problem Formulation	54
3.3.2	Main Results	55
3.4	Summary	58
	References	59
4	Stochastic Differential Game of Discrete-Time Markov Jump	
	Linear Systems	61
4.1	Stochastic LQ Problem—Differential Game with One Person	61
4.1.1	Finite-Time Horizon	61
4.1.2	Infinite-Time Horizon	65
4.2	Stochastic Nash Differential Games with Two Person	67
4.2.1	Finite-Time Horizon	67
4.2.2	Infinite-Time Horizon	69
4.2.3	Two Person Zero-Sum Stochastic Differential Games	71
4.3	Stackelberg Differential Games with Two Person	74
4.3.1	Finite-Time Horizon	74
4.3.2	Infinite-Time Horizon	79
4.4	Summary	81
	References	81
5	Stochastic Differential Game of Stochastic Markov Jump Singular	
	Systems	83
5.1	Stochastic LQ Problems—Differential Games of One Player	83
5.1.1	Preliminaries	84
5.1.2	LQ Problem of Stochastic Markov Jump Singular Systems	86
5.2	Two Person Zero-Sum Differential Games	93
5.2.1	Finite-Time Horizon Case	93
5.2.2	Infinite-Time Horizon Case	95
5.3	Stochastic Nash Differential Games with Two Player	97
5.3.1	Finite-Time Horizon Case	97
5.3.2	Infinite-Time Horizon Case	100
5.4	Stochastic Stackelberg Differential Game with Two Person	103
5.4.1	Problem Formulation	103
5.4.2	Main Result	103
5.5	Summary	106
	References	107

6 Game Theory Approach to Stochastic H_2/H_∞ Control of Markov Jump Singular Systems	109
6.1 Introduction	109
6.2 Stochastic H_2/H_∞ Control to Markov Jump Linear System	
Based on Nash Games	110
6.2.1 Finite-Time Horizon Case	110
6.2.2 Infinite-Time Horizon Case	115
6.2.3 Numerical Examples	117
6.3 Stochastic H_2/H_∞ Control to Markov Jump Linear Systems	
Based on Stackelberg Game	120
6.3.1 Preliminary Results	120
6.3.2 Problem Formulation	120
6.3.3 Main Results	121
6.4 Stochastic H_2/H_∞ Control to Markov Jump Singular System	
Based on Nash Games	124
6.4.1 Finite-Time Horizon Case	124
6.4.2 Infinite-Time Horizon Case	127
6.5 Stochastic H_2/H_∞ Control to Markov Jump Singular Systems	
Based on Stackelberg Game	130
6.5.1 Preliminary Results	130
6.5.2 Problem Formulation	131
6.5.3 Main Results	132
6.6 Summary	133
References	133
7 Applications of Stochastic Differential Game Theory for Markov Jump Linear Systems to Finance and Insurance	135
7.1 Introduction	135
7.2 Portfolio Risk Minimization and Differential Games	136
7.2.1 Asset Price Dynamics	137
7.2.2 Risk Minimization	139
7.2.3 Solution to the Risk-Minimizing Problem	145
7.3 Option Pricing Based on Game Theory	148
7.3.1 Black-Scholes-Merton Market Model	149
7.3.2 A Pricing Measure for Black-Scholes-Merton Market	153
7.4 The Optimal Investment Game of the Insurance Company	162
7.4.1 The Market Model	162
7.4.2 Optimal Investment Problems	168
7.4.3 Solution to Optimal Investment Problem I	176
7.4.4 Solution to Problem II	182
7.5 Summary	186
