

Contents

Part I Historical Perspectives

- 1 From Tennekes and Lumley to Townsend and to George:
A Slow March to Freedom** 3
J.C. Vassilicos
- 2 A 50-Year Retrospective and the Future** 13
William K. George

Part II Turbulent Boundary Layers

- 3 Study of the Streamwise Evolution of Turbulent Boundary
Layers to High Reynolds Numbers** 47
I. Marusic, K.A. Chauhan, V. Kulandaivelu, and N. Hutchins
- 4 Towards the Direct Numerical Simulation of a Self-similar
Adverse Pressure Gradient Turbulent Boundary Layer Flow** 61
J. Soria, V. Kitsios, C. Atkinson, J.A. Sillero, G. Borrell,
A.G. Gungar, and J. Jimenez
- 5 Analysis of Velocity Structures in a Transitionally Rough
Turbulent Boundary Layer** 77
Ali Doosttalab, Suranga Dharmarathne, Murat Tutkun,
Ronald Adrian, and Luciano Castillo
- 6 Streamwise Relaxation of a Shock Perturbed Turbulent
Boundary Layer** 93
M.F. Shahab, G. Lehnasch, and T.B. Gatski

Part III Jets

7 Turbulence and Data Analytics in the Twenty-First Century: The Round Free Jet	119
P. Lavoie, A. Pollard, and H. Sadeghi	
8 The Sound-Field Produced by Clustered Rockets During Start-Up ..	133
C.E. Tinney, A. Canchero, R. Rojo, G. Mack, N.E. Murray, and J.H. Ruf	
9 Variable Viscosity Jets: Entrainment and Mixing Process	147
L. Voivenel, E. Varea, L. Danaila, B. Renou, and M. Cazalens	
10 POD Mode Robustness for the Turbulent Jet Sampled with PIV	163
A. Hodžić, K.E. Meyer, and C.M. Velte	

Part IV Environmental Flows and Wind Energy

11 Large Eddy Simulation of Environmental Flows: From the Laboratory-Scale Numerical Experiments Toward Full-Scale Applications.....	191
Vincenzo Armenio	
12 Big Data from Big Experiments. The WindEEE Dome	215
Horia Hangan, Maryam Refan, Chowdhury Jubayer, Dan Parvu, and Ryan Kilpatrick	
13 Visualizing Wind Farm Wakes Using SCADA Data	231
Shawn Martin, Carsten H. Westergaard, and Jonathan White	
14 Turbulent and Deterministic Stresses in the Near Wake of a Wind Turbine Array	255
Nicholas Michael Hamilton, Murat Tutkun, and Raúl Bayoán Cal	
15 Evaluation of Higher Order Moments and Isotropy in the Wake of a Wind Turbine Array	273
Naseem Ali, Aleksandr S. Aseyev, Matthew S. Melius, Murat Tutkun, and Raúl Bayoán Cal	

Part V Data Manipulation

16 Turbulent Flow Physics and Control: The Role of Big Data Analyses Tools	295
Andrew S. Magstadt, Pinqing Kan, Zachary P. Berger, Christopher J. Ruscher, Matthew G. Berry, Melissa A. Green, Jacques Lewalle, and Mark N. Glauser	

17 Data-Driven Methods in Fluid Dynamics: Sparse Classification from Experimental Data	323
Zhe Bai, Steven L. Brunton, Bingni W. Brunton, J. Nathan Kutz, Eureka Kaiser, Andreas Spohn, and Bernd R. Noack	
18 Conversion of Measured Turbulence Spectra from Temporal to Spatial Domain	343
Preben Buchhave and Clara M. Velte	
Part VI General Aspects of Turbulence	
19 Effects of Unsteady Coanda Blowing on the Wake and Drag of a Simplified Blunt Vehicle	365
D. Barros, J. Borée, B.R. Noack, A. Spohn, and T. Ruiz	
20 Challenges for Large Eddy Simulation of Engineering Flows	375
C. Fureby	
21 Coarse Grained Simulation and Turbulent Material Mixing	401
F.F. Grinstein, A.J. Wachtor, and J.R. Ristorcelli	
22 Non-classical/Exponential Decay Regimes in Multiscale Generated Isotropic Turbulence	421
M. Meldi and P. Sagaut	
23 A Minimal Flow Unit for Turbulence, Combustion, and Astrophysics	433
P. Orlandi, S. Pirozzoli, M. Bernardini, and G.F. Carnevale	
24 Linear Stability Analysis of Compressible Channel Flow over Porous Walls	451
Iman Rahbari and Carlo Scalo	
25 Dissipation and Topological Features Conditioned by Velocity Level-Crossings in Wall Turbulence	469
Sedat Tardu	
Part VII Four Perspectives on Big Data and the Turbulence Community	
26 Cyberinfrastructure to Empower Scientific Research	483
Thomas Hacker and Shirley Dyke	
27 Turbulence in the Era of Big Data: Recent Experiences with Sharing Large Datasets	497
Charles Meneveau and Ivan Marusic	
28 Public Dissemination of Raw Turbulence Data	509
Juan A. Sillero and Javier Jiménez	

29	Reacting LES@2030: Near Diskless and Near Real-Time Computing for Design?	517
	S. Menon, R. Ranjan, and J.C. Oefelein	
Part VIII	Discussion 1: Challenges in Turbulence in the Twenty-First Century—What Problems We Should Focus On in the Next 20 Years?	
30	Whither Turbulence and Big Data for the Twenty-First Century	531
	Andrew Pollard	
Part IX	Discussion 2: Large Data: Opportunities for Collaborations	
31	Whither Turbulence and Big Data for the Twenty-First Century	551
	Andrew Pollard, Thomas J. Hacker, and Shirley Dyke

Whither Turbulence and Big Data in the 21st Century?

Pollard, A.; Castillo, L.; Danaila, L.; Glauser, M. (Eds.)

2017, XVIII, 574 p. 274 illus., 192 illus. in color.,

Hardcover

ISBN: 978-3-319-41215-3
