Part I Fundamentals

1	Motivation: <i>Multiobjective Thinking in Controller Tuning</i>	3
1.1	Controller Tuning as a Multiobjective Optimization Problem: A Simple Example	3
1.2	Conclusions on This Chapter	20
	References.	21
2	Background on Multiobjective Optimization for Controller Tuning	23
2.1	Definitions	23
2.2	Multiobjective Optimization Design (MOOD) Procedure	27
2.2.1	Multiobjective Problem (MOP) Definition.	28
2.2.2	Evolutionary Multiobjective Optimization (EMO).	29
2.2.3	MultiCriteria Decision Making (MCDM)	37
2.3	Related Work in Controller Tuning	41
2.3.1	Basic Design Objectives in Frequency Domain.	41
2.3.2	Basic Design Objectives in Time Domain.	42
2.3.3	PI-PID Controller Design Concept	44
2.3.4	Fuzzy Controller Design Concept	47
2.3.5	State Space Feedback Controller Design Concept	48
2.3.6	Predictive Control Design Concept	49
2.4	Conclusions on This Chapter	50
	References.	51
3	Tools for the Multiobjective Optimization Design Procedure.	59
3.1	EMO Process	59
3.1.1	Evolutionary Technique.	60
3.1.2	A MOEA with Convergence Capabilities: MODE.	62
3.1.3	An MODE with Diversity Features: sp-MODE.	63
3.1.4	An sp-MODE with Pertinency Features: sp-MODE-II	69

3.2	MCDM Stage	75
3.2.1	Preferences in MCDM Stage Using Utility Functions	76
3.2.2	Level Diagrams for Pareto Front Analysis.	79
3.2.3	Level Diagrams for Design Concepts Comparison	82
3.3	Conclusions of This Chapter.	87
	References.	88

Part II Basics

4	Controller Tuning for Univariable Processes	91
4.1	Introduction	91
4.2	Model Description	92
4.3	The MOOD Approach	92
4.4	Performance of Some Available Tuning Rules	102
4.5	Conclusions	104
	References.	105
5	Controller Tuning for Multivariable Processes	107
5.1	Introduction	107
5.2	Model Description and Control Problem.	108
5.3	The MOOD Approach	109
5.4	Control Tests	117
5.5	Conclusions	121
	References.	121
6	Comparing Control Structures from a Multiobjective Perspective	123
6.1	Introduction	123
6.2	Model and Controllers Description	124
6.3	The MOOD Approach	126
6.3.1	Two Objectives Approach.	126
6.3.2	Three Objectives Approach	131
6.4	Conclusions	143
	References.	143

Part III Benchmarking

7	The ACC'1990 Control Benchmark: A Two-Mass-Spring System	147
7.1	Introduction	147
7.2	Benchmark Setup: ACC Control Problem.	148
7.3	The MOOD Approach	149
7.4	Control Tests	154
7.5	Conclusions	156
	References.	156

8	The ABB’2008 Control Benchmark: A Flexible Manipulator	159
8.1	Introduction	159
8.2	Benchmark Setup: The ABB Control Problem	159
8.3	The MOOD Approach	163
8.4	Control Tests	168
8.5	Conclusions	171
	References.	172
9	The 2012 IFAC Control Benchmark: An Industrial Boiler Process	173
9.1	Introduction	173
9.2	Benchmark Setup: Boiler Control Problem.	174
9.3	The MOOD Approach	176
9.4	Control Tests	180
9.5	Conclusions	182
	References.	182
 Part IV Applications		
10	Multiobjective Optimization Design Procedure for Controller Tuning of a Peltier Cell Process	187
10.1	Introduction	187
10.2	Process Description.	188
10.3	The MOOD Approach	189
10.4	Control Tests	197
10.5	Conclusions	198
	References.	199
11	Multiobjective Optimization Design Procedure for Controller Tuning of a TRMS Process	201
11.1	Introduction	201
11.2	Process Description.	201
11.3	The MOOD Approach for Design Concepts Comparison.	203
11.4	The MOOD Approach for Controller Tuning.	208
11.5	Control Tests	213
11.6	Conclusions	213
	References.	213
12	Multiobjective Optimization Design Procedure for an Aircraft’s Flight Control System.	215
12.1	Introduction	215
12.2	Process Description.	216
12.3	The MOOD Approach	219
12.4	Controllers Performance in a Real Flight Mission	222
12.5	Conclusions	227
	References.	227

Controller Tuning with Evolutionary Multiobjective
Optimization

A Holistic Multiobjective Optimization Design Procedure

Reynoso Meza, G.; Blasco Ferragud, X.; Sanchis Saez, J.;
Herrero Durá, J.M.

2017, XIII, 227 p. 124 illus., 83 illus. in color., Hardcover
ISBN: 978-3-319-41299-3
