1	Introduction	1
Part I Predominantly Fetal Emergencies		
2	Acute Fetal Hypoxia/Acidosis	7
2.1	Definition, Incidence and Main Risk Factors	7
2.2	Consequences	10
2.3	Diagnosis	10
2.3.1	Reversible Causes	11
2.3.1.1	Uterine Hypercontractility	11
2.3.1.2	Sudden Maternal Hypotension	12
2.3.1.3	Maternal Supine Position with Aorto-Caval Compression	13
2.3.2	Irreversible Utero-Placental-Umbilical Disorders	13
2.3.2.1	Major Placental Abruption	13
2.3.2.2	Uterine Rupture	14
2.3.2.3	Umbilical Cord Prolapse	15
2.3.3	Maternal Cardiorespiratory Disorders	16
2.3.4	Usually Occult Causes	16
2.3.4.1	Occult Cord Compression	16
2.3.4.2	Major Fetal Haemorrhage	17
2.3.5	Specific Mechanical Complications of Labour	18
2.4	Clinical Management	18
2.4.1	Immediate Actions in Face of a Prolonged Deceleration	18
2.4.2	Uterine Hypercontractility	20
2.4.3	Sudden Maternal Hypotension	20
2.4.4	Major Placental Abruption	21
2.4.5	Uterine Rupture	21
2.4.6	Umbilical Cord Prolapse	22
2.4.7	Maximum Time Limits for Reversal of a Prolonged Deceleration	22
2.5	Clinical Records and Litigation Issues	23

3	Shoulder Dystocia	27
3.1	Definition, Incidence and Main Risk Factors	27
3.2	Complications	29
3.3	Diagnosis	31
3.4	Clinical Management.	31
3.4.1	Anticipating the Situation	31
3.4.2	Clearly Verbalising the Diagnosis	32
3.4.3	Avoiding Manoeuvres That Increase the Risk of Fetal Injury	32
3.4.4	Asking for Help.	32
3.4.5	External Manoeuvres.	32
3.4.6	Internal Manoeuvres	33
3.4.7	All-Fours Manoeuvre (Gaskin's Manoeuvre)	35
3.4.8	Exceptional Manoeuvres	36
3.5	Clinical Records and Litigation Issues	37
4	Retention of the After-Coming Head	41
4.1	Definition, Incidence and Main Risk Factors	41
4.2	Consequences	42
4.3	Diagnosis	43
4.4	Clinical Management.	43
4.4.1	Guaranteeing the Conditions for a Safe Vaginal Breech Delivery.	43
4.4.2	Anticipate the Situation.	44
4.4.3	Attempts to Deliver the Fetal Head.	44
4.4.4	Clearly Verbalising the Diagnosis	45
4.4.5	Asking for Help.	45
4.4.6	McRobert's Position	46
4.4.7	Episiotomy	46
4.4.8	Fetal Monitoring	46
4.4.9	Insertion of a Vaginal Retractor.	46
4.4.10	Forceps to the After-Coming Head	46
4.4.11	Exceptional Manoeuvres	48
4.5	Clinical Records and Litigation Issues	48
Part II Predominantly Maternal Emergencies		
5	Eclampsia	53
5.1	Definition, Incidence and Main Risk Factors	53
5.2	Complications	54
5.3	Diagnosis	54
5.4	Clinical Management.	54
5.4.1	Anticipate and Prevent the Situation.	54
5.4.2	Ask for Help	55
5.4.3	Avoid Lesions During the Eclamptic Seizure	55

5.4.4	Left Lateral Safety Position, Inspect Airway and Monitor	55
5.4.5	Prevention of New Seizures	56
5.4.6	Other Non-emergent Measures	56
5.4.7	Decreasing Blood Pressure	56
5.4.8	Recurrent Seizures.	57
5.4.9	Maintenance Dose of Magnesium Sulphate	58
5.4.10	Fluid Balance.	59
5.4.11	Thromboprophylaxis	59
5.4.12	Evaluation of Laboratory Results and Fetal Evaluation	59
5.4.13	Programming Birth	59
5.5	Clinical Records and Litigation Issues	60
6	Postpartum Haemorrhage	63
6.1	Definition, Incidence and Main Risk Factors	63
6.2	Consequences	66
6.3	Diagnosis	66
6.4	Clinical Management.	66
6.4.1	Anticipating the Situation	66
6.4.2	Clearly Verbalising the Diagnosis	67
6.4.3	Asking for Help	67
6.4.4	Initial Evaluation of the Cause of Haemorrhage	67
6.4.5	Support of Maternal Circulation and Oxygenation	67
6.4.5.1	Venous Catheterisation and Blood Volume Replacement	67
6.4.5.2	Maternal Monitoring	68
6.4.5.3	Bladder Catheterisation and Measurement of Urinary Output	68
6.4.5.4	Maintain Maternal Oxygen Supply to the Brain.	68
6.4.5.5	Decision to Start Colloids	68
6.4.5.6	Decision to Administer Blood Products.	68
6.4.5.7	Maintain Body Temperature	69
6.4.6	Treatment of Uterine Atony	69
6.4.6.1	Initial Measures	69
6.4.6.2	Medical Treatment	69
6.4.6.3	Mechanical Treatments	70
6.4.6.4	Surgical Treatments	71
6.4.6.5	Pelvic Tamponade	74
6.4.7	Treatment of Birth Canal Injuries	74
6.4.8	Treatment of Placental Retention	76
6.4.8.1	Complete Placental Retention	76
6.4.8.2	Partial Placental Retention	76
6.4.9	Treatment of Rare Causes of Postpartum Haemorrhage	76
6.4.9.1	Uterine Inversion	76

6.4.9.2	Uterine Rupture	77
6.4.9.3	Abnormally Adherent Placenta	77
6.4.9.4	Maternal Bleeding Disorders	78
6.4.10	Postpartum Haemorrhage at Caesarean Section	78
6.5	Clinical Records and Litigation Issues	78
7	Maternal Cardiorespiratory Arrest	81
7.1	Definition, Incidence and Main Risk Factors	81
7.2	Consequences	82
7.3	Diagnosis	82
7.4	Clinical Management.	82
7.4.1	Anticipating the Situation	82
7.4.2	Clearly Verbalising the Diagnosis	82
7.4.3	Asking for Help	83
7.4.4	Maternal Monitoring	83
7.4.5	Support of Maternal Oxygenation and Circulation	83
7.4.5.1	A (Airway): Guarantee the Patency of the Airway	83
7.4.5.2	B (Breathing): Maintain Oxygen Supply to the Lungs	83
7.4.5.3	C (Circulation): Cardiac Massage and Vein Catheterisation	84
7.4.6	Bladder Catheterisation and Measurement of Urinary Output	85
7.4.7	Fetal Monitoring	85
7.4.8	<i>In Situ</i> Caesarean Section	85
7.4.9	Defibrillatory Rhythms	85
7.4.10	After Cardiorespiratory Arrest Reverses	86
7.4.10.1	Hypotension	86
7.4.10.2	Termination of Pregnancy	86
7.4.10.3	Monitoring in an Intensive Care Unit	87
7.4.10.4	Maintain Body Temperature	87
7.4.10.5	Looking for an Underlying Cause	87
7.4.11	Pulmonary Thromboembolism	87
7.4.12	Amniotic Fluid Embolism Syndrome	88
7.5	Clinical Records and Litigation Issues	89

Obstetric Emergencies

A Practical Guide

Ayres-de-Campos, D.

2017, X, 94 p. 32 illus., 16 illus. in color., Softcover
