1	Introduction	1
	References	4
2	Chirality in Nature and Science	5
2.1	Geometrical Chirality	5
2.1.1	Planar Geometrical Chirality	7
2.1.2	Quantification of Chirality and Handedness	8
2.1.3	Physical Manifestation of Geometrical Chirality	10
2.2	Chiral Electrodynamics	11
2.2.1	Electrodynamics of Metallic Nanoparticles	13
2.2.2	Electronic Models of Chiral Materials	20
2.2.3	Chiral Optical Far-Field Responses	25
2.3	Realization of Chiral Materials	29
2.3.1	Chiral Molecules	29
2.3.2	Chiral Plasmonic Nanostructures	31
	References	37
3	Chiroptical Spectroscopy	43
3.1	Techniques for Optical Enantiomer Discrimination	43
3.1.1	Circular Dichroism Spectroscopy	43
3.1.2	Other Spectroscopic Techniques	45
3.2	Improved Detection Schemes	46
3.3	Plasmonically Enhanced Sensitivity	47
3.3.1	Single Plasmonic Nanoantennas	48
3.3.2	Plasmonic Hot-Spots	51
3.3.3	Observation of Catalytic Reactions	54
3.3.4	Chiral Hot-Spots	55
	References	57
4	Chiral Properties of Light	61
4.1	Optical Chirality	62
4.2	Interaction of Chiral Light with Chiral Molecules	63

4.2.1	Handedness-Dependent Absorption	64
4.2.2	Chiral Forces.	66
4.3	Optical Chirality Beyond Circular Polarization.	67
4.4	Chiral Plasmonic Near-Field Sources	69
4.4.1	Design Goals.	71
4.4.2	Symmetry Considerations	73
