

Contents

1	Introduction to Off-road Vehicles	1
1.1	Role of Terramechanics	3
1.2	Basic Concepts in Terramechanics	4
1.3	Characterization of Terrain Behaviour	10
1.3.1	Elastic Medium	10
1.3.2	Plastic Region	12
1.4	Identification of Soil Measuring Apparatus	13
	References	15
2	Wheel and Terrain Interaction	17
2.1	Identification of Wheel-Obstacle Collision	19
2.2	Tire Modeling	25
2.2.1	Forces and Moments	29
2.2.2	Tire Stiffness	29
2.2.3	Tire Footprint	34
2.2.4	Tire Road Modeling	39
2.2.5	Tire Rolling Resistance	42
2.2.6	Acceleration and Deceleration Characteristics Effects of Tire	45
	References	51
3	Performance of Off-road Vehicles	53
3.1	Influential Parameters on Off-road Vehicle Performance	59
3.1.1	Aerodynamic Force	60
3.1.2	Rolling Resistance	62
3.1.3	Gross Thrust	69
3.1.4	Dynamic Wheel Loads	70
3.2	Vehicle Dynamics on Deformable Terrain	71
3.2.1	Longitudinal Slip and Shear Displacement of Flexible Tire	80
3.2.2	Stresses and Forces of Flexible Tire	80
3.2.3	Lateral Forces of Flexible Tire	82

3.3	Ride Comfort	83
3.3.1	Quarter Car Model	84
3.3.2	Bicycle Car Model	86
3.3.3	Half Car Model	88
3.3.4	Full Car Model	91
3.4	Stability of Motioning/Handling	94
3.4.1	Vehicle Handling Dynamics	94
3.4.2	Off-road Vehicle Stability	100
	References	104
4	Energetic Perspective of Off-road Vehicle Mobility	107
4.1	Energy and Power Sources for Off-road Vehicle Mobility	108
4.2	Energy Dissipaters of Vehicle Vibrations (Energy Harvesting)	109
4.2.1	Energy Harvesting from Suspension	109
4.2.2	Tire Energy Harvesting	118
4.2.3	Brake Energy Harvesting	124
4.3	Energy Dissipaters Due to Vehicle Dynamics	125
	References	130
5	Application of Artificial Intelligence on Modeling and Optimization	133
5.1	Introduction to Artificial Intelligence Tools	134
5.2	Modeling with Artificial Neural Networks, Support Vector Machines, and Adaptive Neuro-Fuzzy Inference System	136
5.2.1	Artificial Neural Networks	136
5.2.2	Adaptive-Neuro Fuzzy Inference System (ANFIS)	136
5.2.3	Support Vector Regression	140
5.2.4	Takagi-Sugeno Type Neuro-Fuzzy Network with Modified Differential Evolution System	148
5.3	Optimization with Heuristics and Meta-Heuristics	157
5.3.1	Imperialist Competitive Algorithm (ICA)	157
5.3.2	Genetic Algorithm	163
5.3.3	Particle Swarm Optimization	164
5.4	Application of Meta-Heuristics in Suspension Control	170
	References	176
6	Applied Problems	179

Off-road Vehicle Dynamics

Analysis, Modelling and Optimization

Taghavifar, H.; Mardani, A.

2017, X, 183 p. 118 illus., 86 illus. in color., Hardcover

ISBN: 978-3-319-42519-1
