Contents

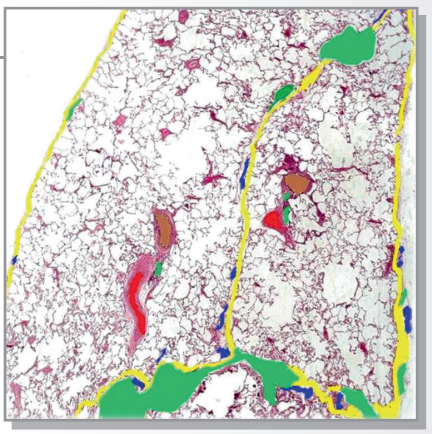

Clinical Approach to Diffuse Lung Diseases PAGE 1

Classification of DLDs	DLDs Associated to Known Causes	PAGE 2
	Idiopathic DLDs	
	IPAF	
	Epidemiology and Prognosis	
Clinical Evaluation	Acute, subacute, chronic	PAGE 4
	History	
	Key symptoms and signs	
Functional testing	Spirometry	PAGE 7
	DL_{CO}	
Autoimmunity	Laboratory findings	PAGE 9
	Systemic symptoms and signs	
The most frequent clinical settings	IPF, NSIP, COP, sarcoidosis	PAGE 11
Bronchoalveolar lavage (BAL)	Procedure and normal values Diagnostic role	PAGE 13
TBNA, EBUS-TBNA EUS-FNA EUS-B-FNA	Procedures and diagnostic role	PAGE 18
Transbronchial biopsy (TBB)	Procedure Diagnostic role	PAGE 21
Transbronchial cryobiopsy	Procedure Diagnostic role	PAGE 23
Surgical lung biopsy in VATS	Procedure Diagnostic role	PAGE 25
The Multidisciplinary approach (MDA)	The role of MDA	PAGE 26

Thinking Through Pathology PAGE 27

Introduction and anatomy	Secondary lobule	PAGE 28
Elementary lesions	Defining lesions: neoplasm	PAGE 31
	Defining lesions: mixture	
	Non-defining lesions: inflammation	
	Non-defining lesions: fibrosis	
How to approach the diseases	Anatomic distribution	PAGE 40
	Patterns	
	Ancillary histologic findings
