

Contents

1	Background	1
2	Clay and Clay Mineral Definition	5
2.1	Introduction.....	5
2.2	Definition, Classification, and Nomenclature of Clays and Clay Minerals.....	7
2.2.1	Historical Retrospective Showing the Lack of Consensus on Clay and Clay Mineral Definitions.....	8
2.3	Definition of Kaolin and Kaolinite: Inconsistencies Shown in the Literature.....	12
2.3.1	Introduction.....	12
2.3.2	Background.....	13
2.3.3	Retrospective of Kaolin and Kaolinite Definition.....	17
2.3.4	Discussion	21
2.3.5	Conclusions.....	27
2.4	Evolution of the Definition of Illite.....	28
	References	29
3	Historical Aspects of a Natural Pharmacopeia: Clay in the Corpus of <i>The Medieval Pharmacopeia</i> Written in Arabic	33
3.1	Introduction.....	33
3.2	Geographical Varieties and Physical Properties of Various Clays.....	36
3.3	Which Clays for Which Therapies?	38
3.3.1	According to Hunayn Ibn Ishâq (804–877)	39
3.3.2	According to Râzî (865–925).....	40
3.3.3	According to Avicenna (980–1037).....	43
3.3.4	From the Eleventh Century Onwards.....	44
3.4	Clay and Daily Life.....	44
3.4.1	Omnipresence of Clay.....	44

3.4.2	Clay: Often Present in Fakes.....	45
3.4.3	Clay: Ingredient of Legendary Cures.....	46
	References.....	46
4	Description of Clay Materials	47
4.1	Definition of Clay	47
4.2	Geological Context: Origin of Clays and Formation of Clay Deposits.....	49
4.3	Quality of Clay Deposits and the Harmfulness of Certain Clay Minerals.....	51
4.4	Mineralogical Characterization.....	52
4.5	Exploitation of Clays	58
4.5.1	Pedological Field	59
4.5.2	Craft Industry and Industrial Field.....	60
4.5.3	Chemical Field	61
	References.....	61
5	Clay Reactivity Depending Upon the Crystallochemical Properties of Clay Minerals	63
5.1	Clay Mineral Structures	63
5.1.1	Ideal Crystalline Configuration of Clay Mineral Structure	63
5.1.2	Structural Configurations of Natural Clay Minerals.....	69
5.2	Physical and Physicochemical Properties.....	78
5.2.1	Importance of the Physical Status of the Clays Being Used.....	78
5.2.2	Importance of the Dispersing Medium	80
5.3	Various Types of Water	82
5.3.1	Interstitial Water.....	82
5.3.2	Water Integrated into the Structural Layers	83
5.3.3	Water Integrated into the Structural Layers	83
5.3.4	Hydration Water of the Interlayer Cations	83
5.4	Various Hydration States.....	84
5.4.1	Dry Clay.....	86
5.4.2	Clay in Paste	87
5.4.3	Clay in Suspension.....	88
5.5	The Color of Clays.....	89
5.5.1	Importance of Color.....	89
5.5.2	Origin of the Color.....	90
5.5.3	Evolution of the Color.....	92
5.6	Classification of the Phyllosilicates	93
	References.....	93
6	General Information on Clay Applications for Health and Well-Being	95
6.1	Principal Domains of Clay Application	95
6.2	Complexity of the Interactions.....	99

6.3	Reactivity and Mode of Clay Action.....	101
6.3.1	Various Types of Reactive Surfaces Related to Structure	102
6.3.2	Various Reaction Scales	103
6.3.3	Various Modes of Action	105
6.4	Specificities of the Modes of Application.....	109
6.4.1	Complexity of the Relations “Need–Application–Effect”	109
6.4.2	Fundamental Knowledge for Users.....	112
6.4.3	Time of Application	112
6.4.4	Determining Stages for the Optimization of Clay Effects	113
6.5	Principal Mechanisms of Action and Application.....	115
6.5.1	Role of Barrier	115
6.5.2	Matter Brought in by Clay	117
6.5.3	Exchange of Matter Between Clay and the Body	117
6.5.4	Extraction of Matter with Clay	118
6.5.5	Transport of Matter Between Clay Particles	119
6.5.6	Physical Action—Heat Transfer—Mechanics (Pressure)	119
	References.....	119
7	Therapies Based on Clay	121
7.1	Physical Therapies	121
7.1.1	Active Physiotherapy	122
7.2	Peloids, Cataplasms, and Bandages	128
7.2.1	Aesthetics and Well-Being.....	130
7.2.2	Softness Effect	130
7.3	Therapies Involving Chemical Exchanges.....	131
7.3.1	Generalities	131
7.3.2	Nature and Position of the Exchanged Elements.....	132
7.3.3	Kinetics of the Exchanges of Molecules by Clay	133
7.3.4	Limits of the Exchange Capacity of Clay	134
7.3.5	Risks of the Reciprocal Exchanges Between Clay and the Body	135
7.3.6	Contributions of Trace Elements from Clay	135
7.4	Conditions for Use	136
	References.....	137
8	Principal Modes of Clay Use.....	139
8.1	External or Topical Application	139
8.1.1	Clay in Contact with Skin and Pelotherapy	139
8.1.2	Clay in Pelotherapy: A Review	141
8.2	Internal Applications.....	162
8.2.1	Food Supplement	162
8.2.2	Application to Functional or Temporary Intestinal Disorders	163
8.3	Clay Applications in the Presence of Other Active Molecules	166
	References.....	166

9 Provisioning, Recycling, and Trade of Clay	175
9.1 Purchase, Storage, and Conservation of Clay	175
9.2 Initial Preparation by the Supplier	176
9.3 Recycling	178
9.4 Marketing.....	179
9.5 Current Economic Impact.....	180
 Appendix A Summary of the Relevant Characteristics of Clay Minerals for Therapeutic and Cosmetic Applications	181
 Appendix B Therapeutic Properties of Clays and Pathologies Treated with Clays	183
 Appendix C Origin of the Names of Clay Minerals	189
 Appendix D Clays and Clay Minerals Used in the Field of Health	193
 Appendix E The Surface Area of Clays	197
 Appendix F Small Dictionary of Clay	199
 Appendix G Original International Classification of pelods, in French, Established in Dax, France, in 1949	201
 Appendix H Simplified Transliteration Adopted in Arabic and Persian	203
 Appendix I Photographic and Graphic Credit	207
 Glossary	209
 Index	215

Clays and Health

Properties and Therapeutic Uses

Rautureau, M.; Figueiredo Gomes, C. de S.; Liewig, N.;

Katouzian-Safadi, M.

2017, XXIV, 217 p. 35 illus., 4 illus. in color., Hardcover

ISBN: 978-3-319-42883-3
