

Contents

1	Design of Catalysts, Characterization, Kinetics and Mechanisms of Reactions, Deactivation/Regeneration	1
1.1	Introduction	1
1.2	Variation of Catalysis Types.	1
1.3	Catalysis: A Scientific Discipline	2
1.3.1	Importance of Catalysis in Industrial Application	2
1.3.2	A Brief Chronical of Catalysis	3
1.3.3	Principle of Active Sites of Catalyst	4
1.3.4	Catalysis Surface Coordination Chemistry.	5
1.4	Catalysis Modifiers and Promoters	5
1.5	Catalyst Active Phase—Support Interactions	6
1.6	Abstraction of Catalyst Shape-Selectivity	7
1.6.1	The Fundamental of Catalytic Cycle	7
1.6.2	Reaction Kinetics of Heterogeneous Catalytic Cycle	8
1.6.3	Generation of Solid Catalysts	8
1.7	Solid Catalysts Classification	8
1.7.1	Unsupported Catalysts.	9
1.7.2	Supported Catalysts.	13
1.8	Fashioning of Catalysts.	14
1.8.1	Unsupported Catalysts.	14
1.8.2	Supported Catalysts.	15
1.9	Characterization of Catalyst	16
1.9.1	Physical Properties	16
1.9.2	Chemical Properties.	18
1.10	Deactivation of Catalyst	19
1.11	Regeneration of Catalyst.	20
	References.	20

2	Design of Fuel Cells and Reactors, Estimation of Process Parameters, Their Modelling and Optimization	25
2.1	Introduction	25
2.2	Drawback in Fuel Cell Power Systems.	27
2.3	Design of Fuel Cells and Reactors	27
2.4	Estimation of Process Parameters in Fuel Cells	29
2.5	Modelling and Optimization for Fuel Cells.	32
2.5.1	Catalytic Partial Oxidation (CPO)	32
2.5.2	Water Gas Shift (WGS).	34
2.5.3	Catalytic Preferential Oxidation (<i>PrOx</i>)	34
	References.	35
3	Catalysis in Fuel Cells (PEMC, SOFC)	37
3.1	Introduction	37
3.2	Theory of Fuel Cell	38
3.3	Proton Exchange Membrane Fuel Cells (PEMFC)	40
3.3.1	Properties of PEM Fuel Cell	41
3.3.2	Advantages and Disadvantages of PEM Fuel Cell.	42
3.4	Solid Oxide Fuel Cells (SOFC)	42
3.4.1	The Properties of Solid Oxide Fuel Cell	42
3.4.2	Advantages and Disadvantages of Solid Oxide Fuel Cell	43
3.5	Fuel Cell Efficiency, η	44
3.5.1	Support Materials for PEMFC.	45
3.6	Conclusion	53
	References.	54
4	Hydrogen Energy in General	59
4.1	Introduction	59
4.2	The Limitations	60
4.3	Construction of Carbon Footmark.	60
4.4	Why Hydrogen and Fuel Cells?	61
4.5	Fuel Cells	62
4.5.1	Types of Fuel Cells.	63
4.6	Energy Security and Its Supply	64
4.6.1	Economic Competitiveness	65
4.6.2	Improvement of Health and Air Quality	65
4.6.3	Alleviation of Greenhouse Gas	65
4.7	Hydrogen	66
4.7.1	Hydrogen Heat Technologies.	66
4.7.2	Production of Hydrogen	66
4.7.3	The Advantages of Hydrogen Fuel Cells.	67
4.8	Pathways of Heat Decarburization	67
	References.	68

5	Catalysis in Production of Syngas, Hydrogen and Biofuels	71
5.1	Introduction	71
5.2	Catalysis in Production of Syngas	72
5.2.1	Steam Reforming (SR)	74
5.2.2	Partial Oxidation (POx)	75
5.2.3	Auto Thermal Reforming (ATR)	77
5.3	Catalysis in Production of Hydrogen	78
5.4	Catalysis in Production of Biofuels.	82
5.4.1	Biochemical Processes.	82
5.4.2	Chemical Catalysts	83
5.5	Application of Fischer–Tropsch Synthesis in Biomass to Liquid Conversion	85
	References.	87
6	Biodiesel and Green Diesel Production, Upgrading of Fats and Oils from Renewable Sources	91
6.1	Biodiesel Production.	91
6.2	Green Diesel Production.	94
6.2.1	Hydrodeoxygenation (HDO) for Hydrogenation- Derived Renewable Diesel (HDRD)	95
6.2.2	Decarboxylation of Fatty Acids.	97
6.3	Fats and Oils from Renewable Sources	99
6.4	Catalytic Upgrading of Fats and Oils from Renewable Sources	104
6.4.1	Homogeneous Trans-esterification Catalysts	104
6.4.2	Heterogeneous Trans-esterification Catalysts	105
6.4.3	Novel Energy Sources (Microwaves) for Trans- esterification	110
	References.	110
7	Catalytic Upgrading of Glycerol, Conversion of Biomass Derived Carbohydrates to Fuels and Catalysis in Depolymerization of Lignin	113
7.1	Catalytic Upgrading of Glycerol.	113
7.1.1	Supported Ni Catalysts	117
7.1.2	Supported Pt, Rh, and Ru Catalysts.	118
7.2	Conversion of Biomass Derived Carbohydrates to Fuels	122
7.3	Catalysis in Depolymerisation of Lignin.	126
	References.	131
8	Catalytic Pyrolysis of Biomass	141
8.1	Introduction	141
8.2	Catalysts for Biomass Catalytic Pyrolysis.	142
8.2.1	Basic Catalysts	142

8.2.2	Microporous Acidic Catalysts	144
8.2.3	Mesoporous Acidic Catalysts	149
	References	152
9	Catalytic Upgrading of Bio-oil: Biomass Gasification in the Presence of Catalysts	155
9.1	Introduction	155
9.2	Bio-oil	156
9.2.1	Bio-oil Upgrading—General Considerations	157
9.3	Hydrodeoxygenation	159
9.3.1	Catalysts and Reaction Mechanisms	161
9.3.2	Supports	165
9.3.3	Deactivation	166
9.4	Catalysts and Reaction Mechanisms	167
9.5	Prospect of Catalytic Bio-oil Upgrading	168
	References	171
10	Production of Renewable Hydrogen; <i>Liquid</i> Transportation Fuels (BTL)	177
10.1	Introduction	177
10.2	Catalytic Production of Liquid Hydrocarbon Transportation Fuels	179
10.3	Production of Renewable Hydrogen	182
10.3.1	Steam Methane Reforming	182
10.3.2	Gasification of Coal and Other Hydrocarbons	183
10.3.3	Electrolysis of Water	184
10.3.4	Hydrogen from Biomass	185
10.3.5	High Temperature Fuel Cells	185
10.3.6	Other Methods of Hydrogen Production	186
	References	186
11	Catalytic Transformation of CO₂ to Fuels	191
11.1	Introduction	191
11.2	CO ₂ Emissions in Biorefinery	193
11.3	Current Uses of CO ₂ Emissions in Ethanol Production by Fermentation Plants	195
11.4	Composition of CO ₂ Emissions in Ethanol Plants	195
11.5	Options for Using CO ₂ Emissions in Ethanol Plants	196
11.6	CO ₂ to Valorise Waste and Produce High-Value-Added Chemicals	199
11.7	Catalytic Conversion of CO ₂	201
11.7.1	New Aspects in the Synthesis of Methanol from CO ₂	201
11.7.2	DME from CO ₂	203
11.8	Conclusions	204
	References	205
